Measuring the Success of Your Work Wellness Program

It's crucial to track the impact of your initiatives. Key metrics to monitor include:

Employee absenteeism and presenteeism: Track sick days and days when employees are present but unproductive.

Employee satisfaction and engagement: Conduct regular surveys to gauge employee morale and satisfaction.

Healthcare costs: Monitor changes in healthcare claims and utilization rates.

Productivity levels: Measure changes in output, efficiency, and project completion rates.

Conclusion

Implementing a robust work wellness program requires careful planning and a genuine commitment to employee wellbeing. However, the benefits far outweigh the investment. By prioritizing the health and happiness of your employees, you're not only creating a more positive work environment but also driving significant improvements in productivity, retention, and overall business success. Start small, build momentum, and watch your workplace transform into a thriving community of healthy and happy individuals. Remember to tailor your program to your specific workforce's needs and preferences for optimal impact.

work wellness program ideas: *The Wellness Syndrome* Carl Cederström, Andre Spicer, 2015-02-04 Not exercising as much as you should? Counting your calories in your sleep? Feeling ashamed for not being happier? You may be a victim of the wellness syndrome. In this ground-breaking new book, Carl Cederström and André Spicer argue that the ever-present pressure to maximize our wellness has started to work against us, making us feel worse and provoking us to withdraw into ourselves. The Wellness Syndrome follows health freaks who go to extremes to find the perfect diet, corporate athletes who start the day with a dance party, and the self-trackers who monitor everything, including their own toilet habits. This is a world where feeling good has become indistinguishable from being good. Visions of social change have been reduced to dreams of individual transformation, political debate has been replaced by insipid moralising, and scientific evidence has been traded for new-age delusions. A lively and humorous diagnosis of the cult of wellness, this book is an indispensable guide for everyone suspicious of our relentless quest to be happier and healthier.

work wellness program ideas: Building a Resilient Workforce Institute of Medicine, Board on Health Sciences Policy, Planning Committee on Workforce Resiliency Programs, 2012-07-18 Every job can lead to stress. How people cope with that stress can be influenced by many factors. The Department of Homeland Security (DHS) employs a diverse staff that includes emergency responders, border patrol agents, federal air marshals, and policy analysts. These employees may be exposed to traumatic situations and disturbing information as part of their jobs. DHS is concerned that long-term exposure to stressors may reduce individual resilience, negatively affect employees' well-being, and deteriorate the department's level of operation readiness. To explore DHS workforce resilience, the Institute of Medicine hosted two workshops in September and November 2011. The September workshop focused on DHS's operational and law enforcement personnel, while the November workshop concentrated on DHS policy and program personnel with top secret security clearances. The workshop brought together an array of experts from various fields including resilience research, occupation health psychology, and emergency response. Building a Resilient Workforce: Opportunities for the Department of Homeland Security: Workshop Summary: Defines workforce resilience and its benefits such as increased operational readiness and long-term cost savings for the specified population; Identifies work-related stressors faced by DHS workers, and gaps in current services and programs; Prioritizes key areas of concern; and Identifies innovative and effective worker resilience programs that could potentially serve as models for relevant components of the DHS workforce. The report presents highlights from more than 20 hours of presentations and discussions from the two workshops, as well as the agendas and a complete listing of the speakers, panelists, and planning committee members.

work wellness program ideas: *Corporate Stewardship* Susan Albers Mohrman, James O'Toole, Edward E. Lawler III, 2017-09-29 Stewardship entails a profound understanding and acceptance of the challenges that result from the organization's interdependence with the societal and ecological contexts in which it operates—and of what it takes to embrace the challenges to be a force for building a viable future. This book dares to ask 'why' business leaders should embrace stewardship in the current market where profit reigns supreme. A shift in approach represents fundamental change for the corporate world, and even the most advanced corporations consider themselves to be in the starting block of this transition. The book sets out the practical ways in which corporate stewardship can be achieved through embedding new approaches across the different functions of a business. This book, written by the leading thinkers in sustainability research, provides practical guidance on how companies can resolve the paradoxical challenges they face. How can they be at the same time profitable and responsible, effective and ethical, sustainable and adaptable? It explores what businesses are doing, what they can and should do to effectively respond to external challenges, and focuses on how leaders can create cultures, strategies, and designs far beyond "business as usual". Stewards must not only make proper current use of that which they hold in trust, they also must leave it in better condition for use by future generations. Corporate Stewardship challenges managers, executives, and directors of global corporations to think and act as stewards of both their organizations and the physical and social environments in which they operate.

work wellness program ideas: All In Josh Levs, 2015-05-12 When journalist Josh Levs was denied fair parental leave by his employer after his child was born, he fought back—and won. Since then, he's become an advocate for modern families and working fathers. In All In, he explores the changing face of fatherhood and what it means for our individual lives, families, workplaces, and society. Fatherhood today is far different from previous generations. Stay-at-home dads are increasingly common, and growing numbers of men are working part-time or flextime schedules to spend more time with their children. Even the traditional breadwinner-dad is being transformed. Dads today are more emotionally and physically involved on the home front. They are “all in” and—like mothers—they are struggling with work-life balance and doing it all. Journalist and “dad columnist” Josh Levs explains that despite these unprecedented changes, our laws, corporate policies, and gender-based expectations in the workplace remain rigid. They are preventing both women and men from living out the equality we believe in—and hurting businesses in the process. Women have done a great job of speaking out about this, Levs—whose fight for parental leave made front page news across the country—argues. It's now time for men to join in. Combining Levs' personal experiences with investigative reporting and frank conversations with fathers about everything from work life to money to sex, All In busts popular myths, lays out facts, uncovers the forces holding all of us back, and shows how we can all join together to change them.

The 1984 Grace Commission uncovered that the Department of Defense spent \$640 for a toilet seat and \$436 for a hammer. Twenty years later things weren't much better. In 2004, Congress spent a record-breaking \$22.9 billion dollars of your money on 10,656 of their pork-barrel projects. The war on terror has a lot to do with the record \$413 billion in deficit spending, but it's also the result of pork over the last 18 years the likes of: - \$50 million for an indoor rain forest in Iowa - \$102 million to study screwworms which were long ago eradicated from American soil - \$273,000 to combat goth culture in Missouri - \$2.2 million to renovate the North Pole (Lucky for Santa!) - \$50,000 for a tattoo removal program in California - \$1 million for ornamental fish research Funny in some instances and jaw-droppingly stupid and wasteful in others, The Pig Book proves one thing about Capitol Hill: pork is king!

work wellness program ideas: State of The Global Workplace Gallup, 2017-12-19 Only 15% of employees worldwide are engaged at work. This represents a major barrier to productivity for organizations everywhere – and suggests a staggering waste of human potential. Why is this engagement number so low? There are many reasons — but resistance to rapid change is a big one, Gallup's research and experience have discovered. In particular, organizations have been slow to adapt to breakneck changes produced by information technology, globalization of markets for products and labor, the rise of the gig economy, and younger workers' unique demands. Gallup's 2017 State of the Global Workplace offers analytics and advice for organizational leaders in countries and regions around the globe who are trying to manage amid this rapid change. Grounded in decades of Gallup research and consulting worldwide -- and millions of interviews -- the report advises that leaders improve productivity by becoming far more employee-centered; build strengths-based organizations to unleash workers' potential; and hire great managers to implement the positive change their organizations need not only to survive – but to thrive.

work wellness program ideas: How We Work Leah Weiss, PhD, 2018-03-13 “I have long thought that what the Buddha taught can be seen as a highly developed science of mind which, if made more accessible to a lay audience, could benefit many people. I believe that Dr. Weiss’s book, in combining such insights with science and good business practice, offers an effective mindfulness based program that many will find helpful.” --His Holiness, the Dalai Lama A practical guide to bringing our whole selves to our professional work, based on the author’s overwhelmingly popular course at the Stanford Graduate School of Business. In today’s workplace, the traditional boundaries between work and personal are neither realistic nor relevant. From millennials seeking employment in the sharing economy to Gen Xers telecommuting to Baby Boomers creating a meaningful second act, the line that separates who we are from the work we do is blurrier than ever. The truth is, we don’t show up for our jobs as a portion of ourselves—by necessity, we bring both our hearts and our minds to everything we do. In *How We Work*, mindfulness expert and creator of the perennially-waitlisted Stanford Business School course *Leading with Mindfulness and Compassion* Dr. Leah Weiss explains why this false dichotomy can be destructive to both our mental health and our professional success. The bad news, says Weiss, is that nothing provides more opportunities for negative emotions—anxiety, anger, envy, fear, and paranoia, to name a few—than the dynamics of the workplace. But the good news is that these feelings matter. How we feel at and about work matters—to ourselves, to the quality of our work, and ultimately to the success of the organizations for which we work. The path to productivity and success, says Weiss, is not to change jobs, to compartmentalize our feelings, or to create a false professional identity—but rather to listen to the wisdom our feelings offer. Using mindfulness techniques, we can learn how to attend to difficult feelings without becoming subsumed by them; we can develop an awareness of our bigger picture goals that orients us and allows us to see purpose in even the most menial tasks. In *How We Work*, Weiss offers a set of practical, evidence-based strategies for practicing mindfulness in the real world, showing readers not just how to survive another day, but how to use ancient wisdom traditions to sharpen their abilities, enhance their leadership and interpersonal skills, and improve their satisfaction.

work wellness program ideas: *The Zones of Regulation* Leah M. Kuypers, 2011 ... a curriculum geared toward helping students gain skills in consciously regulating their actions, which in turn leads to increased control and problem solving abilities. Using a cognitive behavior approach, the curriculum's learning activities are designed to help students recognize when they are in different states called zones, with each of four zones represented by a different color. In the activities, students also learn how to use strategies or tools to stay in a zone or move from one to another. Students explore calming techniques, cognitive strategies, and sensory supports so they will have a toolbox of methods to use to move between zones. To deepen students' understanding of how to self-regulate, the lessons set out to teach students these skills: how to read others' facial expressions and recognize a broader range of emotions, perspective about how others see and react to their behavior, insight into events that trigger their less regulated states, and when and how to use tools and problem solving skills. The curriculum's learning activities are presented in 18 lessons. To reinforce the concepts being taught, each lesson includes probing questions to discuss and instructions for one or more learning activities. Many lessons offer extension activities and ways to adapt the activity for individual student needs. The curriculum also includes worksheets, other handouts, and visuals to display and share. These can be photocopied from this book or printed from the accompanying CD.--Publisher's website.
