xpress wellness urgent care enid ok: *Kumba Africa* Sampson Ejike Odum, 2020-11-03 'KUMBA AFRICA', is a compilation of African Short Stories written as fiction by Sampson Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New Yam

festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven't tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.

An Adventure Through the Global Food Economy Kelsey Timmerman, 2013-04-08 Bridges the gap between global farmers and fishermen and American consumers America now imports twice as much food as it did a decade ago. What does this increased reliance on imported food mean for the people around the globe who produce our food? Kelsey Timmerman set out on a global quest to meet the farmers and fisherman who grow and catch our food, and also worked alongside them: loading lobster boats in Nicaragua, splitting cocoa beans with a machete in Ivory Coast, and hauling tomatoes in Ohio. *Where Am I Eating?* tells fascinating stories of the farmers and fishermen around the world who produce the food we eat, explaining what their lives are like and how our habits affect them. This book shows how what we eat affects the lives of the people who produce our food. Through compelling stories, explores the global food economy including workers rights, the global food crisis, fair trade, and immigration. Author Kelsey Timmerman has spoken at close to 100 schools around the globe about his first book, *Where Am I Wearing: A Global Tour of the Countries, Factories, and People That Make Our Clothes* He has been featured in the Financial Times and has discussed social issues on NPR's Talk of the Nation and Fox News Radio *Where Am I Eating?* does not argue for or against the globalization of food, but personalizes it by observing the hope and opportunity, and sometimes the lack thereof, which the global food economy gives to the world's poorest producers.

xpress wellness urgent care enid ok: *Yvain* Chretien de Troyes, 1987-09-10 The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, *Yvain*, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. *Yvain* is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.

An explorer at heart, he dreams of life on Waybell, their remote cattle station in Australia's last remaining wilderness, the Northern Territory. Then his brother Alastair is branded a deserter after going missing during the Great War. To help restore the Grants' damaged reputation, Ross is coerced into marrying Darcey Thomas, a woman he has never met. Disgusted by his manipulative family, he turns his back on his unwanted wife just hours after the ceremony, and heads to Waybell with no plans to return. He carries with him the hope of carving his own empire in the far north. But Ross has not counted on Darcey's determination to be his wife in more than just name. Nor did he anticipate meeting Maria, a young, part-Chinese woman who will capture his heart. And he certainly wasn't prepared for how this beautiful yet savage land will both captivate and destroy his soul . . . From nineteenth-century Adelaide and the red dirt of mid-north South Australia, to the cattle stations and buffalo plains of the far north Ross's journey is one of anger and desire, adventure and determination, to the heart of stone country and beyond.

xpress wellness urgent care enid ok: **Japan Restored** Clyde Prestowitz, 2015-11-10 In Japan Restored, New York Times bestselling author Clyde Prestowitz envisions post-bubble Japan in the year 2050, when the country's economic prosperity will have made it a world leader in every area. In 1979, the book Japan as Number One: Lessons for America by Harvard University professor Ezra Vogel caused a sensation in the United States by pointing out that Japan was surpassing America as world economic leader; to this day, it remains the all-time bestselling non-fiction book by a Western author in Japan. The book was timely: Japan's subsequent bubble era of the 1980s saw the country booming. But since the economic bubble burst at the start of the 1990s, Japan has been in decline. Japan Restored takes up where Vogel left off. Written as a vision of Japan in the year 2050, Prestowitz looks back to the mid-2010s as such a low point for Japan that a special reform commission was set up that helped the country regain its former position as a leader in technology, in business, and geopolitically. Looking at education, innovation, the role of women, corporate organization, energy, infrastructure, domestic government, and international alliances, Prestowitz draws up a fascinating and controversial blueprint for the future success of Japan. In wake of the 2021 Olympics in Tokyo and the economic chaos caused by the Covid-19 pandemic, Japan Restored is as timely as the 1979 book that inspired it.

Henning, Zack Walsh, 2020-02-25 This book examines from different perspectives the moral significance of non-human members of the biotic community and their omission from climate ethics literature. The complexity of life in an age of rapid climate change demands the development of moral frameworks that recognize and respect the dignity and agency of both human and non-human organisms. Despite decades of careful work in non-anthropocentric approaches to environmental ethics, recent anthologies on climate ethics have largely omitted non-anthropocentric approaches. This multidisciplinary volume of international scholars tackles this lacuna by presenting novel work on non-anthropocentric approaches to climate ethics. Written in an accessible style, the text incorporates sentiocentric, biocentric, and ecocentric perspectives on climate change. With diverse perspectives from both leading and emerging scholars of environmental ethics, geography, religious studies, conservation ecology, and environmental studies, this book will offer a valuable reading for students and scholars of these fields.
