wellness way eau claire: Health Professions Education Institute of Medicine, Board on Health Care Services, Committee on the Health Professions Education Summit, 2003-07-01 The Institute of Medicine study Crossing the Quality Chasm (2001) recommended that an interdisciplinary summit be held to further reform of health professions education in order to enhance quality and patient safety. Health Professions Education: A Bridge to Quality is the follow up to that summit, held in June 2002, where 150 participants across disciplines and occupations developed ideas about how to integrate a core set of competencies into health professions education. These core competencies include patient-centered care, interdisciplinary teams, evidence-based practice, quality improvement, and informatics. This book recommends a mix of approaches to health education improvement, including those related to oversight processes, the training environment, research, public reporting, and leadership. Educators, administrators, and health professionals can use this book to help achieve an approach to education that better prepares clinicians to meet both the needs of patients and the requirements of a changing health care system.

wellness way eau claire: Our Knowledge Is Not Primitive Wendy Makoons Geniusz, 2009-07-09 Traditional Anishinaabe (Ojibwe or Chippewa) knowledge, like the knowledge systems of indigenous peoples around the world, has long been collected and presented by researchers who were not a part of the culture they observed. The result is a colonized version of the knowledge, one that is distorted and trivialized by an ill-suited Eurocentric paradigm of scientific investigation and classification. In Our Knowledge Is Not Primitive, Wendy Makoons Geniusz contrasts the way in which Anishinaabe botanical knowledge is presented in the academic record with how it is preserved in Anishinaabe culture. In doing so she seeks to open a dialogue between the two communities to

discuss methods for decolonizing existing texts and to develop innovative approaches for conducting more culturally meaningful research in the future. As an Anishinaabe who grew up in a household practicing traditional medicine and who went on to become a scholar of American Indian studies and the Ojibwe language, Geniusz possesses the authority of someone with a foot firmly planted in each world. Her unique ability to navigate both indigenous and scientific perspectives makes this book an invaluable contribution to the field of Native American studies and enriches our understanding of the Anishinaabe and other native communities.

wellness way eau claire: **Plants Have So Much to Give Us, All We Have to Do Is Ask** Mary Siisip Geniusz, 2015-06-22 Mary Siisip Geniusz has spent more than thirty years working with, living with, and using the Anishinaabe teachings, recipes, and botanical information she shares in *Plants Have So Much to Give Us, All We Have to Do Is Ask*. Geniusz gained much of the knowledge she writes about from her years as an oshkaabewis, a traditionally trained apprentice, and as friend to the late Keewaydinoquay, an Anishinaabe medicine woman from the Leelanau Peninsula in Michigan and a scholar, teacher, and practitioner in the field of native ethnobotany. Keewaydinoquay published little in her lifetime, yet Geniusz has carried on her legacy by making this body of knowledge accessible to a broader audience. Geniusz teaches the ways she was taught—through stories. Sharing the traditional stories she learned at Keewaydinoquay's side as well as stories from other American Indian traditions and her own experiences, Geniusz brings the plants to life with narratives that explain their uses, meaning, and history. Stories such as "Naanabozho and the Squeaky-Voice Plant" place the plants in cultural context and illustrate the belief in plants as cognizant beings. Covering a wide range of plants, from conifers to cattails to medicinal uses of yarrow, mullein, and dandelion, she explains how we can work with those beings to create food, simple medicines, and practical botanical tools. *Plants Have So Much to Give Us, All We Have to Do Is Ask* makes this botanical information useful to native and nonnative healers and educators and places it in the context of the Anishinaabe culture that developed the knowledge and practice.

Named a New York Times Notable Book and a Best Book of the Year by The Economist, Oprah Daily, BookPage, Book Riot, the New York Public Library, and more! In *The Song of the Cell*, the extraordinary author of the Pulitzer Prize-winning *The Emperor of All Maladies* and the #1 New York Times bestseller *The Gene* "blends cutting-edge research, impeccable scholarship, intrepid reporting, and gorgeous prose into an encyclopedic study that reads like a literary page-turner" (Oprah Daily). Mukherjee begins this magnificent story in the late 1600s, when a distinguished English polymath, Robert Hooke, and an eccentric Dutch cloth-merchant, Antonie van Leeuwenhoek looked down their handmade microscopes. What they saw introduced a radical concept that swept through biology and medicine, touching virtually every aspect of the two sciences, and altering both forever. It was the fact that complex living organisms are assemblages of tiny, self-contained, self-regulating units. Our organs, our physiology, our selves—hearts, blood, brains—are built from these compartments. Hooke christened them "cells." The discovery of cells—and the reframing of the human body as a cellular ecosystem—announced the birth of a new kind of medicine based on

the therapeutic manipulations of cells. A hip fracture, a cardiac arrest, Alzheimer's dementia, AIDS, pneumonia, lung cancer, kidney failure, arthritis, COVID pneumonia—all could be reconceived as the results of cells, or systems of cells, functioning abnormally. And all could be perceived as loci of cellular therapies. Filled with writing so vivid, lucid, and suspenseful that complex science becomes thrilling, *The Song of the Cell* tells the story of how scientists discovered cells, began to understand them, and are now using that knowledge to create new humans. Told in six parts, and laced with Mukherjee's own experience as a researcher, a doctor, and a prolific reader, *The Song of the Cell* is both panoramic and intimate—a masterpiece on what it means to be human. "In an account both lyrical and capacious, Mukherjee takes us through an evolution of human understanding: from the seventeenth-century discovery that humans are made up of cells to our cutting-edge technologies for manipulating and deploying cells for therapeutic purposes" (The New Yorker).

wellness way eau claire: *Startup Your Life* Anna Akbari, 2016-12-27 A young entrepreneur and sociologist shows readers how to reach personal fulfillment using the same strategies that power Silicon Valley's greatest startups. As an entrepreneur, Anna Akbari learned that one of the best things about startups is their ability to “pivot” quickly—basically a euphemism for failing and starting over. And she quickly found that personal success is no different. It's not just about developing and following the right process but also having a good idea. And that demands rigor and daily maintenance—far beyond a few positive affirmations. Like any Silicon Valley startup, the business of life is not as glamorous as its Instagram account would make it seem. What do you do when planning is not an option? When control is out of your reach? You isolate the small stuff, experiment constantly, and use the results to lay a more sustainable foundation for the future. You validate your idealized vision by testing it out in bite-sized increments. You see what sticks, integrate, and move forward. And inevitably, you experience a series of failures along the way, but those failures are key to your next success. Living a start up life is about maximizing flexibility and measuring on-going results, not avoiding failure or reaching one particular end goal. It's about embracing defeat, analyzing it, and failing up. In *Startup Your Life*, Akbari shows that after all, it's often the stumbles that pave the way for real happiness.

Theoretical and research chapters advance to chapters offering learning experiences for nursing students and practitioners. As nurses are the crucial link between those who are vulnerable, and those with access to solutions, it provides ideas for how nurses might advocate for the vulnerable on a policy level. wellness way eau claire: The Perfection Trap Thomas Curran, 2023-08-08 In the bestselling tradition of Brené Brown's *The Gifts of Imperfection*, this illuminating book by an acclaimed professor at the London School of Economics explores how the pursuit of perfection can become a dangerous obsession that leads to burnout and depression—keeping us from achieving our goals. Today, burnout and depression are at record levels, driven by a combination of intense workplace competition, oppressively ubiquitous social media encouraging comparisons with others, the quest for elite credentials, and helicopter parenting. Society continually broadcasts the need to want more, and to be perfect. Gathering a wide range of contemporary evidence, Curran calls for both introspection and broader, societal change. He shows what we can do as individuals to resist the modern-day pressure to be perfect, and in so doing, win for ourselves a more purposeful and contented life. The Perfection Trap is for anyone who has ever felt overwhelmed by the soul-crushing need to not just compete but compete to a level beyond reason. In place of an ever-moving treadmill, it offers the relief of letting go to focus on what matters most.

wellness way eau claire: *Indian Pilgrims* Michelle M. Jacob, 2016-10-04 In 2012 Kateri Tekakwitha became the first North American Indian to be canonized as a saint by the Roman Catholic Church, an event that American Indian Catholics have awaited for generations. Saint Kateri, known as the patroness of the environment, was born in 1656 near present-day Albany, New York, to an Algonquin mother and a Mohawk father. Tekakwitha converted to Christianity at age nineteen and took a vow of perpetual virginity. Her devotees have advocated for her sainthood since her death in 1680. Within historical Catholic writings, Tekakwitha is portrayed as a model of pious, submissive femininity. *Indian Pilgrims* moves beyond mainstream narratives and shows that Saint Kateri is a powerful feminine figure who inspires decolonizing activism in contemporary Indigenous peoples' lives. Author Michelle M. Jacob examines Saint Kateri's influence on and relation to three important themes—caring for the environment, building community, and reclaiming the Native feminine as sacred—and brings a Native feminist perspective to the story of Saint Kateri. The book demonstrates the power and potential of Indigenous decolonizing activism, as Saint Kateri's devotees claim the space of the Catholic Church to revitalize traditional cultural practices, teach and learn Indigenous languages, and address critical issues such as protecting Indigenous homelands from environmental degradation. The book is based on ethnographic research at multiple sites, including Saint Kateri's 2012 canonization festivities in Vatican City and Italy, the Akwesasne Mohawk Reservation (New York and Canada), the Yakama Reservation (Washington), and the National Tekakwitha Conferences in Texas, North Dakota, and Louisiana. Through narratives from these events, Jacob addresses issues of gender justice—such as respecting the autonomy of women while encouraging collectivist thinking and strategizing—and seeks collective remedies that challenge colonial and capitalist filters.

wellness way eau claire: *Campus Rape Culture* Jennifer L. Huck, 2021-08-12 This book looks at rape myths and rape culture within the university environment, examining the development of social identities in the creation and support of such culture. Building on a four-year research project, this book demonstrates how an understanding of rape culture and of the falsity of rape myths amongst students and staff at university is often at odds with an understanding of the degree to which sexual assaults take place, and of why they take place. This book explores how traditionally held beliefs of sex roles between men and women, poor conceptions of consent processes, lack of available data, and an inability to see the full continuum of sexual assault limit the knowledge of sexual assaults inside the university community. Taken together the studies demonstrate how socialized social identities of masculinity and femininity hold power in how consent, sexual assaults, and sexual behaviors manifest through cultural values of rape myths and hook-ups. Universities are challenged to examine their sexual assault programming in connection to Title IX and beyond to create educational opportunities about rape culture and rape myths suitable for their students, faculty, and staff. Written in a clear and direct style, this is essential reading for all those engaged in research about rape culture, sexual assault, and violence against women.
