When she sat down to write her poem *Come Away* after the death of her husband David, she had written no poems for a quarter of a century. Then came a sequence of incredibly moving elegies. Other poems followed, and two years after starting to write again, she won the Cheltenham Festival poetry competition. Her first collection *That Winter* (Bloodaxe, 1986) was shortlisted for the Commonwealth Poetry Prize.

besame wellness north kc: Handbook of Natural Language Processing and Machine Translation Joseph Olive, Caitlin Christianson, John McCary, 2011-03-02 This comprehensive handbook, written by leading experts in the field, details the groundbreaking research conducted under the breakthrough GALE program--The Global Autonomous Language Exploitation within the Defense Advanced Research Projects Agency (DARPA), while placing it in the context of previous research in the fields of natural language and signal processing, artificial intelligence and machine translation. The most fundamental contrast between GALE and its predecessor programs was its holistic integration of previously separate or sequential processes. In earlier language research programs, each of the individual processes was performed separately and sequentially: speech recognition, language recognition, transcription, translation, and content summarization. The GALE program employed a distinctly new approach by executing these processes simultaneously. Speech and language recognition algorithms now aid translation and transcription processes and vice versa. This combination of previously distinct processes has produced significant research and performance breakthroughs and has fundamentally changed the natural language processing and machine translation fields. This comprehensive handbook provides an exhaustive exploration into these latest technologies in natural language, speech and signal processing, and machine translation, providing researchers, practitioners and students with an authoritative reference on the topic.

besame wellness north kc: Children of the Night Paul Kenyon, 2021-08-19 A vivid, brilliant, darkly humorous and horrifying history of some of the strangest dictators that Europe has ever seen. 'A witty and page-turning narrative full of grotesque characters' Misha Glenny 'Will leave you astonished, exhausted and curious... An unapologetic page turner' Spectator 'Essential reading for anyone interested in Romania past and present' John Simpson 'An engaging introduction to the rich history [of Romania]' New Statesman Balanced precariously on the shifting fault line between East and West, Romania's past is one of the great untold stories of modern Europe. The country that gave us Vlad Dracula, and whose citizens consider themselves descendants of ancient Rome, has traditionally preferred the status of enigmatic outsider. But it has experienced some of the most disastrous leaderships of the last century. After a relatively benign period led by a dutiful King and his vivacious British-born Queen, the country oscillated wildly. Its interwar rulers form a gallery of bizarre characters: the corrupt and mentally unbalanced King Carol; the fascist death cult led by Corneliu Codreanu; the vain General Ion Antonescu. After 1945 power was handed to Romania's tiny communist party, under which it experienced severe repression, purges and collectivisation. Then in 1965, Nicolae Ceau?escu came to power. And thus began the strangest dictatorship of all.

A marathon runner, Debra excelled in the Police Academy, garnering respect as one of the few female police officers in Las Vegas. However, through her twenty-one years on the police force, Debra faced discrimination in the male-dominated profession, suffering demotions and unsafe working conditions when other officers would not provide backup. In addition to the disappointment of injustice, she struggled with her sexuality, becoming entrenched in a homosexual lifestyle. After establishing an identity as a respected police officer, Debra was devastated when her career crumbled. *Bright Lights, Dark Places* thoughtfully expresses the painful reality of combating biased attitudes and the joy that comes from surpassing limitations. Packed with fascinating stories of a vibrant career, from teaching at the academy to pioneering a bicycle patrol, *Bright Lights, Dark Places* gives you an inside look at the career of one of the first female officers in Las Vegas. You will be encouraged by this powerful story of one woman finding grace to overcome trials.

besame wellness north kc: Iranian Romance in the Digital Age Janet Afary, Jesilyn Faust, 2021-01-28 Following the 1979 Islamic Revolution, there was a dramatic reversal of women's rights, and the state revived many premodern social conventions through modern means and institutions. Customs such as the enforced veiling of women, easy divorce for men, child marriage, and polygamy were robustly reintroduced and those who did not conform to societal strictures were severely punished. At the same time, new social and economic programs benefited the urban and rural poor, especially women, which had a direct impact on gender relations and the institution of marriage. Edited by Janet Afary and Jesilyn Faust, this interdisciplinary volume responds to the growing interest and need for literature on gender, marriage and family relations in the Islamic context. The book examines how the institution of marriage transformed in Iran, paying close attention to the country's culture and politics. Part One examines changes in urban marriages to new forms of cohabitation. In Part Two contributors, such as Soraya Tremayne, explore the way technology and social media has impacted and altered the institution of family. Part Three turns its eye to look at marital changes in the rural and tribal sectors of society through the works of anthropologists including Erika Friedl and Mary Hegland. Based on the work of both new and established scholars, the book provides an up-to-date study of an important and intensely politicized subject.

After completing a mural in a Sephardic synagogue in Los Angeles, Mendes felt reconnected with her heritage and then began to study the Torah and actively practice Judaism which became the driving force in both her life and art.

besame wellness north kc: Genius at Play Siobhan Roberts, 2024-10-29 A multifaceted biography of a brilliant mathematician and iconoclast A mathematician unlike any other, John Horton Conway (1937–2020) possessed a rock star's charisma, a polymath's promiscuous curiosity, and a sly sense of humor. Conway found fame as a barefoot professor at Cambridge, where he discovered the Conway groups in mathematical symmetry and the aptly named surreal numbers. He also invented the cult classic Game of Life, a cellular automaton that demonstrates how simplicity generates complexity—and provides an analogy for mathematics and the entire universe. Moving to Princeton in 1987, Conway used ropes, dice, pennies, coat hangers, and the occasional Slinky to illustrate his winning imagination and share his nerdish delights. Genius at Play tells the story of this ambassador-at-large for the beauties and joys of mathematics, lays bare Conway's personal and professional idiosyncrasies, and offers an intimate look into the mind of one of the twentieth century's most endearing and original intellectuals.

besame wellness north kc: *Marine Geography* Barbara Bischof, 2024-11-01 *Marine Geography: Ocean Space and Sense of Place* advances the field of marine geography and defines it as a unique subdiscipline of geographic thought. It demonstrates how core theory and perspectives must be tweaked to be effective in approaching geographic challenges such as natural resource management, fisheries, coastal development, marine environmental research and exploration, mobilities and legal issues of boundaries and enforcement, and any topics that include human-nature interactions in this space. The book provides the geographic theories that must be adjusted and highlights unique spatial characteristics that must be accommodated appropriately to be applied towards issues in marine and coastal systems, e.g., boundary-making, dimensions, cultures of science/technologies, access, social constructions, place vs space, etc. The author effectively lay out ways in which ocean space has been organized by humans, that is, how we have determined boundaries and boundary systems in ocean space.

besame wellness north kc: *Zero Frequency* Mabel Katz, 2020-05 We are living in a time when many people are feeling the weight of the world on their shoulders, in the form of global and personal stress--financial challenges, illness, loneliness, depression, and lack of purpose. *Zero Frequency*, by Mabel Katz, is an illuminating book that offers all struggling citizens of this planet a path out of turmoil and towards a life of happiness, peace, and abundance. As a lifelong practitioner and leading authority on Ho'oponopono, the ancient Hawaiian art of problem-solving, Mabel Katz's new book presents wisdom in a more practical and modern way--one that simultaneously speaks to the mind and heart, while also cutting through many of the mind traps and illusions that prevent us from experiencing truth. In this book, you will come to understand that *Zero Frequency* is a direct pipeline back to who we are--to our true essence. *Zero Frequency* is also a suspension of mind and thought that would allow us to return to the fullness of the Present Moment. Mabel calls this a return to our natural state of Zero--the limitless state that comes when we live in the Now--present, conscious, free of judgment--allowing our hearts to open to the wisdom that already lives within each of us. This book will lay down a concrete path to help its readers wake up and realize their potential. It is a book that is written with the unwavering belief that the more we help (and heal) ourselves, the more we help (and heal) the planet. Living from who we are is at the core of *Zero Frequency*, a combination of gratitude, letting go, and practicing peace. *Zero Frequency* is like returning to our childhood, and the joy and innocence we have lost as time and age have buried who we are. Rediscovering this part of ourselves--our true self--is the pathway back to opening our hearts to abundance, peace, and joy. It is where all the answers to life's problems will be found. It is the heart and soul of *Zero Frequency*.--Publisher.

besame wellness north kc: *Why Birds Sing* David Rothenberg, 2005-04-12 The astonishing variety and richness of bird song is both an aesthetic and a scientific mystery. Biologists have never been able to understand why bird song displays are often so inventive and why so many species devote so many hours to singing. The standard explanations, which generally have to do with territoriality and sexual display, don't begin to account for the astonishing variety and energy that the commonest birds exhibit. Is it possible that birds sing because they like to? This seemingly naïve explanation is starting to look more and more like the truth. In the tradition of classic works by Bernd Heinrich, Edward Abbey, and Terry Tempest Williams, *Why Birds Sing* is a lyric exploration of bird song that blends the latest scientific research with a deep understanding of musical beauty and form. Based on conversations with neuroscientists, ecologists, and composers, it is the first book to investigate why birds sing and how, and what effect their music has on other animals—particularly

humans. Whether playing the clarinet with the white-crested laughing thrush in Pittsburgh, or jamming in the Australian winter breeding grounds of the Albert's lyrebird, Rothenberg journeys to the heart and soul of bird song. *Why Birds Sing* offers an intimate look at the most lovely of natural phenomena—with surprising insights about the origin of music.
