xpress wellness tulsa hills: *Food Safety Culture* Frank Yiannas, 2008-12-10 Food safety awareness is at an all time high, new and emerging threats to the food supply are being recognized, and consumers are eating more and more meals prepared outside of the home. Accordingly, retail and foodservice establishments, as well as food producers at all levels of the food production chain, have a growing responsibility to ensure that proper food safety and sanitation practices are followed, thereby, safeguarding the health of their guests and customers. Achieving food safety success in this changing environment requires going beyond traditional training, testing, and inspectional approaches to managing risks. It requires a better understanding of organizational culture and the human dimensions of food safety. To improve the food safety performance of a retail or foodservice establishment, an organization with thousands of employees, or a local community, you must change the way people do things. You must change their behavior. In fact, simply put, food safety equals behavior. When viewed from these lenses, one of the most common contributing causes of food borne disease is unsafe behavior (such as improper hand washing, cross-contamination, or undercooking food). Thus, to improve food safety, we need to better integrate food science with behavioral science and use a systems-based approach to managing food safety risk. The importance of organizational culture, human behavior, and systems thinking is well documented in the occupational safety and health fields. However, significant contributions to the scientific literature on these topics are noticeably absent in the field of food safety.

xpress wellness tulsa hills: *It's Life as I See it* Dan Nadel, 2021-06-01 Originally published by Chicago's Black press, long neglected by mainstream publishing, and now included in a Museum of Contemporary Art Chicago exhibition, these comics showcase some of the finest Black cartoonists. Between the 1940s and 1980s, Chicago's Black press—from The Chicago Defender to the Negro Digest to self-published pamphlets—was home to some of the best cartoonists in America. Kept out of the pages of white-owned newspapers, Black cartoonists found space to address the joys, the horrors, and the everyday realities of Black life in America. From Jay Jackson's anti-racist time travel adventure serial Bungleton Green, to Morrie Turner's radical mixed-race strip Dinky Fellas, to the Afrofuturist comics of Yaoundé Olu and Turtel Onli, to National Book Award-winning novelist Charles Johnson's blistering and deeply funny gag cartoons, this is work that has for far too long been excluded and overlooked. Also featuring the work of Tom Floyd, Seitu Hayden, Jackie Ormes, and Grass Green, this anthology accompanies the Museum of Contemporary Art Chicago's exhibition Chicago Comics: 1960 to Now, and is an essential addition to the history of American comics. The book's cover is designed by Kerry James Marshall. Published in conjunction with the Museum of Contemporary Art Chicago, on the occasion of Chicago Comics: 1960s to Now, June 19–October 3, 2021. Curated by Dan Nadel.

He was laser-focused—training like an Olympic hopeful to make his dream reality. Out of nowhere, his world changed. August 24, 2006, while coaching a summer camp basketball game, he slumped over, unresponsive, turning blue within minutes. He was 17, and had gone into cardiac arrest. With no AED on site, he was given a one in a million chance to survive. He was soon diagnosed with Hypertrophic Cardiomyopathy, or HCM, which, left undiagnosed and untreated, can lead to sudden cardiac arrest. At the time, he was crushed—processing the life-altering news he would never be able to play competitive basketball again. He quickly realized he was fortunate to be alive, and redefined his life's purpose. *A Big Heart* brings the reader on Mike's story of reinvention, hope, and survival. It is guaranteed to inspire readers to battle adversity and attack their dreams!

Exploring many aspects of Felix Mendelssohn's multi-faceted career as musician and how it intersects with his work as composer, contributors discuss practical issues of music making such as performance space, instruments, tempo markings, dynamics, phrasings, articulations, fingerings, and instrument techniques. They present the conceptual and ideological underpinnings of Mendelssohn's approach to performance, interpretation, and composing through the contextualization of specific performance events and through the theoretic actualization of performances of specific works. Contributors rely on manuscripts, marked or edited scores, and performance parts to convey a deeper understanding of musical expression in 19th-century Germany. This study of Mendelssohn's work as conductor, pianist, organist, violist, accompanist, music director, and editor of old and new music offers valuable perspectives on 19th-century performance practice issues.

xpress wellness tulsa hills: Foodborne Pathogens Joshua B. Gurtler, Michael P. Doyle, Jeffrey L. Kornacki, 2017-06-14 Foodborne illnesses continue to be a major public health concern. All members of a particular bacterial genera (e.g., Salmonella, Campylobacter) or species (e.g., Listeria monocytogenes, Cronobacter sakazakii) are often treated by public health and regulatory agencies as being equally pathogenic; however, this is not necessarily true and is an overly conservative approach to ensuring the safety of foods. Even within species, virulence factors vary to the point that some isolates may be highly virulent, whereas others may rarely, if ever, cause disease in humans. Hence, many food safety scientists have concluded that a more appropriate characterization of bacterial isolates for public health purposes could be by virotyping, i.e., typing food-associated bacteria on the basis of their virulence factors. The book is divided into two sections. Section I, "Foodborne Pathogens and Virulence Factors," hones in on specific virulence factors of foodborne pathogens and the role they play in regulatory requirements, recalls, and foodborne illness. The oft-held paradigm that all pathogenic strains are equally virulent is untrue. Thus, we will examine variability in virulence between strains such as Listeria, Salmonella, Campylobacter, Cronobacter, etc. This section also examines known factors capable of inducing greater virulence in foodborne pathogens. Section II, "Foodborne Pathogens, Host Susceptibility, and Infectious Dose" , covers the ability of a pathogen to invade a human host based on numerous extraneous factors relative to the host and the environment. Some of these factors include host age, immune status, genetic makeup, infectious dose, food composition and probiotics. Readers of this book will come away with a better understanding of foodborne bacterial pathogen virulence factors and pathogenicity, and host factors that predict the severity of disease in humans.

xpress wellness tulsa hills: *A Shot in the Dark* Harris Livermore Coulter, Barbara Loe Fisher, 1991-01-01 Every week, tens of thousands of children across America are injected with the DPT (diphtheria-pertussis-tetanus) vaccine. The law requires it, and most children will get four DPT shots before they are two years old. But what if one of the components of the vaccine was not safe? What if it caused not only pain, swelling, screaming, and high fever, but also shock, convulsions, brain damage, and even death? And, to make matters worse, what if there were a safer alternative but parents didn't know about it? Wouldn't the government require the drug manufacturers to produce the safer vaccine to protect the lives of the children who might otherwise suffer the shot's crippling side effects? The answer is, unfortunately, no. *A Shot in the Dark* is a chilling account of just how dangerous the whole-cell pertussis vaccine (the P part of the DPT shot) has proven to be. It provides accurate research into the history of the vaccine's development and usage. It exposes the roles played by the FDA and drug companies. It tells the tragic stories of the young victims of the vaccine. This book is also a guide for rightfully concerned parents who are looking for answers to important questions. What are the warning signs to look for to tell if your child is likely to be sensitive to the vaccine? What should parents ask their doctors about the vaccine and their child's medical profile? What is being done, here and in other countries, to combat this frightening situation? What can parents do now to help? *A Shot in the Dark* is a responsible, eye-opening look at a potential problem that every parent of every young child living in this country must face. Armed with the facts in this important book, parents will be able to make informed decisions about their real medical options. Book jacket.

xpress wellness tulsa hills: Report of a Workshop on the Scope and Nature of Computational Thinking National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Committee for the Workshops on Computational Thinking, 2010-04-20 Report of a Workshop on the Scope and Nature of

Computational Thinking presents a number of perspectives on the definition and applicability of computational thinking. For example, one idea expressed during the workshop is that computational thinking is a fundamental analytical skill that everyone can use to help solve problems, design systems, and understand human behavior, making it useful in a number of fields. Supporters of this viewpoint believe that computational thinking is comparable to the linguistic, mathematical and logical reasoning taught to all children. Various efforts have been made to introduce K-12 students to the most basic and essential computational concepts and college curricula have tried to provide a basis for life-long learning of increasingly new and advanced computational concepts and technologies. At both ends of this spectrum, however, most efforts have not focused on fundamental concepts. The book discusses what some of those fundamental concepts might be. Report of a Workshop on the Scope and Nature of Computational Thinking explores the idea that as the use of computational devices is becoming increasingly widespread, computational thinking skills should be promulgated more broadly. The book is an excellent resource for professionals in a wide range of fields including educators and scientists.

xpress wellness tulsa hills: Famous Father Girl Jamie Bernstein, 2018-06-12 The intimate memoir of Leonard Bernstein and his family, that helped inspire the new movie Maestro The oldest daughter of revered composer/conductor Leonard Bernstein offers a rare look at her father on the centennial of his birth in a deeply intimate and broadly evocative memoir The composer of On the Town and West Side Story, chief conductor of the New York Philharmonic, television star, humanitarian, friend of the powerful and influential, and the life of every party, Leonard Bernstein was an enormous celebrity during one of the headiest periods of American cultural life, as well as the most protean musician in twentieth century America. But to his eldest daughter, Jamie, he was above all the man in the scratchy brown bathrobe who smelled of cigarettes; the jokester and compulsive teacher who enthused about Beethoven and the Beatles; the insomniac whose 4 a.m. composing breaks involved spooning baby food out of the jar. He taught his daughter to love the world in all its beauty and complexity. In public and private, Lenny was larger than life. In Famous Father Girl, Bernstein mines the emotional depths of her childhood and invites us into her family's private world. A fantastic set of characters populates the Bernsteins' lives, including: the Kennedys, Mike Nichols, John Lennon, Richard Avedon, Stephen Sondheim, Jerome Robbins, and Betty (Lauren) Bacall. An intoxicating tale, Famous Father Girl is an intimate meditation on a complex and sometimes troubled man, the family he raised, and the music he composed that became the soundtrack to their entwined lives. Deeply moving and often hilarious, Bernstein's beautifully written memoir is a great American story about one of the greatest Americans of the modern age.
