Understanding the Aura Chiropractic & Family Wellness Philosophy

At Aura Chiropractic & Family Wellness, we go beyond simply treating back pain or headaches. We believe in a holistic, patient-centered approach that considers your overall lifestyle, environment, and individual needs. Our philosophy centers around the idea that your body possesses an innate ability to heal itself, and our role is to remove the interference that prevents this natural healing process. This interference can manifest in many ways, from spinal misalignments (subluxations) to stress, poor nutrition, and lack of physical activity.

We use gentle, effective chiropractic adjustments to restore proper spinal alignment, reducing pain and improving nerve function. This, in turn, allows your body to function optimally, boosting your immune system, improving energy levels, and promoting overall wellness. We also integrate other complementary therapies to provide a truly comprehensive approach to health.

aura chiropractic family wellness: Complementary and Alternative Medicine in the United States Institute of Medicine, Board on Health Promotion and Disease Prevention, Committee on the Use of Complementary and Alternative Medicine by the American Public, 2005-04-13 Integration of complementary and alternative medicine therapies (CAM) with conventional medicine is occurring in hospitals and physicians offices, health maintenance organizations (HMOs) are covering CAM therapies, insurance coverage for CAM is increasing, and integrative medicine centers and clinics are being established, many with close ties to medical schools and teaching hospitals. In determining what care to provide, the goal should be comprehensive care that uses the best scientific evidence available regarding benefits and harm, encourages a focus on healing, recognizes the importance of compassion and caring, emphasizes the centrality of relationship-based care, encourages patients to share in decision making about therapeutic options, and promotes choices in care that can include complementary therapies where appropriate. Numerous approaches to delivering integrative medicine have evolved. Complementary and Alternative Medicine in the United States identifies an urgent need for health systems research that focuses on identifying the elements of these models, the outcomes of care delivered in these models, and whether these models are cost-effective when compared to conventional practice settings. It outlines areas of research in convention and CAM therapies, ways of integrating these therapies, development of curriculum that provides further education to health professionals, and an amendment of the Dietary Supplement Health and Education Act to improve quality, accurate labeling, research into use of supplements, incentives for privately funded research into their efficacy, and consumer protection against all potential hazards.

aura chiropractic family wellness: Global Nomads Anthony D'Andrea, 2007-01-24 Global Nomads provides a unique introduction to the globalization of countercultures, a topic largely unknown in and outside academia. Anthony D'Andrea examines the social life of mobile expatriates who live within a global circuit of countercultural practice in paradoxical paradises. Based on nomadic fieldwork across Spain and India, the study analyzes how and why these post-metropolitan subjects reject the homeland in order to shape an alternative lifestyle. They become artists, therapists, exotic traders and bohemian workers seeking to integrate labor, mobility and spirituality within a cosmopolitan culture of expressive individualism. These countercultural formations, however, unfold under neo-liberal regimes that appropriate utopian spaces, practices and imaginaries as commodities for tourism, entertainment and media consumption. In order to understand the paradoxical globalization of countercultures, Global Nomads develops a dialogue between global and critical studies by introducing the concept of 'neo-nomadism' which seeks to overcome some of the shortcomings in studies of globalization. This book is an essential aide for undergraduate, postgraduate and research students of Sociology, Anthropology of Globalization, Cultural Studies and Tourism Studies.

aura chiropractic family wellness: *Potentiating Health and the Crisis of the Immune System* A. Mizrahi, S. Fulder, Nimrod Sheinman, 1997-06-30 With all the enormous resources that are invested in medicine, it is sometimes a mystery why there is so much sickness still in evidence. Our life span, though higher than at any time in history, has now leveled off and has not significantly increased in the last two generations. There is a one-third increase in long-term illness in the last 20 years and a 44% increase in cancer incidence, which are not related to demographic issues. In some modern countries, the level of morbidity (defined as days off work because of sickness) has increased by two thirds in this time. Despite \$1 trillion spent on cancer research in 20 years, the War On Cancer has recently been pronounced a complete failure by the U. S. President's Cancer Panel. Evidently we still have a long way to go. The goal of Health for All by the Year 2000 as the World Health Organization has put it, is another forgotten dream. As ever, the answer will be found in breaking out of the old philosophical patterns and discovering the new, as yet unacceptable concepts. The problems of medicine today require a Kuhnian breakthrough into new paradigms, and new ways of thinking. And these new ways will not be mere variations of the old, but radical departures. This book, and the conference upon which it was based, is part of a search for these new pathways.

aura chiropractic family wellness: Fundamentals of Family Medicine M. G. Rosen, R. B. Taylor, W. E. Jacott, E. P. Donatelle, J. L. Buckingham, 2012-12-06 This book is intended as an introduction to family medicine and to the behaviors, concepts, and skills upon which the clinical practice of the discipline is based. The chapters that follow will provide a foundation for the student during the pre-doctoral years, a base upon which he or she can build during residency training and practice. *Fundamentals of Family Medicine* presents Part I (the first 36 chapters) of *Family Medicine: Principles and Practice*. Because it is intended that the student will eventually move from use of this extracted material to the full textbook, the preface to the comprehensive edition has been included and cross-references to later chapters have been retained. Why publish a student edition?

Medical students in various schools participate in courses covering a wide range of topics including communication skills, family dynamics, medical ethics, human sexuality, disease prevention, aging and death. Departments of family medicine generally assume a leadership role in presentation of such courses, and this book is intended to integrate these eclectic topics into a single textbook.

aura chiropractic family wellness: The Story Paradox Jonathan Gottschall, 2021-11-23

Storytelling, a tradition that built human civilization, may soon destroy it. Humans are storytelling animals. Stories are what make our societies possible. Countless books celebrate their virtues. But Jonathan Gottschall, an expert on the science of stories, argues that there is a dark side to storytelling we can no longer ignore. Storytelling, the very tradition that built human civilization, may be the thing that destroys it. In *The Story Paradox*, Gottschall explores how a broad consortium of psychologists, communications specialists, neuroscientists, and literary quants are using the scientific method to study how stories affect our brains. The results challenge the idea that storytelling is an obvious force for good in human life. Yes, storytelling can bind groups together, but it is also the main force dragging people apart. And it's the best method we've ever devised for manipulating each other by circumventing rational thought. Behind all civilization's greatest ills—environmental destruction, runaway demagogues, warfare—you will always find the same master factor: a mind-disordering story. Gottschall argues that societies succeed or fail depending on how they manage these tensions. And it has only become harder, as new technologies that amplify the effects of disinformation campaigns, conspiracy theories, and fake news make separating fact from fiction nearly impossible. With clarity and conviction, Gottschall reveals why our biggest asset has become our greatest threat, and what, if anything, can be done. It is a call to stop asking, "How we can change the world through stories?" and start asking, "How can we save the world from stories?"

aura chiropractic family wellness: *The Health Robbers* Stephen Barrett, William T. Jarvis, 1993 And it answers such questions as: Are 'organic' foods worth their extra cost? Can acupuncture cure anything? Will vitamin B₁₂ shots pep me up? Can diet cure arthritis? Will spinal adjustments help my health? Will amino acids 'pump up' my muscles? Where can reliable information be obtained? and What's the best way to get good medical care? Even if the answers to some of these questions seem obvious, the details in this volume, written in an informative, highly readable, and easy-to-understand style, will astound you. Quackery often leads to harm because it turns ill people away from legitimate and trusted therapeutic procedures. However, its heaviest toll is in financial loss not only to those who pay directly, but to everyone who pays for bogus treatments through taxes, insurance premiums, and other ways that are less obvious.
