avery dental wellness dublin: *Handbook of Prevention* Barry A. Edelstein, Larry Michelson, 2012-03-18 Americans are healing themselves (Heckler, 1985) and prevention has taken root (McGinnis, 1985a). We are altering our lifestyle to reduce physical and mental health risks. Perhaps as important is the fact that the science of prevention is beginning to catch up with the practices of prevention, although some might argue that the popularity of these practices far outstrips sound theoretical and empirical foundations. The chapter authors in this volume examine the theoretical and empirical foundations of many current prevention practices and, where data exist, discuss the status of prevention efforts. Where substantial prevention is not yet on the horizon, the authors attempt to point us in the right direction or at least share with the reader some of the risk factors that should be addressed in our research. We hope that readers will be stimulated to discuss the issues raised, advance the current research, and, where possible, adopt the prevention and health promotion strategies that are supported by sound theoretical and empirical work. This volume can in no way be comprehensive with respect to the current work in prevention; however, we hope that we have provided a sampling of prevention activities and issues that appear together in one volume for perhaps the first time. The primary intent of this volume is modest, and the reader should not attempt to find continuity among the various chapters. The only binding among these contributions is their focus on prevention.

The edition has also been expanded to cover parental learning disabilities and how it may impact on parenting and children's health and development. The findings show that these parenting issues affect children differently depending on their age and individual circumstances. avery dental wellness dublin: *Marriage Equality* William N. Eskridge, Jr., Christopher R. Riano, 2020-08-18 The definitive history of the marriage equality debate in the United States, praised by *Library Journal* as beautifully and accessibly written. . . . An essential work." As a legal scholar who first argued in the early 1990s for a right to gay marriage, William N. Eskridge Jr. has been on the front lines of the debate over same-sex marriage for decades. In this book, Eskridge and

his coauthor, Christopher R. Riano, offer a panoramic and definitive history of America's marriage equality debate. The authors explore the deeply religious, rabidly political, frequently administrative, and pervasively constitutional features of the debate and consider all angles of its dramatic history. While giving a full account of the legal and political issues, the authors never lose sight of the personal stories of the people involved, or of the central place the right to marry holds in a person's ability to enjoy the dignity of full citizenship. This is not a triumphalist or one-sided book but a thoughtful history of how the nation wrestled with an important question of moral and legal equality.

avery dental wellness dublin: *Business Strategies for Sustainability* Helen Borland, Adam Lindgreen, Francois Maon, Véronique Ambrosini, Beatriz Palacios Florencio, Joelle Vanhamme, 2018-10-03 Business Strategies for Sustainability brings together important research contributions that demonstrate different approaches to business strategies for sustainability. Many corporate initiatives toward what firms perceive to be sustainability are simply efficiency drives or competitive moves - falling far short of actual strategies for ecological sustainability. To suggest true ecological sustainability strategies, this new research anthology adopts an interdisciplinary, or transdisciplinary, approach to discern what business strategies might look like if they were underpinned by environmental and ecological science. The 23 chapters in this anthology reflect five main topic sections: (a) delineating sustainability challenges and visions; (b) contradiction, integration and transformation of business and sustainability logics; (c) innovating and developing strategic capabilities for sustainability; (d) assessing and valuing sustainability; and (e) toward multi-level engagement and collaboration.

avery dental wellness dublin: Handprints on Hubble Kathryn D. Sullivan, 2019-11-05 The first American woman to walk in space recounts her experience as part of the team that launched, rescued, repaired, and maintained the Hubble Space Telescope The Hubble Space Telescope has revolutionized our understanding of the universe. It has, among many other achievements, revealed thousands of galaxies in what seemed to be empty patches of sky; transformed our knowledge of black holes; found dwarf planets with moons orbiting other stars; and measured precisely how fast the universe is expanding. In *Handprints on Hubble*, retired astronaut Kathryn Sullivan describes her work on the NASA team that made all this possible. Sullivan, the first American woman to walk in space, recounts how she and other astronauts, engineers, and scientists launched, rescued, repaired, and maintained Hubble, the most productive observatory ever built. Along the way, Sullivan chronicles her early life as a "Sputnik Baby," her path to NASA through oceanography, and her initiation into the space program as one of "thirty-five new guys." (She was also one of the first six women to join NASA's storied astronaut corps.) She describes in vivid detail what liftoff feels like inside a spacecraft (it's like "being in an earthquake and a fighter jet at the same time"), shows us the view from a spacewalk, and recounts the temporary grounding of the shuttle program after the Challenger disaster. Sullivan explains that "maintainability" was designed into Hubble, and she describes the work of inventing the tools and processes that made on-orbit maintenance possible. Because in-flight repair and upgrade was part of the plan, NASA was able to fix a serious defect in Hubble's mirrors—leaving literal and metaphorical "handprints on Hubble." *Handprints on Hubble* was published with the support of the MIT Press Fund for Diverse Voices.

avery dental wellness dublin: The Firehouse Light Janet Nolan, 2010-05-25 Day after day, year after year, the lightbulb did not burn out. Here is the true story of a little lightbulb, located in a firehouse, that has stayed lit for more than one hundred years. As horse-drawn carriages make room for automobiles, dirt roads give way to paved streets, and new buildings transform small clusters of homes into bustling neighborhoods, a small town grows and changes. And fighting fires changes, too: fires once fought by bucket brigades and hand-pulled hose carts are now attended by full-time firefighters and modern firetrucks. Yet now, just like then, the lightbulb glows, strong and steady, above the brave firefighters and their trucks.

avery dental wellness dublin: We Can All Do Better Bill Bradley, 2012-05-08 Bill Bradley is arguably one of the most well-versed public figures of our time. The eighteen-year New Jersey Senator, financial and investment adviser, Olympic and NBA athlete, national radio host, and bestselling author has lived in the United States as both political insider and outsider, national sports celebrity and behind-the-scenes confidante, leader and teammate. His varied experiences help to inform his unique and much-sought-after point of view on Washington and the country at large. In *We Can All Do Better*, for the first time since the financial meltdown and since the worst of the intensifying political gridlock, Bradley offers his own concise, powerful, and highly personal review of the state of the nation. Bradley argues that government is not the problem. He criticizes the role of money and politics, explains how continuing on our existing foreign policy, electoral, and economic paths will mean a diminished future, and lays out exactly what needs to be done to reverse course. Breaking from the intransigent long-held viewpoints of both political parties, and with careful attention to our nation's history, Bradley passionately lays out his narrative. He offers a no-holds-barred prescription on subjects including job creation, deficit reduction, education, and immigration. While equally critical of the approaches of the Tea Party and Occupy Movements, he champions the power of individual Americans to organize, speak out, bridge divisions, and he calls on the media to assume a more responsible role in our national life. As this moving call to arms reminds us, we can all—elected officials, private citizens, presidents—do a better job of moving our country forward. Bradley is perhaps the best guide imaginable, with his firsthand knowledge of governments' inner-workings, the country's diversity, and the untapped potential of the American people.

avery dental wellness dublin: *Experiencing the State* Lloyd I. Rudolph, John Kurt Jacobsen, 2009 This collection of essays by 13 well-known contributors departs from a conventional analysis of the state that universalizes and standardizes what the state is, does, and means. The contributors engage state and stateness as it is encountered in everyday life, ranging from village and urban life to big dams, war, torture, hospital treatment, cinema attendance, and art exhibitions. The essays locate the state in time, space, and circumstance so that it is contingent and evocative rather than definitive and authoritative. *Experiencing the State* discusses formative discourses on the state, what we may think or say about the state, and what images are evoked by its various manifestations through social and cultural forms. This volume begins with a non-essentialist perspective on state formation, and concludes with an account of how the state is experienced in the post-9/11 world scenario, in India and South Asia, the US, Europe, including the former Soviet Union, and the Far East.
