binford pet wellness clinic: The Psychology of the Human-Animal Bond Christopher Blazina, Güler Boyraz, David Shen-Miller, 2011-06-22 There have been dramatic increases in the financial, emotional, and psychological investment in pets over the past four decades. The increasing importance of animal companions in people's lives has resulted in growing emphasis on the human-animal bond within academic literature. This book introduces practicing and emerging professionals to vital subject matter concerning this growing specialty area by providing an essential framework and information through which to consider the unique contextual backdrop of the human-animal bond. Such contexts include a wide array of themes including: issues of attachment

and loss, success and frustration with making and sustaining connections, world views regarding animal ethics, familial history of neglect or abuse, and cultural dynamics that speak to the order of things between mankind and nature. Adopting a contextual stance will aid mental health professionals in appreciating why and how this connection has become a significant part of everyday life for many. As with any other important clinical dynamic, training and preparation are needed to gain competence for professional practice and research. To this end, an ensemble of international experts across the fields of psychology and mental health explore topics that will help both new and established clinicians increase and understanding of the various ways the human-animal bond manifests itself. Perspectives from beyond the scope of psychology and mental health such as anthropology, philosophy, literature, religion, and history are included to provide a sampling of the significant contexts in which the human-animal bond is established. What brings these divergent topics together in a meaningful way is their relevance and centrality to the contextual bonds that underlie the human-animal connection. This text will be a valuable resource that provides opportunities to deepen one's expertise in understanding the psychology of the human-animal bond.

binford pet wellness clinic: Going All the Way Dan Wakefield, 2016-02-09 Two friends return home from the Korean War to find their world—and themselves—irrevocably altered in this novel hailed by Kurt Vonnegut as “gruesomely accurate and enchanting” and “wildly sexy” Willard “Sonny” Burns and Tom “Gunner” Casselman, Korean War vets and former classmates, reunite on the train ride home to Indianapolis. Despite their shared history, the two young men could not be more different: Sonny had been an introverted, bookish student, whereas Gunner had been the consummate Casanova and athlete—and a popular source of macho pride throughout the high school. Reunited by the pains of war, they go in search of finding love, rebuilding their lives, and shedding the repressive expectations of their families. As Sonny and Gunner seek their true passions, the stage is set for a wounded, gripping account of disillusionment and self-discovery as seen through the lens of the conservative Midwest in the summer of 1954. Rendered in honest prose, national bestseller *Going All the Way* expertly and astutely captures the joys and struggles of working-class Middle America, and the risks of challenging the status quo. Author Dan Wakefield crafts this enduring coming-of-age tale with fluidity, grace, and deep humanity.

binford pet wellness clinic: *Promoting the Health of the Community* Julie Ann St. John, Susan L. Mayfield-Johnson, Wandy D. Hernández-Gordon, 2021-03-22 Community health workers (CHWs) are an increasingly important member of the healthcare and public health professions who help build primary care capacity. Yet, in spite of the exponential growth of CHW interventions, CHW training programs, and CHW certification and credentialing by state agencies, a gap persists in the literature regarding current CHW roles and skills, scope of practice, CHW job settings, and national standards. This collection of contributions addresses this gap by providing information, in a single volume, about CHWs, the roles CHWs play as change agents in their communities, integration of CHWs into healthcare teams, and support and recognition of the CHW profession. The book supports the CHW definition as defined by the American Public Health Association (APHA), Community Health Worker Section (2013), which states, "A community health worker is a frontline public health worker who is a trusted member of and/or has an unusually close understanding of the community served." The scope of the text follows the framework of the nationally recognized roles of CHWs that came out of a national consensus-building project called "The Community Health Worker (CHW) Core Consensus (C3) Project". Topics explored among the chapters include: Cultural Mediation Among Individuals, Communities, and Health and Social Service Systems Care Coordination, Case Management, and System Navigation Advocating for Individuals and Communities Building Individual and Community Capacity Implementing Individual and Community Assessments Participating in Evaluation and Research Uniting the Workforce: Building Capacity for a National Association of Community Health Workers *Promoting the Health of the Community* is a must-have resource for CHWs, those interested in CHW scope of practice and/or certification/credentialing, anyone interested in becoming a CHW, policy-makers, CHW payer systems, CHW supervisors, CHW employers, CHW instructors/trainers, CHW advocates/supporters, and communities served by CHWs.

Genetic and immunologic advances have increased our understanding of the pathophysiology of psoriasis and psoriatic arthritis and there is a need for practically oriented evidence based references to describe the management options open to clinicians. The speed at which developments are occurring in the field also necessitates a novel approach to keeping up with these changes in practice and the need is for a reference that that be updated regularly as the subject requires. Psoriasis is an incredibly fast-moving discipline within dermatology. Guidelines, treatment options and management all change at incredible speed. There is a requirement to provide a comprehensive reference resource to provide practical, user friendly information for the dermatology profession to aid in the decision-making process. Psoriasis is a graphical subdiscipline

of medicine and therefore this will have copious illustrations. As a fast moving discipline the emphasis must be on annual updates to ensure that readers are kept up to date on the important areas of development.

binford pet wellness clinic: *Doug Wheeler* Doug Wheeler, 2020-01-07 Over five decades, Doug Wheeler has pioneered the art of light and space. His work powerfully explores the way we perceive "empty" space—the way light can affect our perception and make emptiness feel full and dense. From his early experiences flying across the desert with his father, a doctor in Globe, Arizona, Wheeler developed a passion for the intensity and stillness of vast expanses, seeing in them a whole new set of possibilities for visual art. Although Wheeler began his career as a painter, his wall-mounted artworks soon began incorporating light as a medium and quickly gave way to an unprecedented art-historical breakthrough: his construction of an absolute light environment, crafted in his studio in 1967. Since that unparalleled moment, Wheeler's work has been exhibited

widely all over the world; in the past decade, with numerous major gallery and museum installations, his reputation as the definitive light and space artist has been solidified. This volume, featuring new scholarship by renowned art historian Germano Celant, traces the entire course of Wheeler's career to date, from his first mature paintings to his immersive installations. Writing on Wheeler's intense and direct engagement with the absoluteness in the optical fields he creates, Celant provides a detailed account for Wheeler's development as one of the most original and influential artists of his generation. Wheeler's work not only changes how we encounter reality after we see it, but also how we envision what is possible more broadly in visual art.
