ayr wellness plymouth meeting: *Disability in the Industrial Revolution* David M. Turner, Daniel Blackie, 2018-04-03 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. An electronic version of this book is also available under a Creative Commons (CC-BY-NC-ND) license, thanks to the support of the Wellcome Trust. The Industrial Revolution produced injury, illness and disablement on a large scale and nowhere was this more visible than in coalmining. *Disability in the Industrial Revolution* sheds new light on the human cost of industrialisation by examining the lives and experiences of those disabled in an industry that was vital to Britain's economic growth. Although it is commonly assumed that industrialisation led to increasing marginalisation of people with impairments from the workforce, disabled mineworkers were expected to return to work wherever possible, and new medical services developed to assist in this endeavour. This book explores the working lives of disabled miners and analyses the medical, welfare and community responses to disablement in the coalfields. It shows how disability affected industrial relations and shaped the class identity of mineworkers. The book will appeal to students and academics interested in disability, occupational health and social history.

ayr wellness plymouth meeting: *Medicinal and Aromatic Plants of the World* Ákos Máthé, 2015-09-30 Medicinal and aromatic plants (MAPs) have accompanied mankind from its very early beginnings. Their utilization has co-evolved with homo sapiens itself bringing about a profound increase in our scientific knowledge of these species enabling them to be used in many facets of our life (e.g. pharmaceutical products, feed- and food additives, cosmetics, etc.). Remarkably, despite the new renaissance of MAPs usage, ca. 80 % of the world's population is relying on natural substances of plant origin, with most of these botanicals sourced from the wild state. This first volume and ultimately the series, provides readers with a wealth of information on medicinal and aromatic plants.

ayr wellness plymouth meeting: *High Quality Care for All* Secretary of State for Health, 2008 This review incorporates the views and visions of 2,000 clinicians and other health and social care professionals from every NHS region in England, and has been developed in discussion with patients, carers and the general public. The changes proposed are locally-led, patient-centred and clinically driven. Chapter 2 identifies the challenges facing the NHS in the 21st century: ever higher expectations; demand driven by demographics as people live longer; health in an age of information and connectivity; the changing nature of disease; advances in treatment; a changing health workplace. Chapter 3 outlines the proposals to deliver high quality care for patients and the public, with an emphasis on helping people to stay healthy, empowering patients, providing the most effective treatments, and keeping patients as safe as possible in healthcare environments. The importance of quality in all aspects of the NHS is reinforced in chapter 4, and must be understood from the perspective of the patient's safety, experience in care received and the effectiveness of that care. Best practice will be widely promoted, with a central role for the National Institute for Health and Clinical Excellence (NICE) in expanding national standards. This will bring clarity to the high standards expected and quality performance will be measured and published. The review outlines the need to put frontline staff in control of this drive for quality (chapter 5), with greater freedom to use their expertise and skill and decision-making to find innovative ways to improve care for patients. Clinical and managerial leadership skills at the local level need further development, and all levels of staff will receive support through education and training (chapter 6). The review recommends the introduction of an NHS Constitution (chapter 7). The final chapter sets out the means of implementation.

ayr wellness plymouth meeting: *The Rule of the Land* Garrett Carr, 2017-01-31 In the wake of the EU referendum, the United Kingdom's border with Ireland has gained greater significance: it is set to become the frontier with the European Union. Over the past year, Garrett Carr has travelled this border, on foot and by canoe, to uncover a landscape with a troubled past and an uncertain future. Across this thinly populated line, travelling down hidden pathways and among ancient monuments, Carr encounters a variety of characters who have made this liminal space their home. He reveals the turbulent history of this landscape and changes the way we look at nationhood, land and power. The book incorporates Carr's own maps and photographs.

ayr wellness plymouth meeting: **A History of Cornell** Morris Bishop, 2014-10-15 Cornell University is fortunate to have as its historian a man of Morris Bishop's talents and devotion. As an accurate record and a work of art possessing form and personality, his book at once conveys the unique character of the early university—reflected in its vigorous founder, its first scholarly president, a brilliant and eccentric faculty, the hardy student body, and, sometimes unfortunately, its early architecture—and establishes Cornell's wider significance as a case history in the development of higher education. Cornell began in rebellion against the obscurantism of college education a century ago. Its record, claims the author, makes a social and cultural history of modern America. This story will undoubtedly entrance Cornellians; it will also charm a wider public. Dr. Allan Nevins, historian, wrote: I anticipated that this book would meet the sternest tests of scholarship, insight, and literary finish. I find that it not only does this, but that it has other high merits. It shows grasp of ideas and forces. It is graphic in its presentation of character and idiosyncrasy. It lights up its story by a delightful play of humor, felicitously expressed. Its emphasis on fundamentals, without pomposity or platitude, is refreshing. Perhaps most important of all, it achieves one goal that in the history of a living university is both extremely difficult and extremely valuable: it recreates the changing atmosphere of time and place. It is written, very plainly, by a man who has known and loved Cornell and Ithaca for a long time, who has steeped himself in the traditions and spirit of the institution, and who possesses the enthusiasm and skill to convey his understanding of these intangibles to the reader. The distinct personalities of Ezra Cornell and first president Andrew Dickson White dominate the early chapters. For a vignette of the founder, see Bishop's description of his first buildings (Cascadilla, Morrill, McGraw, White, Sibley): At best, he writes, they embody the character of Ezra Cornell, grim, gray, sturdy, and economical. To the English historian, James Anthony Froude, Mr. Cornell was the most surprising and venerable object I have seen in America. The first faculty, chosen by President White, reflected his character: his idealism, his faith in social

emancipation by education, his dislike of dogmatism, confinement, and inherited orthodoxy; while the romantic upstate gothic architecture of such buildings as the President's house (now Andrew D. White Center for the Humanities), Sage Chapel, and Franklin Hall may be said to portray the taste and Soul of Andrew Dickson White. Other memorable characters are Louis Fuertes, the beloved naturalist; his student, Hugh Troy, who once borrowed Fuertes' rhinoceros-foot wastebasket for illicit if hilarious purposes; the more noteworthy and the more eccentric among the faculty of succeeding presidential eras; and of course Napoleon, the campus dog, whose talent for hailing streetcars brought him home safely—and alone—from the Penn game. The humor in *A History of Cornell* is at times kindly, at times caustic, and always illuminating.

ayr wellness plymouth meeting: Life at Walnut Tree Farm Rufus Deakin, Titus Rowlandson, 2019-05-02 In 1970 Roger Deakin acquired Walnut Tree Farm, a semi-ruined Elizabethan farmhouse deep in the countryside of northern Suffolk, on the edge of Mellis Green, the largest area of common grazing land in England. The house's thatch and roof beams were rotting; pigs and hens had been its last occupants and the floors were ankle deep in shit. Leaving swinging London behind, Deakin bought the farm in a spirit of 'back to the land' fervour; and, in the coming decades, lovingly restored it. Deakin lived here until his death in 2006, dredging the moat (in which he swam daily), planting woods and buying more of the surrounding fields, where he grew hay and wild flowers. Walnut Tree Farm became a place of pilgrimage and inspiration for nature-lovers, writers, intellectuals and artists, while Deakin's *Waterlog* has become a much-loved classic of nature writing and gave impetus to the wild swimming movement. Rufus Deakin and Titus Rowlandson offer a beautifully illustrated and designed record of the development of Deakin's rural paradise, centred on a series of photographs taken by Roger Deakin himself, which record both the rebuilding of Walnut Tree Farm, the unique character of a remarkable building, and the seasonal cycle of nature in the land and countryside that surround it.

ayr wellness plymouth meeting: Game of Spies Paddy Ashdown, 2016 'Game of Spies' tells the story of a lethal spy triangle between 1942 and 1944 in Bordeaux - and of France's greatest betrayal by aristocratic and right-wing Resistance leader Andre Grandclement. The story centres on three men: one British, one French and one German and the duel they fought out in an atmosphere of collaboration, betrayal and assassination, in which comrades sold fellow comrades, Allied agents and downed pilots to the Germans, as casually as they would a bottle of wine. It is a story of SOE, treachery, bed-hopping and executions in the city labelled 'la plus collaboratrice' in the whole of France.--Publisher description.

ayr wellness plymouth meeting: *Obesity and Metabolic Surgery* Jürgen Ordemann, Ulf Elbelt, 2023-11-11 This book presents the surgical therapy of obesity and metabolic diseases in a practice-oriented and detailed way. The specific surgical procedures with their indications, performance and risks are described precisely in words and pictures. Special emphasis is placed on the choice of the appropriate surgical procedure for the individual patient. In addition to the mechanisms of action, interdisciplinary preoperative evaluation of the patient and postoperative aftercare are explained. Furthermore, surgical, internal and psychosomatic complications and complication management are described. Information on obesity center organization and alternative bariatric therapies complete the volume. This book is a translation of the original German 1st edition *Adipositas- und metabolische Chirurgie* by Jürgen Ordemann & Ulf Elbelt, published by Springer-Verlag GmbH Germany, part of Springer Nature in 2017. The translation was done with the help of artificial intelligence (machine translation by the service DeepL.com). A subsequent human revision was done primarily in terms of content, so that the book will read stylistically differently from a conventional translation. Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors.

ayr wellness plymouth meeting: *Flying At Night* Ted Kooser, 2005-03-11 Named U.S. Poet Laureate for 2004-2006, Ted Kooser is one of America's masters of the short metaphorical poem. Dana Gioia has remarked that Kooser has written more perfect poems than any poet of his generation. In *Flying at Night: Poems 1965-1985*, Kooser has selected poems from two of his earlier works, *Sure Signs* and *One World at a Time* (1985). Taken together or read one at a time, these poems clearly show why William Cole, writing in the *Saturday Review*, called Ted Kooser a wonderful poet, and why Peter Stitt, writing in the *Georgia Review*, proclaimed him a skilled and cunning writer. . . . An authentic 'poet of the American people.'

ayr wellness plymouth meeting: Eyelid Reconstruction Suzanne K. Freitag, Nahyoung Grace Lee, Daniel R. Lefebvre, Michael K. Yoon, 2019-12-09 Highly practical eyelid surgery resource informs important reconstruction decisions and strategies Skin malignancies frequently affect the

periocular area, necessitating excision followed by eyelid reconstruction. Periocular trauma is also quite common, and because of the highly complex regional anatomy, requires expertise for effective reconstruction. Preparation by ophthalmic plastic surgeons prior to periorbital reconstruction is often not possible due to the unpredictability of defects left after Mohs micrographic surgeons clear tumor margins or in cases of trauma. Eyelid Reconstruction by renowned expert Suzanne Freitag and esteemed coeditors N. Grace Lee, Daniel Lefebvre, and Michael Yoon fills a void in the literature. The book provides a quick and practical ophthalmic plastic surgery guide on how to plan and perform a full spectrum of periocular reconstruction procedures. The textbook is a compilation of patient cases and the authors' vast, richly diverse expertise. The book starts with two chapters covering complex periorbital anatomy and basic surgical principles, both of which are critical to performing safe and effective surgery. The third chapter provides a comprehensive overview of Mohs surgery in the periorbital area, an important topic given many defect reconstructions are secondary to Mohs micrographic surgical excisions. Subsequent chapters, organized by anatomic region, feature discussion of surgical approaches for reconstructions of various size and depth defects. The final chapter details eyelid trauma repair, including lid margin and lacrimal lacerations. Key Features An essential go-to pre- or peri-operative reference surgeons can consult quickly as reconstruction cases arise Practical and concise procedural descriptions accompanied by numerous high-quality photographs and illustrations enhance comprehension Chapters dedicated to medial canthus, lower eyelid, upper eyelid, and lateral canthus reconstruction procedures discuss special considerations based on underlying anatomy, adnexal structures, and required functions This is a must-have resource for residents, fellows, and experienced surgeons in the fields of ophthalmic plastic surgery, ophthalmology, otolaryngology, facial plastic surgery, plastic surgery, dermatology, Mohs surgery, and maxillofacial surgery.
