Is breakfast really the most important meal of the day? Is there any point in counting calories? Is there any evidence that coffee is bad for us? Through his pioneering research, Professor Tim Spector busts these and many other myths about food. Spoon-Fed explores the scandalous lack of good science behind many diet plans, official recommendations, miracle cures and ultra-processed foods, and encourages us to rethink our whole relationship with food - not just for our health as individuals, but for the future of the planet. zoie uk wellness company: The Diet Myth Tim Spector, 2015-05-14 Fully updated throughout and with a new foreword for this edition. Why do most diets fail? Why does one person eat a certain meal and gain weight, while another eating the same meal loses pounds? Why, despite all the advice about what to eat, are we all still getting fatter? The answers are much more surprising - and fascinating - than we've been led to believe. The key to health and weight loss lies not in the latest fad diet, nor even in the simple mantra of 'eat less, exercise more', but in the microbes already inside us. Drawing on the latest science and his own pioneering research, Professor Tim Spector demystifies the common misconceptions about fat, calories, vitamins and nutrients. Only by understanding what makes our own personal microbes tick can we overcome the confusion of modern nutrition, and achieve a healthy gut and a healthy body.

zoie uk wellness company: The Compassionate Equestrian Allen Schoen, Susan Gordon, 2015-08-17 This marvelous book, borne of a unique collaboration between Dr. Allen Schoen—a world-renowned veterinarian and author—and trainer and competitor of many years Susan Gordon, introduces the 25 Principles of Compassionate Equitation. These Principles, conceived by Dr. Schoen and Gordon, are a set of developmental guidelines, encouraging a level of personal awareness that may be enacted not only through the reader's engagement with horses, but can be extended to all

humans and sentient beings he or she encounters. The 25 Principles share stories and outline current, peer-reviewed studies that identify and support methods of training, handling, and caring for horses that constitute a safe, healthy, non-stressful, and pain-free environment. Through their Compassionate Equestrian program, the authors encourage all involved in the horse industry to approach training and handling with compassion and a willingness to alleviate suffering. By developing deeper compassion for their own horses, and subsequently, all equines, equestrians transcend their differences in breed preferences, riding disciplines, and training methodologies. This leads to the ability to empathize and connect more closely with the "global collective" of horses and horse people. In doing so, a worldwide community of compassionate equine practitioners and horse owners will emerge, which will not only benefit the horses: People involved with horses are found in many influential segments of society and have the potential to affect wide circles of friends, acquaintances, and co-workers from every walk of life. These are simple changes any horse person can make that can have a vast impact on the horse industry and society as a whole.

zoie uk wellness company: From Daughter to Woman Kim McCabe, 2018-07-18 'A refreshingly healthy take on social media and particularly good on body image' Lorraine Candy, Sunday Times The teen years are tough - for teens and for parents. Many parents dread the moodiness, dishonesty, preference of friends over family, exam stress, and the push for greater independence. Mothers have a pivotal role to play; this is a guidebook for parents and mothers of girls in particular as they navigate the rocky teenage landscape with their daughters aged 8 to 18. It aims to help them embrace the potential of their child's teenage years by marking this time of growing maturity for girls and celebrating it with them. We celebrate birth, marriage and death, but this important life-transition from child to young adult is nowadays rarely acknowledged within an appropriate community. With mental health issues in young people on the rise, and social media, reality television and smartphone culture serving to exacerbate these problems, it is no surprise that parents are looking for help in raising their daughters through these tricky years. From Daughter to

Woman is the indispensable guide to doing just that.

zoie uk wellness company: *Damaged Identities, Narrative Repair* Hilde Lindemann, 2001
Hilde Lindemann Nelson focuses on the stories of groups of people--including Gypsies, mothers, nurses, and transsexuals--whose identities have been defined by those with the power to speak for them and to constrain the scope of their actions. By placing their stories side by side with narratives about the groups in question, Nelson arrives at some important insights regarding the nature of identity. She regards personal identity as consisting not only of how people view themselves but also of how others view them. These perceptions combine to shape the person's field of action. If a dominant group constructs the identities of certain people through socially shared narratives that mark them as morally subnormal, those who bear the damaged identity cannot exercise their moral agency freely. Nelson identifies two kinds of damage inflicted on identities by abusive group relations: one kind deprives individuals of important social goods, and the other deprives them of self-respect. To intervene in the production of either kind of damage, Nelson develops the counterstory, a strategy of resistance that allows the identity to be narratively repaired and so restores the person to full membership in the social and moral community. By attending to the power dynamics that constrict agency, *Damaged Identities, Narrative Repair* augments the narrative approaches of ethicists such as Alasdair MacIntyre, Martha Nussbaum, Richard Rorty, and Charles Taylor.

zoie uk wellness company: *Africa regional overview of food security and nutrition 2020*
Food and Agriculture Organization of the United Nations, United Nations Economic Commission for Africa, African Union Commission, 2021-06-29 Africa is not on track to meeting the Sustainable Development Goal (SDG) 2 targets to end hunger and ensure access by all people to safe, nutritious and sufficient food all year round and to end all forms of malnutrition. The number of hungry people on the continent has risen by 47.9 million since 2014 and now stands at 250.3 million, or nearly one-fifth of the population. The 2017, 2018 and 2019 editions of this report explain that this gradual deterioration of food security was due to conflict, weather extremes, and economic slowdowns and downturns, often overlapping. A continued worsening of food security is expected also for 2020 as a result of the COVID-19 pandemic. In addition to hunger, across all countries in Africa millions of people suffer from widespread micronutrient deficiencies, and overweight and obesity are emerging as significant health concerns in many countries. This report shows that the food system in Africa does not provide food at a cost that makes nutritious food affordable to a majority of the population, and this is reflected in the high disease burden associated with maternal and child malnutrition, high body-mass, micronutrient deficiencies and dietary risk factors. The report also shows that current food consumption patterns impose high health and environmental costs, which are not reflected in food prices. The findings presented in this report highlight the importance of prioritizing the transformation of food systems to ensure access to affordable and healthy diets for all, produced in a sustainable manner.

The spirit, who quickly became known as 'Donald', began to communicate, initially via tapping sounds, but over time - and with the encouragement of psychical researcher Harold Chibbett, whose case-files appear here - by learning to write. Soon, the spirit had begun to make simply incredible claims about his identity, insisting that he was one of the most famous figures in world history - but what was the truth? zoie uk wellness company: Darjeeling Reconsidered Townsend Middleton, Sara Shneiderman, 2018-04-26 Darjeeling occupies a special place in the South Asian imaginary with its Himalayan vistas, lush tea gardens, and brisk mountain air. Thousands of tourists, domestic and international, annually flock to the hills to taste their world-renowned tea and soak up the colonial nostalgia. *Darjeeling Reconsidered* rethinks Darjeeling's status in the postcolonial imagination. Mobilizing diverse disciplinary approaches from the social sciences and humanities, this definitive collection of essays sheds fresh light on the region's past and offers critical insight into the issues facing its people today. While the historical analyses provide alternative readings of the systems of governance, labour, and migration that shaped Darjeeling, the ethnographic chapters present accounts of dynamics that define life in twenty-first century Darjeeling, including the Gorkhaland Movement, Fair Trade tea, indigenous and subnationalist struggle, gendered inequality, ecological transformation, and resource scarcity. The volume figures Darjeeling as a vital site for South Asian and postcolonial studies and calls for a timely reexamination of the legend and hard realities of this oft-romanticized region.
