black owned accounting firms near me: *A White-Collar Profession* Theresa A. Hammond, 2003-01-14 Among the major professions, certified public accountancy has the most severe underrepresentation of African Americans: less than 1 percent of CPAs are black. Theresa Hammond explores the history behind this statistic and chronicles the courage and determination of African Americans who sought to enter the field. In the process, she expands our understanding of the links between race, education, and economics. Drawing on interviews with pioneering black CPAs, among other sources, Hammond sets the stories of black CPAs against the backdrop of the rise of accountancy as a profession, the particular challenges that African Americans trying to enter the field faced, and the strategies that enabled some blacks to become CPAs. Prior to the 1960s, few white-owned accounting firms employed African Americans. Only through nationwide networks established by the first black CPAs did more African Americans gain the requisite professional experience. The civil rights era saw some progress in integrating the field, and black colleges responded by expanding their programs in business and accounting. In the 1980s, however, the backlash against affirmative action heralded the decline of African American participation in accountancy and paved the way for the astonishing lack of diversity that characterizes the field today.

black owned accounting firms near me: *Finance for the People* Paco de Leon, 2022-02-01 An illustrated, practical guide to navigating your financial life, no matter your financial situation a potent mix of deeply practical and wonderfully empathetic —Erin Lowry, author of *Broke Millennial* one of the most approachable financial books I've ever read. —Refinery 29 We are all weird about money. Whether you have a lot or a little, your feelings and beliefs about money have been shaped by a combination of silence (or even shame) around talking about money, personal experiences, family and societal expectations, and a whole big complex system rigged against many of us from the start. Begin with that baseline premise and it's no surprise so many of us find it so difficult to save enough money (but way too easy to get trapped in ballooning credit card debt), emotionally draining to deal with student loans, and nearly impossible to understand the esoteric world of investing.

Unlike most personal finance books that focus on skills and behaviors, *FINANCE FOR THE PEOPLE* asks you to examine your beliefs and experiences around money—blending extremely practical exercises with mindfulness, and including more than 50 illustrations and diagrams to make the concepts accessible (and even fun). With deep insider expertise from years spent in many different corners of the financial industry, Paco de Leon is a friendly, approachable, and wise guide who invites readers to change their relationship with money. With her holistic approach you'll learn how to:

- root out your unconscious beliefs about money
- untangle the mental and emotional burden of student loans to pay them off
- use a gratitude practice to help you think differently about spending
- break out of the debt cycle and begin building wealth

This book is for anyone who feels unseen, ignored, or bored to death by the way personal finances are approached and taught, and is ready to go on a journey of self-discovery and step into their financial power.

black owned accounting firms near me: Madison Avenue and the Color Line Jason Chambers, 2011-08-24 Until now, most works on the history of African Americans in advertising have focused on the depiction of blacks in advertisements. As the first comprehensive examination of African American participation in the industry, *Madison Avenue and the Color Line* breaks new ground by examining the history of black advertising employees and agency owners. For much of the twentieth century, even as advertisers chased African American consumer dollars, the doors to most advertising agencies were firmly closed to African American professionals. Over time, black participation in the industry resulted from the combined efforts of black media, civil rights groups, black consumers, government organizations, and black advertising and marketing professionals working outside white agencies. Blacks positioned themselves for jobs within the advertising industry, especially as experts on the black consumer market, and then used their status to alter stereotypical perceptions of black consumers. By doing so, they became part of the broader effort to build an African American professional and entrepreneurial class and to challenge the negative portrayals of blacks in American culture. Using an extensive review of advertising trade journals, government documents, and organizational papers, as well as personal interviews and the advertisements themselves, Jason Chambers weaves individual biographies together with broader events in U.S. history to tell how blacks struggled to bring equality to the advertising industry.

black owned accounting firms near me: Our Black Year Maggie Anderson, 2012-02-14 Maggie and John Anderson were successful African American professionals raising two daughters in a tony suburb of Chicago. But they felt uneasy over their good fortune. Most African Americans live in economically starved neighborhoods. Black wealth is about one tenth of white wealth, and black businesses lag behind businesses of all other racial groups in every measure of success. One problem is that black consumers--unlike consumers of other ethnicities-- choose not to support black-owned businesses. At the same time, most of the businesses in their communities are owned by outsiders. On January 1, 2009 the Andersons embarked on a year-long public pledge to buy black. They thought that by taking a stand, the black community would be mobilized to exert its economic might. They thought that by exposing the issues, Americans of all races would see that economically empowering black neighborhoods benefits society as a whole. Instead, blacks refused to support their own, and others condemned their experiment. Drawing on economic research and social history as well as her personal story, Maggie Anderson shows why the black economy continues to suffer and issues a call to action to all of us to do our part to reverse this trend.

black owned accounting firms near me: Leading Issues in Black Political Economy Thomas D. Boston, 2018-01-16 Leading Issues in Black Political Economy brings together the foremost experts on issues ranging from employment, training, and education of African Americans. It also emphasizes macro-economic concerns of business development with special emphasis on long-term trends of black-owned businesses. The work emphasizes welfare considerations in an anti-welfare epoch, and the role of affirmative action now that it is under attack. Attention is given to the role of race in the continuing disparity of income distribution in American society. The highlights of Leading Issues include An Employment and Business Strategy for the Next Century: A Comment, by Thomas D. Boston; Long Term Trends and Prospects for Black-owned Business, by Andrew F. Brimmer; Is the U.S. Small Business Administration a Racist Institution? by Timothy Bates; Worker Re-Training and Labor Market Outcomes: A New Focus for Labor Research, by James B. Stewart; Race, Cognitive Skills, Psychological Capital, and Wages, by Arthur H. Goldsmith, William Darity, Jr., and Jonathan R. Veum; and Reparations and Public Policy, by Richard F. America. The overall findings suggest that empirical wage equation specifications do matter. The role of psychological capital is critical in the marketplace. Race is indeed an important determinant of wages-especially when the influence of both cognitive skills and psychological capital are included in the wage equation. This volume will be of crucial interest to economists, political scientists, sociologists, and policy analysts studying African-American life. Thomas D. Boston is editor of the Review of Black Political Economy and professor of economics at the Georgia Institute of Technology. He is the co-editor, with Catherine L. Ross, of The Inner City: Urban Poverty and Economic Development in the Next Century, also available from Transaction.

black owned accounting firms near me: Beyond WEIRD: Psychobiography in Times of Transcultural and Transdisciplinary Perspectives Claude-Hélène Mayer, Roelf van Niekerk, Paul J.P. Fouché, Joseph G. Ponterotto, 2023-05-27 This volume presents psychobiographical research in non-WEIRD—Western, Educated, Industrialized, Rich and Democratic—contexts and samples, focusing on culture, transcultural and transdisciplinary work. It creates a platform for researchers, scholars and scientists from diverse backgrounds to put forth new theoretical and methodological stances in psychobiography, thereby making the field more inclusive, diverse and equitable. The chapters in this volume investigate the role of context across the life course of non-WEIRD psychological subjects, as well as the interplay between them and their environments across the life

span. They further elucidate cognitive, affective and behavioural aspects of individuals with non-WEIRD backgrounds. The volume provides a broad and at the same time in-depth perspective into psychobiography beyond the usual contexts and therefore has new and original learnings to offer across disciplines and cultures. It is a breakthrough in terms of its transcultural and transdisciplinary insights into lives lived in different contexts in the world. Every person is in certain respects (a) like all other persons, (b) like some other persons, (c) like no other persons. This book is a challenging and fascinating exploration of extending psychobiography beyond its origins in Europe and America to women and men of different races and social and economic classes from Africa, Asia, and around the world. At its best, psychobiography can increase people's awareness of their own subjective experience and that of others, contributing to movements for social, cultural and political change. William McKinley Runyan, Professor Emeritus & Professor of the Graduate School, School of Social Welfare, U. of California Berkeley Beyond Weird is beyond needed. The book triumphantly fills the gap created by a dearth of studies of people other than Western, educated, European and American men. James William Anderson, PhD, Professor of Clinical Psychiatry and Behavioral Sciences, Northwestern University, Chicago.

black owned accounting firms near me: Women in Management Worldwide Ronald J. Burke, Astrid M. Richardsen, 2016-08-12 Organizations today are facing unprecedented challenges, including an ageing workforce, potential talent shortages, an increasingly competitive international environment and the need to utilize the talents of the best qualified people, regardless of gender. More women than men, in many cases, are graduating from universities and gaining the requisite experience to qualify for advancement to higher levels of management. In this expanded and revised third edition, Professors Burke and Richardsen, together with a list of international contributors, address women's progression in the workforce and into the upper echelons of management. They cover a range of professions and a geographically dispersed territory, thereby advancing the understanding of women in management within a traditional context, and making a substantial contribution to the literature for both an academic and practitioner audience. The broader regional perspective offers a comprehensive overview of the challenges and opportunities facing women in the workplace, and promotes the ongoing analysis of the interface between women's career aspirations and societal and organizational norms, assumptions and values. Following the same format as the previous edition, the country by country analysis allows for the data between countries and regions to be compared, for the differences to be addressed and a more holistic picture of the situation in a given country to be assessed. Women in Management Worldwide will appeal to researchers, policy-makers in a range of countries interested in workforce issues, talent management and gender equality, as well as consultants working with international organizations on HRM and organizational effectiveness challenges.
