women business mentors living or dead: Athena Rising W. Brad Johnson, David G. Smith, 2019-12-03 When it comes to mentoring, women face more barriers than men. Here's how men can help change that. Increasingly, new employees and junior members of any profession are encouraged—sometimes stridently—to find a mentor! Four decades of research reveals that the effects of mentorship can be profound and enduring; strong mentoring relationships have the capacity to transform individuals and entire organizations. But the mentoring landscape is unequal. Evidence consistently shows that women face more barriers in securing mentorships than men, and when they do find a mentor, they may reap a narrow range of both professional and psychological benefits. *Athena Rising* is a book for men about how to eliminate this problem by mentoring women deliberately and effectively. Traditional notions of mentoring are modeled on male-to-male relationships, yet women often report a desire for mentoring that addresses their interpersonal needs. Women want mentors who not only understand this, but truly honor it. Coauthors W. Brad Johnson and David G. Smith present a straightforward, no-nonsense manual for men working in all types of institutions, organizations, and businesses to become excellent mentors to women, because as women succeed, lean in, and assume leading roles in any organization or work context, the culture will become more egalitarian, effective, and prone to retaining top talent.

Though it seemed radical at first—spending more time with less people to further an all important message—he soon realized this is the discipleship model Jesus set out during his ministry; today two billion people worldwide embrace the wisdom He entrusted to a small band of disciples two thousand years ago. *Mentor Like Jesus* is Campbell's revelation of what he now calls “next generation mentoring,” an exponentially rewarding process that is resulting in “lives changed, marriages saved, children dealt with in a more loving way.” Readers of any age and in any situation will clearly understand how the return on a meaningful investment in another person is truly immeasurable.

women business mentors living or dead: *The Divine Commodity* Skye Jethani, 2009-05-26 The challenge facing Christianity today is not a lack of motivation or resources, but a failure of imagination. A growing number of people are disturbed by the values exhibited by the contemporary church. Worship has become entertainment, the church has become a shopping mall, and God has become a consumable product. Many sense that something is wrong, but they cannot imagine an alternative way. *The Divine Commodity* finally articulates what so many have been feeling and offers hope for the future of a post-consumer Christianity. Through Scripture, history, engaging narrative, and the inspiring art of Vincent van Gogh, *The Divine Commodity* explores spiritual practices that liberate our imaginations to live as Christ's people in a consumer culture opposed to the values of his kingdom. Each chapter shows how our formation as consumers has distorted an element of our faith. For example, the way churches have become corporations and how branding makes us more focused on image than reality. It then energizes an alternative vision for those seeking a more meaningful faith. Before we can hope to live differently, we must have our minds released from consumerism's grip and captivated once again by Christ.

women business mentors living or dead: Female Entrepreneurs in the Long Nineteenth Century Jennifer Aston, Catherine Bishop, 2020-07-29 This volume challenges those who see gender inequalities invariably defining and constraining the lives of women. But it also broadens the conversation about the degree to which business is a gender-blind institution, owned and managed by entrepreneurs whose gender identities shape and reflect economic and cultural change. - Mary A. Yeager, Professor Emerita, University of California, Los Angeles This is the first book to consider nineteenth-century businesswomen from a global perspective, moving beyond European and trans-Atlantic frameworks to include many other corners of the world. The women in these pages, who made money and business decisions for themselves rather than as employees, ran a wide variety of enterprises, from micro-businesses in the 'grey market' to large factories with international reach. They included publicans and farmers, midwives and property developers, milliners and plumbers, pirates and shopkeepers. *Female Entrepreneurs in the Long Nineteenth Century: A Global Perspective* rejects the notion that nineteenth-century women were restricted to the home. Despite a variety of legal and structural restrictions, they found ways to make important but largely unrecognised contributions to economies around the world - many in business. Their impact on the economy and the economy's impact on them challenge gender historians to think more about business and business historians to think more about gender and create a global history that is inclusive of multiple perspectives. women business mentors living or dead: *Dreams Achieved and Denied* Robert Courtney Smith, 2024-09-06 U.S.-born Mexicans in New York City have achieved one of the biggest

one-generation jumps in mobility in American immigration history. In 2020, 42-percent of U.S.-born Mexican men and 49-percent of U.S.-born Mexican women in New York City had graduated from college. This high level of educational attainment is dramatically higher than their U.S.- and foreign-born counterparts in other places. How did U.S.-born Mexicans in New York City achieve such remarkable mobility? In *Dreams Achieved and Denied*, sociologist Robert Courtney Smith examines the laws, policies, and individual and family practices that promoted-and inhibited-their social mobility. For over twenty years, Smith followed nearly one hundred children of Mexican immigrants in New York City to learn what determined their ability to move up the social ladder. Smith finds that legal status was fundamental in shaping opportunities for mobility. Having or gaining legal status enabled individual and family efforts for mobility to be rewarded and by allowing efficacious use of New York City and New York State policies and practices that support mobility. Lacking legal status, however, blocked mobility, even for those individuals and families engaging in the same strategies, limiting the benefit derived from those mobility-promoting city and state policies. The young people that Smith followed employed a number of strategies to pursue advancement. Smith finds that having strong mentors, picking better high schools, and the desire to keep the immigrant family bargain-the expectation that children of immigrants will redeem their parents' sacrifice by doing well in school, helping their parents and younger siblings, and becoming ethical, well-educated people-all led to better adult lives and outcomes. The ability to successfully utilize these strategies was aided by New York City and State policies that are immigrant-inclusive and mobility promoting, including New York State laws that offers undocumented New Yorkers in-state tuition at public universities, allows them to get standard driver's licenses, and access state health insurance programs, as well as New York City's school choice system, which allows for students to attend better schools outside of their designated school catchment zone. *Dreams Achieved and Denied* is a fascinating exploration of the historic upward mobility of Mexicans in New York City, which counters the dominant story research and public discourse tell about Mexican mobility in the United States.

When a woman unexpectedly loses her lifelong best friend and mentor, she finds herself burdened with the unwanted dog he has left behind. Her own battle against grief is intensified by the mute suffering of the dog, a huge Great Dane traumatized by the inexplicable disappearance of its master, and by the threat of eviction: dogs are prohibited in her apartment building. While others worry that grief has made her a victim of magical thinking, the woman refuses to be separated from the dog except for brief periods of time. Isolated from the rest of the world, increasingly obsessed with the dog's care, determined to read its mind and fathom its heart, she comes dangerously close to unraveling. But while troubles abound, rich and surprising rewards lie in store for both of them. Elegiac and searching, *The Friend* is both a meditation on loss and a celebration of human-canine devotion.

Management D. Bilimoria, 2007 This very impressive Handbook takes established research topics about women in management and treats them in fresh and novel ways. The chapters are intellectually interesting, sound, and provocative, and meet the editors aspiration to stimulate high quality research on women s experiences in work organizations. I recommend it highly. Jean M. Bartunek, Boston College, US This comprehensive Handbook presents specially commissioned original essays on the societal roles and contexts facing women in business and management, the specific career and work life issues of women in these fields, organizational processes affecting women, and the role of women as leaders in business and management. The essays shed light on the extant structures and practices of society and organizations that constrain or facilitate women s representation, treatment, quality of life, and success. Despite decades of ongoing inquiry and increasing interest, research on women in business and management remains a specialized field without mainstream acceptance within business and management disciplines. The Handbook presents the current state of knowledge about women in business and management and specifies the directions for future research likely to be most constructive for advancing the representation, treatment, quality of life, and success of women who work in these fields. It provides the foundations for improved societal and organizational structures, policies, and relational practices affecting all in business and management. Thus, by enhancing the knowledge base that improves the work and life situations of women, it suggests ways to elevate the societal and organizational systems for all. The Handbook will be an essential reference source for recent advances in research and theory, informing both scholars of organization studies, gender, diversity, and feminism; human resource specialists; and educators of and consultants to business organizations and management.

The Galatians had traded salvation by grace alone through faith alone for a gospel of works of Law. Paul has some seemingly harsh words for them, because to replace grace with anything else is to destroy the Gospel of Jesus Christ.

women business mentors living or dead: Mentored to Perfection Simone Dennis, Alison Behie, 2022-05-23 Mentored to Perfection: The Masculine Terms of Success in Academia examines how mentoring programs between women tend to replicate the hierarchical relations of patriarchy that they are meant to dismantle. Simone Dennis and Alison Behie argue that, while paradigmatic mentoring programs look like networking support services for neophytes, these mentorships nevertheless replicate the very institutional structures they seek to uproot. The generosity that senior women show to junior women as they share their tips and offer their support ironically obscures participants' involvement in debt relations and the biases of replicating a particular type of success. This book considers the possibilities for disrupting our tendency to reproduce ourselves in the masculine terms of success.
