xpress wellness urgent care duncan: Addressing Emerging Infectious Disease Threats, 1994 This plan addresses the need to improve our ability to identify infectious disease threats and respond to them effectively by improving the public health infrastructure at the local, state and federal levels. The goals of the plan are surveillance (detect, promptly investigate, and monitor emerging pathogens, the diseases they cause, and the factors influencing their emergence); applied research (integrate laboratory science and epidemiology to optimize public health practice); prevention and control (enhance communication of public health information about emerging diseases and ensure prompt implementation of prevention strategies); and infrastructure (strengthen local, state, and federal public health infrastructures to support surveillance and implement prevention and control programs).

xpress wellness urgent care duncan: Toxic Communities Dorceta E. Taylor, 2014 From St. Louis to New Orleans, from Baltimore to Oklahoma City, there are poor and minority neighborhoods so beset by pollution that just living in them can be hazardous to your health. Due to entrenched segregation, zoning ordinances that privilege wealthier communities, or because businesses have found the OCypaths of least resistance, OCO there are many hazardous waste and toxic facilities in these communities, leading residents to experience health and wellness problems on top of the race and class discrimination most already experience. Taking stock of the recent environmental justice scholarship, a Toxic Communities aexamines the connections among residential segregation, zoning, and exposure to environmental hazards. Renowned environmental sociologist Dorceta Taylor focuses on the locations of hazardous facilities in low-income and minority communities and shows how they have been dumped on, contaminated and exposed. Drawing on an array of historical and contemporary case studies from across the country, Taylor explores controversies over racially-motivated decisions in zoning laws, eminent domain, government regulation (or lack thereof), and urban renewal. She provides a comprehensive overview of the debate over whether or not there is a link between environmental transgressions and discrimination, drawing a clear picture of the state of the environmental justice field today and where it is going. In doing so, she introduces new concepts and theories for understanding environmental racism that will be essential for environmental justice scholars. A fascinating landmark study, a Toxic Communities agreatly contributes to the study of race, the environment, and space in the contemporary United States.

xpress wellness urgent care duncan: The Role of Telehealth in an Evolving Health Care Environment Institute of Medicine, Board on Health Care Services, 2012-12-20 In 1996, the Institute of Medicine (IOM) released its report Telemedicine: A Guide to Assessing Telecommunications for Health Care. In that report, the IOM Committee on Evaluating Clinical Applications of Telemedicine found telemedicine is similar in most respects to other technologies for which better evidence of effectiveness is also being demanded. Telemedicine, however, has some special characteristics-shared with information technologies generally-that warrant particular notice from evaluators and decision makers. Since that time, attention to telehealth has continued to grow in both the public and private sectors. Peer-reviewed journals and professional societies are devoted to telehealth, the federal government provides grant funding to promote the use of telehealth, and the private technology industry continues to develop new applications for telehealth. However,

barriers remain to the use of telehealth modalities, including issues related to reimbursement, licensure, workforce, and costs. Also, some areas of telehealth have developed a stronger evidence base than others. The Health Resources and Service Administration (HRSA) sponsored the IOM in holding a workshop in Washington, DC, on August 8-9 2012, to examine how the use of telehealth technology can fit into the U.S. health care system. HRSA asked the IOM to focus on the potential for telehealth to serve geographically isolated individuals and extend the reach of scarce resources while also emphasizing the quality and value in the delivery of health care services. This workshop summary discusses the evolution of telehealth since 1996, including the increasing role of the private sector, policies that have promoted or delayed the use of telehealth, and consumer acceptance of telehealth. *The Role of Telehealth in an Evolving Health Care Environment: Workshop Summary* discusses the current evidence base for telehealth, including available data and gaps in data; discuss how technological developments, including mobile telehealth, electronic intensive care units, remote monitoring, social networking, and wearable devices, in conjunction with the push for electronic health records, is changing the delivery of health care in rural and urban environments. This report also summarizes actions that the U.S. Department of Health and Human Services (HHS) can undertake to further the use of telehealth to improve health care outcomes while controlling costs in the current health care environment.

xpress wellness urgent care duncan: Preparing for the Future of Artificial Intelligence Committee on Technology National Science and Technology Council, Committee on Technology, 2016-10-30 Advances in Artificial Intelligence (AI) technology have opened up new markets and new opportunities for progress in critical areas such as health, education, energy, and the environment. In recent years, machines have surpassed humans in the performance of certain specific tasks, such as some aspects of image recognition. Experts forecast that rapid progress in the field of specialized artificial intelligence will continue. Although it is very unlikely that machines will exhibit broadly-applicable intelligence comparable to or exceeding that of humans in the next 20 years, it is to be expected that machines will reach and exceed human performance on more and more tasks. As a contribution toward preparing the United States for a future in which AI plays a growing role, this report surveys the current state of AI, its existing and potential applications, and the questions that are raised for society and public policy by progress in AI. The report also makes recommendations for specific further actions by Federal agencies and other actors.

xpress wellness urgent care duncan: An Education in Georgia Calvin Trillin, 2021-01-15 In January 1961, following eighteen months of litigation that culminated in a federal court order, Hamilton Holmes and Charlayne Hunter became the first black students to enter the University of Georgia. Calvin Trillin, then a reporter for Time Magazine, attended the court fight that led to the admission of Holmes and Hunter and covered their first week at the university—a week that began in relative calm, moved on to a riot and the suspension of the two students for their own safety, and ended with both returning to the campus under a new court order. Shortly before their graduation in 1963, Trillin came back to Georgia to determine what their college lives had been like. He interviewed not only Holmes and Hunter but also their families, friends, and fellow students, professors, and university administrators. The result was this book—a sharply detailed portrait of how these two young people faced coldness, hostility, and occasional understanding on a southern campus in the midst of a great social change.

xpress wellness urgent care duncan: *Chesley's Hypertensive Disorders in Pregnancy* Robert N. Taylor, James M. Roberts, Gary F. Cunningham, Marshall D. Lindheimer, 2014-08-28 Chesley's Hypertensive Disorders in Pregnancy continues its tradition as one of the beacons to guide the field of preeclampsia research, recognized for its uniqueness and utility. Hypertensive disorders remain one the major causes of maternal and fetal morbidity and death. It is also a leading cause of preterm birth now known to be a risk factor in remote cardiovascular disease. Despite this the hypertensive

disorders remain marginally studied and management is often controversial. The fourth edition of Chesley's *Hypertensive Disorders in Pregnancy* focuses on prediction, prevention, and management for clinicians, and is an essential reference text for clinical and basic investigators alike. Differing from other texts devoted to preeclampsia, it covers the whole gamut of high blood pressure, and not just preeclampsia. - Features new chapters focusing on recent discoveries in areas such as fetal programming, genomics/proteomics, and angiogenesis - Includes extensive updates to chapters on epidemiology, etiological considerations, pathophysiology, prediction, prevention, and management - Discusses the emerging roles of metabolic syndrome and obesity and the increasing incidence of preeclampsia - Each section overseen by one of the editors; each chapter co-authored by one of the editors, ensuring coherence throughout book

Supplemented with many useful figures and presented in a helpful bullet-point format, *Molecular Genetic Pathology, Second Edition* provides a unique reference for practicing pathologists, oncologists, internists, and medical geneticists. Furthermore, a book with concise overview of the field and highlights of clinical applications will certainly help those trainees, including pathology residents, genetics residents, molecular pathology fellows, internists, hematology/oncology fellows, and medical technologists in preparing for their board examination/certification.

xpress wellness urgent care duncan: **The Quiet Trailblazer** Mary Frances Early, 2021-09-15 *The Quiet Trailblazer* recounts Mary Frances Early's life from her childhood in Atlanta, her growing interest in music, and her awakening to the injustices of racism in the Jim Crow South. Early carefully maps the road to her 1961 decision to apply to the master's program in music education at the University of Georgia, becoming one of only three African American students. With this personal

journey we are privy to her prolonged and difficult admission process; her experiences both troubling and hopeful while on the Athens campus; and her historic graduation in 1962. Early shares fascinating new details of her regular conversations with civil rights icon Dr. Martin Luther King Jr. at Ebenezer Baptist Church in Atlanta. She also recounts her forty-eight years as a music educator in the state of Georgia, the Southeast, and at the national level. She continued to blaze trails within the field and across professional associations. After Early earned her master's and specialist's degrees, she became an acclaimed Atlanta music educator, teaching music at segregated schools and later being promoted to music director of the entire school system. In 1981 Early became the first African American elected president of the Georgia Music Educators Association. After she retired from working in public schools in 1994, Early taught at Morehouse College and Spelman College and served as chair of the music department at Clark Atlanta University. Early details her welcome reconciliation with UGA, which had failed for decades to publicly recognize its first Black graduate. In 2018 she received the President's Medal, and her portrait is one of only two women's to hang in the Administration Building. Most recently, Early was honored by the naming of the College of Education in her honor.

xpress wellness urgent care duncan: A Big Heart Mike Papale , 2021-09-01 As a teen, Mike Papale had one dream: to play college basketball. He was laser-focused—training like an Olympic hopeful to make his dream reality. Out of nowhere, his world changed. August 24, 2006, while coaching a summer camp basketball game, he slumped over, unresponsive, turning blue within minutes. He was 17, and had gone into cardiac arrest. With no AED on site, he was given a one in a million chance to survive. He was soon diagnosed with Hypertrophic Cardiomyopathy, or HCM, which, left undiagnosed and untreated, can lead to sudden cardiac arrest. At the time, he was crushed—processing the life-altering news he would never be able to play competitive basketball again. He quickly realized he was fortunate to be alive, and redefined his life's purpose. *A Big Heart* brings the reader on Mike's story of reinvention, hope, and survival. It is guaranteed to inspire readers to battle adversity and attack their dreams!

xpress wellness urgent care duncan: Home Blood Pressure Monitoring George S. Stergiou, Gianfranco Parati, Giuseppe Mancia, 2019-10-31 Hypertension remains a leading cause of disability and death worldwide. Self-monitoring of blood pressure by patients at home is currently recommended as a valuable tool for the diagnosis and management of hypertension. Unfortunately, in clinical practice, home blood pressure monitoring is often inadequately implemented, mostly due to the use of inaccurate devices and inappropriate methodologies. Thus, the potential of the method to improve the management of hypertension and cardiovascular disease prevention has not yet been exhausted. This volume presents the available evidence on home blood pressure monitoring, discusses its strengths and limitations, and presents strategies for its optimal implementation in clinical practice. Written by distinguished international experts, it offers a complete source of information and guide for practitioners and researchers dealing with the management of hypertension.

Practice (DNP) text to fully integrate all eight American Association of Colleges of Nursing DNP competencies into one volume. It defines practice scholarship for the DNP role and facilitates the sound development of key leadership skills that enable DNP graduates to effectively influence politics and health care policy in order to improve patient and population health care outcomes. The text focuses on the educational requirements of DNPs engaged in the arenas of leadership, health care policy, and information technology. It covers the growth and development of the DNP role, particularly in the context of contemporary health care challenges. With a focus on the Capstone Project, the text addresses the relationship of the DNP role to ongoing scholarship. It covers three important essentials of the DNP curriculum—evidence-based practice, health information technology, and outcomes measurement—and how they can be used to transform health care in the 21st century. The text's challenging and thought-provoking content is of particular value not only to students, but also to professors who will welcome the clarity it offers to the highly complex DNP curriculum. Key Features: Simplifies the highly complex DNP curriculum and integrates DNP core competencies throughout Demonstrates the application of core competencies to practice and aggregate care Provides a well-organized supplement to all courses across the DNP curriculum Uses exemplars of students and practicing DNPs to illustrate effective implementation Offers concrete guidance for achieving a thorough understanding of how DNP graduates utilize core competencies

express wellness urgent care duncan: *The End of Normal* James K. Galbraith, 2014-09-09 From one of the most respected economic thinkers and writers of our time, a brilliant argument about the history and future of economic growth. The years since the Great Crisis of 2008 have seen slow growth, high unemployment, falling home values, chronic deficits, a deepening disaster in Europe—and a stale argument between two false solutions, “austerity” on one side and “stimulus” on the other. Both sides and practically all analyses of the crisis so far take for granted that the economic growth from the early 1950s until 2000—interrupted only by the troubled 1970s—represented a normal performance. From this perspective, the crisis was an interruption, caused by bad policy or bad people, and full recovery is to be expected if the cause is corrected. The End of Normal challenges this view. Placing the crisis in perspective, Galbraith argues that the 1970s already ended the age of easy growth. The 1980s and 1990s saw only uneven growth, with rising inequality within and between countries. And the 2000s saw the end even of that—despite frantic efforts to keep growth going with tax cuts, war spending, and financial deregulation. When the crisis finally came, stimulus and automatic stabilization were able to place a floor under economic collapse. But they are not able to bring about a return to high growth and full employment. In *The End of Normal*, “Galbraith puts his pessimism into an engaging, plausible frame. His contentions deserve the attention of all economists and serious financial minds across the political spectrum” (Publishers Weekly, starred review).

express wellness urgent care duncan: *Screening Men for Osteoporosis* U. S. Department of Veterans Affairs, Health Services Research & Development Service, 2013-06-18 Although the Surgeon General's recent report on osteoporosis stated that, “Strong bones (are) essential to overall health and quality of life,” it warned that, “The bone health status of Americans... is in jeopardy.” Traditionally, osteoporosis was viewed as a disease of women, but it has become clear that osteoporotic fractures result in substantial morbidity, mortality, and costs in men. A 60-year old man has a 25% lifetime risk of sustaining an osteoporotic fracture. The consequences of this fracture can be severe as the one-year mortality rate in men after hip fracture is twice that of women. With the aging of the population, rates of osteoporosis in men are expected to increase nearly 50% in the next 15 years and hip fractures rates are projected to double or triple by 2040. Furthermore, annual U.S. direct medical costs for osteoporosis exceed \$17 billion and are expected to increase rapidly with an aging population. The percentage of costs directly attributable to men or veterans is unclear, although 25% of hip fractures, the fracture type associated with greatest costs due to hospitalization and long-term care, occur in men. This large and growing clinical and cost burden, combined with an environment of increasingly limited health care resources, strongly underlies the need to develop rational, evidence-based osteoporosis management strategies to obtain maximum benefit for every

health care dollar spent. Despite the substantial advances in our understanding of osteoporosis over the last decade, there are no consensus guidelines on the assessment and management of male osteoporosis. Although osteoporosis management strategies have been evaluated in women, much less work has been done in this area in men. Lack of research in this area has led to considerable uncertainty regarding optimal osteoporosis strategies in men and Veterans. The VA Office of Quality and Performance and the U.S. Preventive Services Task Force offer no clinical practice guidelines on the management of osteoporosis in men. This review is being performed as part of the Evidence Synthesis Project, an HSR&D-organized initiative to provide VA policymakers with high quality evidence reviews. The purpose of this review is to analyze the literature in order to answer three key questions: 1) What is the epidemiology and what are the key risk factors for male osteoporosis?; 2) Are there any validated screening tools for osteoporosis in men (beyond DXA-assessed central bone density)?; and 3) What is the evidence regarding bone mineral density and fracture risk? Although 25% of men over the age of 60 will sustain osteoporotic fractures during their lifetime, data suggest that male osteoporosis is underdiagnosed and undertreated. In order to help inform decisions about whether the Veterans Health Administration should develop screening guidelines for male osteoporosis, summaries of what is known about 1) the epidemiology of male osteoporosis, and 2) the validity of tools to screen and diagnose male osteoporosis are needed. The Key Questions were: Key Question 1. What are the prevalence of and risk factors for osteopenia, osteoporosis and osteoporotic fractures among men in general and among male Veterans specifically? Key Question 2. Are there any validated tools (outside of central bone density) to screen for osteoporosis in men? Key Question 3. What values of BMD determined by Dual energy X-ray Absorptiometry (DXA) (and by different DXA techniques) have been used to diagnose osteopenia and osteoporosis; and what is the evidence regarding the relationship between differing definitions and the development of osteoporotic fractures?

xpress wellness urgent care duncan: What is Critical Environmental Justice? David Naguib Pellow, 2017-11-27 Human societies have always been deeply interconnected with our ecosystems, but today those relationships are witnessing greater frictions, tensions, and harms than ever before. These harms mirror those experienced by marginalized groups across the planet. In this novel book, David Naguib Pellow introduces a new framework for critically analyzing Environmental Justice scholarship and activism. In doing so he extends the field's focus to topics not usually associated with environmental justice, including the Israel/Palestine conflict and the Black Lives Matter movement in the United States. In doing so he reveals that ecological violence is first and foremost a form of social violence, driven by and legitimated by social structures and discourses. Those already familiar with the discipline will find themselves invited to think about the subject in a new way. This book will be a vital resource for students, scholars, and policy makers interested in transformative approaches to one of the greatest challenges facing humanity and the planet.
