Hollowak, 2000-09-01 Since its founding in 1925, the University of Baltimore has become one of Maryland's premier educational institutions. Originally organized as a practical solution for working men and women seeking a college degree, the institution developed rapidly--the School of Law and the College of Business Administration, begun in the founding year as evening professional schools, were joined by a day division and, in 1937, a junior college. Finally, in 1961, the university began its College of Liberal Arts to meet the demand for a relatively low-cost, liberal arts college education. Containing over two hundred black-and-white photographs from the archives of the Langsdale Library, University of Baltimore explores the school's history, from its birth in October 1925 to the present day, the eve of its seventy-fifth anniversary. From the founding of the first Greek societies and African-American clubs on campus to the anti-war protests of the 1960s, from the beginning of the sports program in 1928 to the championships won over the decades, the University of Baltimore has led a vital life and provided opportunity to a countless many. Through the images and captions contained in this visual tribute to the university, readers will meet the school's founding pioneers, as well as the administrators, faculty, and staff who have helped shape the university's past, present, and future, and most importantly, the students and alumni who have always made the University of Baltimore an exciting place to work and learn.

william h thumel sr business center: American Epic Garrett Epps, 2013-07-29 In 1987, E.L. Doctorow celebrated the Constitution's bicentennial by reading it. It is five thousand words long but reads like fifty thousand, he said. Distinguished legal scholar Garrett Epps--himself an award-winning novelist--disagrees. It's about 7,500 words. And Doctorow missed a good deal of high rhetoric, many literary tropes, and even a trace of, if not wit, at least irony, he writes. Americans may venerate the Constitution, but all too seldom is it read. In *American Epic*, Epps takes us through a complete reading of the Constitution--even the boring parts--to achieve an appreciation of its power and a holistic understanding of what it says. In this book he seeks not to provide a definitive

interpretation, but to listen to the language and ponder its meaning. He draws on four modes of reading: scriptural, legal, lyric, and epic. The Constitution's first three words, for example, sound spiritual--but Epps finds them to be more aspirational than prayer-like. Prayers are addressed to someone . . . either an earthly king or a divine lord, and great care is taken to name the addressee. . . This does the reverse. The speaker is 'the people,' the words addressed to the world at large. He turns the Second Amendment into a poem to illuminate its ambiguity. He notices oddities and omissions. The Constitution lays out rules for presidential appointment of officers, for example, but not removal. Should the Senate approve each firing? Can it withdraw its advice and consent and force a resignation? And he challenges himself, as seen in his surprising discussion of the Defense of Marriage Act (DOMA) in light of Article 4, which orders states to give full faith and credit to the acts of other states. Wry, original, and surprising, *American Epic* is a scholarly and literary tour de force.

By examining the perilous intersections of identity, categorization, and community, contributors challenge societal mores and countercultural norms. *Nobody Passes* explores and critiques the various systems of power seen (or not seen) in the act of passing. In a pass-fail situation, standards for acceptance may vary, but somebody always gets trampled on. This anthology seeks to eliminate the pressure to pass and thereby unearth the delicious and devastating opportunities for transformation that might create. Mattilda, aka Matt Bernstein Sycamore, has a history of editing anthologies based on brazen nonconformity and gender defiance. Mattilda sets out to ask the question, What lies are people forced to tell in order to gain acceptance as 'real'. The answers are as varied as the life experiences of the writers who tackle this urgent and essential topic.

william h thumel sr business center: *The Castle Cross the Magnet Carter* Kia Corthron, 2016-01-26 Winner of the Center for Fiction's 2016 First Novel Prize The hotly anticipated first novel by lauded playwright and *The Wire* TV writer Kia Corthron, *The Castle Cross the Magnet Carter* sweeps American history from 1941 to the twenty-first century through the lives of four men--two white brothers from rural Alabama, and two black brothers from small-town Maryland--whose journey culminates in an explosive and devastating encounter between the two families. On the eve of America's entry into World War II, in a tiny Alabama town, two brothers come of age in the shadow of the local chapter of the Klan, where Randall--a brilliant eighth-grader and the son of a sawmill worker--begins teaching sign language to his eighteen-year-old deaf and uneducated brother B.J. Simultaneously, in small-town Maryland, the sons of a Pullman Porter--gifted six-year-old Eliot and his artistic twelve-year-old brother Dwight--grow up navigating a world expanded both by a visit from civil and labor rights activist A. Philip Randolph and by the legacy of a lynched great-aunt. The four mature into men, directly confronting the fierce resistance to the early civil rights movement, and are all ultimately uprooted. Corthron's ear for dialogue, honed from years of theater work, brings to life all the major concerns and movements of America's past century through the organic growth of her marginalized characters, and embraces a quiet beauty in their everyday existences. Sharing a cultural and literary heritage with the work of Toni Morrison, Alex Haley, and Edward P. Jones, Kia Corthron's *The Castle Cross the Magnet Carter* is a monumental epic deftly bridging the political and the poetic, and wrought by one of America's most recently recognized treasures.

 OI like a little rebellion now and thenÓÑso wrote Thomas Jefferson to Abigail Adams, enlisting in a

tradition that throughout American history has led writers to rage and reason, prophesy and provoke. This is the first anthology to collect and examine an American literature that holds the nation to its highest ideals, castigating it when it falls short and pointing the way to a better collective future. American Protest Literature presents sources from eleven protest movements—political, social, and cultural—from the Revolution to abolition to gay rights to antiwar protest. Each section reprints documents from the original phase of the movement as well as evidence of its legacy in later times. Informative headnotes place the selections in historical context and draw connections with other writings within the anthology and beyond. Sources include a wide variety of genres—pamphlets, letters, speeches, sermons, legal documents, poems, short stories, photographs, posters—and a range of voices from prophetic to outraged to sorrowful, from U.S. Presidents to the disenfranchised. Together they provide an enlightening and inspiring survey of this most American form of literature.

william h thumel sr business center: *Our Black Year* Maggie Anderson, 2012-02-14 Maggie and John Anderson were successful African American professionals raising two daughters in a tony suburb of Chicago. But they felt uneasy over their good fortune. Most African Americans live in economically starved neighborhoods. Black wealth is about one tenth of white wealth, and black businesses lag behind businesses of all other racial groups in every measure of success. One problem is that black consumers -- unlike consumers of other ethnicities -- choose not to support black-owned businesses. At the same time, most of the businesses in their communities are owned

by outsiders. On January 1, 2009 the Andersons embarked on a year-long public pledge to buy black. They thought that by taking a stand, the black community would be mobilized to exert its economic might. They thought that by exposing the issues, Americans of all races would see that economically empowering black neighborhoods benefits society as a whole. Instead, blacks refused to support their own, and others condemned their experiment. Drawing on economic research and social history as well as her personal story, Maggie Anderson shows why the black economy continues to suffer and issues a call to action to all of us to do our part to reverse this trend.

william h thumel sr business center: *Utilization-Focused Evaluation* Michael Quinn Patton, 1986 The second edition of Patton's classic text retains the practical advice, based on empirical observation and evaluation theory, of the original. It shows how to conduct an evaluation, from beginning to end, in a way that will be useful -- and actually used. Patton believes that evaluation epitomizes the challenges of producing and using information in the information age. His latest book includes new stories, new examples, new research findings, and more of Patton's evaluation humour. He adds to the original book's insights and analyses of the changes in evaluation during the past decade, including: the emergence of evaluation as a field of professional practice; articulation of standards for evaluation; a methodological synthesis of the qualitative versus quantitative debate; the tremendous growth of 'in-house' evaluations; and the cross-cultural development of evaluation as a profession. This edition also incorporates the considerable research done on utilization during the last ten years. Patton integrates diverse findings into a coherent framework which includes: articulation of utilization-focused evaluation premises; examination of the stakeholder assumption; and clarification of the meaning of utilization. --Publisher description.
