Chapter 1: Understanding Different Forms of Government (Monarchy, Oligarchy, Democracy, etc.)

"Who Rules?" introduces various forms of government, allowing players to experience the consequences of different power structures. Let's break down some key governmental systems:

Monarchy: Ruled by a single individual, usually a king or queen, often inheriting power. Power is concentrated in the hands of one person. In "Who Rules?", this might manifest as a single leader making all the decisions without input from others.

Oligarchy: Ruled by a small group of elite individuals, often based on wealth, family connections, or military power. This group holds exclusive control over decision-making. The game might simulate this through a council or select few making decisions that affect everyone.

Democracy: Ruled by the people, either directly (direct democracy) or through elected representatives (representative democracy). This emphasizes citizen participation and the rule of law. "Who Rules?" might showcase this through voting mechanisms or citizen input affecting policies.

Autocracy: A system where a single person holds absolute power, often obtained through force or coercion, without the consent of the governed. This contrasts sharply with democratic ideals.

Theocracy: A system where religious leaders hold ultimate power and rule based on religious laws and principles. This merges religious and political authority.
