The implementation of diversity policies and practices and the creation of an organizational culture that values

heterogeneity have been the focus of recent organizational initiatives. This special issue aims at shedding light on some of open research questions by including both theoretical and empirical contributions.

This new report--which includes data on earnings, employment rates, graduate school earnings bumps, and commonly chosen professions--presents clear evidence to the contrary. It shows not only that the college degree remains a sound investment, especially in these difficult economic times, but also that --as compared to students who major in professional, preprofessional, or STEM fields--liberal arts majors fare very well in terms of both earnings and long-term success.

associate of arts in business administration: How To Become A Life Coach, How To Be Highly Successful As A Life Coach, And How To Earn Revenue As A Life Coach Dr. Harrison Sachs, 2019-12-15 This essay sheds light on how to become a life coach, explicates how to be highly successful as a life coach, and elucidates how to earn revenue as a life coach. While becoming a life coach may seem be an eminently cumbersome, expensive, time-consuming, and daunting undertaking, it is viably possible to become a life coach. Much to the relief of prospective life coaches, it is possible to become a life coach in a time span of less than half of a decade and the journey to become a life coach is not as lengthy as the journey to pursue certain other occupations, such as the occupations of a medical doctor or attorney. The pathway that a prospective life coach can follow to become a life coach is fraught with challenges that are not a cinch to surmount. It can be arduous to fulfill the duties of a life coach. Life coach skills are highly desirable skills to possess. As of December of 2019, only an infinitesimal fraction of one percent of the global population are employed as life coaches. In the US, for instance, less than 43,000 work as life coaches even though the US population is comprised of over 328,000,000 people as of December of 2019. As of December of 2019, less than .0013% of people in the US work as life coaches. This means that out of 7,628 random people in the US, about only one person at most works as a life coach as of December of 2019. As of December of 2019, it was estimated that there were more medical doctors and attorneys in the US than life coaches even though it takes far more years to fulfill the ample mandatory requirements to become a medical doctor or attorney than it takes to fulfill the mandatory requirements to become a life coach. As of December of 2019, there are no mandatory requirements that need to be fulfilled for a person to become a life coach. As of December of 2019, the economy is unequivocally in dire need of more life coaches, especially since there are a multitude of ways in which most people can ameliorate their lives. Life coaches can help their clients to rectify issues that are transpiring in their lives. Life coaches can help their clients to remedy rectifiable career issues, rectifiable interpersonal relationship issues, rectifiable academic issues, and rectifiable wellness issues. A person can ameliorate his quality of life if it is devoid of career issues, interpersonal relationship issues, academic issues, and wellness issues. Life coaches can provide guidance on the measures to implement so that their clients can resolve rectifiable issues in their lives. Life coaches can also provide guidance on the disparate measures to implement that are conducive to attaining career success so that their clients are all the more aptly primed to have lucrative careers. Life coaches can also provide guidance on the disparate measures to implement that are conducive to bolstering interpersonal relationships so that the interpersonal relationships of their clients are inapt to become tenuous interpersonal relationships shortly after being formed. Life coaches can also provide guidance on the disparate measures to implement that are conducive to significantly boosting a person's well-being so that their clients are all the more apt to experience jubilation. When people are able to experience unalloyed euphoria, then they become less prone to profusely brooding over unresolved issues that they are encountering in their lives. People should strive to

metaphorically thrust their lives into an upward trajectory. Life coaches can also help their clients to reach their short-term objectives and attain their overarching goals. People should aim to self-improve themselves and actualize their latent potential. People should aim to become highly knowledgeable, highly competent, and highly adept industry experts in their niche field of expertise. Life coaches can help their clients to achieve their higher aspirations. It is less cumbersome for a person to achieve his higher aspirations in his lifetime if he has attained profound career success to the extent to which it has culminated in him earning enough fiat currency amid his working years to be able to afford to attempt to achieve his higher aspirations which can be eminently expensive to be pursuant of. Life coaches can help their clients to make inroads towards improving multiple facets of their lives. A person's life does not need to be characterized by stagnation since a person is at liberty to attempt to improve multiple aspects of life if he chooses to do so.
