village creek wellness and rehabilitation: **Hope and Suffering** Gretchen Krueger, 2020-03-03 Gretchen Krueger's poignant narrative explores how doctors, families, and the public interpreted the experience of childhood cancer from the 1930s through the 1970s. Pairing the transformation of childhood cancer from killer to curable disease with the personal experiences of young patients and their families, Krueger illuminates the twin realities of hope and suffering. In this social history, each decade follows a family whose experience touches on key themes: possible

causes, means and timing of detection, the search for curative treatment, the merit of alternative treatments, the decisions to pursue or halt therapy, the side effects of treatment, death and dying—and cure. Recounting the complex and sometimes contentious interactions among the families of children with cancer, medical researchers, physicians, advocacy organizations, the media, and policy makers, Krueger reveals that personal odyssey and clinical challenge are the simultaneous realities of childhood cancer. This engaging study will be of interest to historians, medical practitioners and researchers, and people whose lives have been altered by cancer.

village creek wellness and rehabilitation: *Healthcare Beyond Reform* Joe Flower,

2012-04-24 There is a secret inside healthcare, and it's this: We can do healthcare for a lot less money. The only way to do that is to do it a lot better. We know it's possible because it is happening now. In pockets and branches across healthcare, people are receiving better healthcare for a lot less. Some employers, states, tribes, and health systems are doing healthcare a little differently. Healthcare Beyond Reform: Doing It Right for Half the Cost explains how this new kind of healthcare is not about rationing and cutbacks. It's not about getting less, it's about getting more. Getting better and friendlier healthcare, where you need it, when you need it. How? The answer is mostly not in Washington, it's not conservative or liberal. The answer is mostly not about who pays for healthcare. The answer is mostly about who gets paid, and what we pay them for. Healthcare Beyond Reform: Doing It Right For Half The Cost shows you how the system works. It explains how we got here, why we pay so much more than anyone else, and why we don't get what we pay for. You'll learn the five things healthcare can do to turn this around. You will see what some employers are already doing to make that happen, and what patients, families, doctors, and anyone else who cares about healthcare can do to help make it happen. There are only five and we need all five. All of them can be done right now, with the current healthcare system as it is. Joe Flower shows you how. In 1980, healthcare took no more of a bite out of the U.S. economy than it did in other developed countries. By 2000, healthcare cost twice as much in the U.S. as in most other developed countries. We can change that. —Joe Flower Joe Flower explains how we can make healthcare better for a lot less. <http://www.youtube.com/watch?v=nKvfv5SIS4Y&feature=youtu.be>
