wellness family dentistry lawrenceburg tn: Augie's Quest Augie Nieto, T.R. Pearson, 2011-01-15 What happens to orphan diseases that aren't big enough profit centers for the pharmaceutical industry or get caught in the web of government funding and academic research? Augie Nieto found out in the spring of 2005: At forty-seven years old he was diagnosed with ALS. Devastated, Augie struggled with depression and attempted suicide. When he awoke from a coma, with friends and family surrounding him, his sense of faith and mission were renewed. Fast-forward one year: Augie and his wife, Lynne, were profiled as Real Heroes on the Today show. Their determination to beat the disease had already led to major overhauls in the way ALS research was conducted. In partnership with the Muscular Dystrophy Association, Augie had set up a foundation and lab to coordinate and oversee ALS research and testing across the globe. By centralizing operations and championing an entrepreneurial approach to medical research, Augie and his team accomplished remarkable results in less than two years. Part inspiration, part business innovation, Augie's Quest illustrates how one person can make a meaningful difference. Praise for Augie Nieto: George H. W. Bush, former U.S. president: Your contributions to the fitness industry are well known, and your dedication an inspiration. Lance Armstrong, seven-time Le Tour de France champion: I think it says a lot about Augie, the fact that everybody came together regardless of whether or not it's for competing gyms or competing companies that make equipment. They all say, this is one of our own; this is a guy who's committed his life to our industry and has been dealt a serious blow. We're going to be there for him, we're going to say, we're here for you and we're part of the Quest. Arnold Schwarzenegger, governor of California: Your success has been incredible. But you are so much more than just a successful businessman. You are the greatest husband, a great father, and a

terrific friend. So,

wellness family dentistry lawrenceburg tn: Adaptability of Human Gait A.E. Patla, 1991-03-25 A large number of volumes have been produced summarizing the work on generation and control of rhythmic movements, in particular locomotion. Unfortunately most of them focus on locomotor studies done on animals. This edited volume redresses that imbalance by focusing completely on human locomotor behaviour. The very nature of the problem has both necessitated and attracted researchers from a wide variety of disciplines ranging from psychology, neurophysiology, kinesiology, engineering, medicine to computer science. The different and unique perspectives they bring to this problem provide a comprehensive picture of the current state of

knowledge on the generation and regulation of human locomotor behaviour. A common unifying theme of this volume is studying the adaptability of human gait to obtain insights into the control of locomotion. The intentional focus on adaptability is meant to draw attention to the importance of understanding the generation and regulation of skilled locomotor behaviour rather than just the generation of basic locomotor patterns which has been the major focus of animal studies. The synthesis chapter at the end of the volume examines how the questions posed, the technology, and the experimental and theoretical paradigms have evolved over the years, and what the future has in store for this important research domain.

Further, it goes on to provide an exhaustive analysis of Camus' critique of violence and his intellectual resistance to totalitarianism. Bringing together latest scholarship with an acute analysis of Albert Camus' philosophy, this sourcebook throws a powerful light on the intellectual foundations of the twentieth century and its relevance for the twenty-first. wellness family dentistry lawrenceburg tn: The Stranahans of Fort Lauderdale Harry A. Kersey, 2003 This informative, fast-paced, interesting book on the Stranahans of Fort Lauderdale provides needed historical context to a dynamic, ever-growing population center. Harry Kersey, one of Florida's leading historians, interweaves the story of the town's founding and growth into the lives of two of its most significant pioneers and community builders.--J. Michael Denham, director, Center for Florida History, Florida Southern College, Lakeland When they married in 1900, Frank and Ivy Stranahan began a life together on the Florida frontier that would shape and define the development of one of the state's most sophisticated urban centers. Pioneering spirit and economic enterprise linked them to Seminole Indians, venture capitalists, and colorful entrepreneurs along the New River settlement; today they're recognized as a founding family of Fort Lauderdale and their riverfront home has been restored and designated a National Historic Landmark. Frank Stranahan came south from Ohio in 1893 to run an overnight camp on the stagecoach line carrying passengers from Lake Worth to the Miami area. He soon opened a trading post that thrived on commerce in pelts, plumes, and hides with Seminole Indians, who in turn purchased goods and groceries to take back to their camps in the Everglades. Stranahan's business interests expanded to include real estate and banking. An honest businessman, he became a respected political and civic leader, instrumental in the birth of Fort Lauderdale in 1911. When the Florida land boom collapsed and his bank closed, Stranahan's mental and physical health failed, and he committed suicide in 1929. Ivy

Cromartie, a native Floridian, was 18 when she arrived at the settlement as its first schoolteacher and met her future husband. Energetic and articulate, she focused her activities outside the home. Besides teaching, she was active in a variety of reform movements ranging from Audubon Society efforts to save the plume birds to temperance and women's suffrage, working mainly through the Florida Federation of Women's Clubs. She is best remembered for her role as an advocate for Indian rights--especially education and child welfare--primarily with the Friends of the Seminoles, an organization she established in the 1930s. Before her death in 1971 she spoke frequently about her full life to reporters and historians and was interviewed extensively by Kersey. Harry A. Kersey, Jr., professor of history at Florida Atlantic University, Boca Raton, is the author of several books, including *The Florida Seminoles and the New Deal, 1933-1942* (UPF, 1989) and *Pelts, Plumes, and Hides: White Traders among the Seminole Indians, 1870-1930* and the coauthor of *Buffalo Tiger: A Life in the Everglades*.

wellness family dentistry lawrenceburg tn: The Upworld Lindsey S. Frantz, 2017-05-25 It has been many generations since the Vitium War. In the ruins of what was once Appalachia, the population has split into three groups-upworlders who live in sparse, walled off cities, albino cave dwellers, and a group of savage nomads called the Wylden. Then there's Erilyn-a telekinetic 17-year-old girl who can see auras and hear thoughts. For three years she lived a quiet, calm life in the woods with Luna, her albino serval cat, until the day Finn-an upworld boy from Sunnybrook-stumbles, injured, into her clearing, chased by Wylden hunters. Erilyn's once calm life is turned upside down as she guardedly travels with Finn back to Sunnybrook. There she must confront both the secrets of her past-the cave dwellers she ran from as a child and the bittersweet memories she daily tries to forget-and Morrigan, the girl who broke Finn's heart and who's harboring her own a dangerous secret. In alternating chapters told in Erilyn and Finn's voices, in a style similar to Veronica Rossi, Frantz explores segregated societies and how vitium-the product of hundreds of years of pollution-affects this post-war world, which has startling parallels to our present
