Choosing the right dog food in a world with too many choices
 Walking down the dog food aisle in a pet supply superstore can present you with an overwhelming number of choices. Reading about dog food on the internet can make your head spin with so many opinions and stories. And judging the content that you find on dog food packaging can be confusing and misleading. How can the average dog owner make an informed choice in accordance with her dog's age, size and condition? In her latest book, author Linda Case describes how to make logical, evidence-based decisions for what to feed your dog amid all the options available.

 You will learn
 • How pet food marketers appeal to your emotions to persuade you to buy a particular type of dog food.
 • To distinguish between scientific, evidence-based information and the anecdotal evidence which is so pervasive—and often misleading—in the dog food arena.
 • Is there a scientific basis for dog foods designed specifically for puppies, senior dogs, canine athletes—even various breeds of dogs?
 • How to read and evaluate all of the material included on a typical package of dog food from the ingredients and label claims (“Natural,” “Anti-Oxidant,” “Low Fat”), to the Nutrient Analysis and Nutritional Adequacy statements.
 • How to avoid choice paralysis and the cognitive traps that can interfere with clear decision making.

 What experts are saying about <I>Dog Food Logic</I>
 Pet food is like a religion for many—but now those strong emotional ties can be backed up with fact. Linda Case separates fact from fiction, explains the complex terms and offers a guide to pet nutrition in simple to comprehend language. Unlike other books on this topic, there is no agenda here—except to present facts and then allow pet owners to make their own logical conclusions, letting the kibble drop where it may.
 Steve Dale, CABC, columnist Tribune Content Agency; radio host Black Dog Radio Productions and WGN Radio (Chicago); contributing editor USA Weekend; special correspondent Cat Fancy; author Good Cat!

wellness dry dog food white fish: The Forever Dog Rodney Habib, Karen Shaw Becker, 2024-09-10 #1 New York Times Bestseller In this pathbreaking guide, two of the world's most popular and trusted pet care advocates reveal new science to teach us how to delay aging and provide a long, happy, healthy life for our canine companions. Like their human counterparts, dogs have been getting sicker and dying prematurely over the past few decades. Why? Scientists are beginning to understand that the chronic diseases afflicting humans--cancer, obesity, diabetes, organ degeneration, and autoimmune disorders--also beset canines. As a result, our beloved companions are vexed with preventable health problems throughout much of their lives and suffer shorter life spans. Because our pets can't make health and lifestyle decisions for themselves, it's up to pet parents to make smart, science-backed choices for lasting vitality and health. The Forever Dog gives us the practical, proven tools to protect our loyal four-legged companions. Rodney Habib and Karen Becker, DVM, globetrotted (pre-pandemic) to galvanize the best wisdom from top geneticists, microbiologists, and longevity researchers; they also interviewed people whose dogs have lived into their 20s and even 30s. The result is this unprecedented and comprehensive guide, filled with surprising information, invaluable advice, and inspiring stories about dogs and the people who love

them. The Forever Dog prescriptive plan focuses on diet and nutrition, movement, environmental exposures, and stress reduction, and can be tailored to the genetic predisposition of particular breeds or mixes. The authors discuss various types of food—including what the commercial manufacturers don't want us to know—and offer recipes, easy solutions, and tips for making sure our dogs obtain the nutrients they need. Habib and Dr. Becker also explore how external factors we often don't think about can greatly affect a dog's overall health and wellbeing, from everyday insults to the body and its physiology, to the role our own lifestyles and our vets' choices play. Indeed, the health equation works both ways and can travel up the leash. Medical breakthroughs have expanded our choices for canine health—if you know what they are. This definitive dog-care guide empowers us with the knowledge we need to make wise choices, and to keep our dogs healthy and happy for years to come.

wellness dry dog food white fish: *Canine Nutrition* William D. Cusick, 1997 Today's dog food industry is producing hundreds of dog food formulas for the market. This industry has also tested many different breeds of dogs for their nutritional requirements. Results of this testing were published in 1985, showing such a wide range of nutritional requirements that we now know one food cannot be correct for all dogs. Yet, to date, no one from any of the dog food companies has come forward to tell us which breeds might react adversely to their food. This has left most dog food buyers in the position of having to experiment at home in order to find the best food for their dog. Too often this type of experimenting has had disastrous results. But now the dog food buyer has a tool...this book can help all dog owners match their dog to the right food. Recommendations in this book are made by the nutrient sources found in most commercial dog food formulas, and not by brand name or with any bias or brand loyalty.

In this revised and updated edition, Martin continues to explore the shocking processes by which commercial pet foods are produced. She offers alternative recipes for feeding pets, nutritional advice, and an exploration of Pet Peeves, in which she explores several scams aimed at pet owners. This groundbreaking book gives us a glimpse into exactly what we are doing when we buy pet food.

wellness dry dog food white fish: Puppy Socialization Marge Rogers, Eileen Anderson, 2021-06-23 *Puppy Socialization: What It Is and How to Do It* defines and demystifies the most important thing you can do for your puppy: socialization. The authors don't just tell you what you need to know about socialization. They show you with dozens of photographs and exclusive linked videos (a live internet connection is needed to view the videos). You'll see other owners socialize their puppies under the guidance of a nationally certified dog trainer and behavior consultant. These real-life examples of socialization show you what to do when things go well and when they don't go so well. You'll learn about: • The magical time. Did you know that there is a special time in a puppy's life when he is primed to accept new things? The authors tell you when that time is, when that socialization window starts closing, and how a little effort by an owner during that time can save heartache later. • Canine body language. Puppies and dogs are talking all the time—with their body language. Learn to tell when a puppy or dog is relaxed and happy, a bit nervous about something, or outright fearful. • Myth-busting. There's a lot of advice out there about socialization and not all of it

is good. Some common myths can actually cause a puppy harm. The authors give you the most up-to-date information on puppy socialization and put some harmful myths to rest. • Socializing a puppy during COVID-19. Puppies have so much to get used to: people, environments, noises, and more. The authors provide strategies for keeping humans and puppies safe while socializing puppies, even during the COVID-19 pandemic. • What supplies are needed during socialization. The authors provide checklists of things owners need when socializing a puppy at home and away from home.

wellness dry dog food white fish: You Look Like That Girl Lisa Jakub, 2015-06-15 At the age of twenty-two, Lisa Jakub had what she was supposed to want: she was a working actor in Los Angeles. She had more than forty movies and TV shows to her name, she had been in blockbusters like *Mrs. Doubtfire* and *Independence Day*, she walked the red carpet and lived in the house she bought when she was fifteen. But something was missing. Passion. Purpose. Happiness. Lisa had been working since the age of four, after a man approached her parents at a farmer's market and asked her to audition for a commercial. That chance encounter dictated the next eighteen years of her unusual— and frequently awkward—life. She met Princess Diana... and almost fell on her while attempting to curtsy. She filmed in exciting locations... and her high school asked her not to come back. She went to fancy parties... and got kind of kidnapped that one time. Success was complicated. Making movies, traveling the world, and meeting intriguing people was fun for a while, but Lisa eventually realized she was living a life based on momentum and definitions of success that were not her own. She battled severe anxiety and panic attacks while feeling like she was living someone else's dream. Not wanting to become a child actor stereotype, Lisa retired from acting and left L.A. in search of a path that felt more authentic to her. In this funny and insightful book, Lisa chronicles the adventures of growing up in the film industry and her difficult decision to leave behind the only life she had ever known, to examine her priorities, and write the script for her own life. She explores the universal question we all ask ourselves: what do I want to be when I grow up?
