**blueridge vista health and wellness: Time's Crossroads** Frank J. Batavick, 2017-08-07 The sleepy village of New Windsor, Md. could hear the cannons booming during the Battle of Gettysburg just 23 miles away, and the following year it was looted by Confederate cavalry. The town went on to become a popular resort for people from New York to Washington, D.C., and its yearly guest list included the Army officer who captured Geronimo. The town has been the home of famous artists and musicians in both the 19th and 20th century, including a man whose paintings sell for \$20 million + today, and another who was a Grammy Award winner and keyboardist for Elton John. There have been bank robberies, romantic scandals involving literary lions, and even an appearance by Julia Roberts who shot a film scene in the Methodist church. Read about these events and many other unique stories that have distinguished New Windsor, Maryland-the small town with a big history.

**blueridge vista health and wellness: The Computer-Based Patient Record** Committee on Improving the Patient Record, Institute of Medicine, 1997-10-28 Most industries have plunged into data automation, but health care organizations have lagged in moving patients' medical records from paper to computers. In its first edition, this book presented a blueprint for introducing the computer-based patient record (CPR). The revised edition adds new information to the original book. One section describes recent developments, including the creation of a computer-based patient

record institute. An international chapter highlights what is new in this still-emerging technology. An expert committee explores the potential of machine-readable CPRs to improve diagnostic and care decisions, provide a database for policymaking, and much more, addressing these key questions: Who uses patient records? What technology is available and what further research is necessary to meet users' needs? What should government, medical organizations, and others do to make the transition to CPRs? The volume also explores such issues as privacy and confidentiality, costs, the need for training, legal barriers to CPRs, and other key topics.

**blueridge vista health and wellness: Radical Remission** Kelly A. Turner, PhD, 2014-03-18 In her New York Times bestseller, *Radical Remission: Surviving Cancer Against All Odds*, Dr. Kelly A. Turner, founder of the Radical Remission Project, uncovers nine factors that can lead to a spontaneous remission from cancer—even after conventional medicine has failed. While getting her Ph.D. at the University of California, Berkley, Dr. Turner, a researcher, lecturer, and counselor in integrative oncology, was shocked to discover that no one was studying episodes of radical (or unexpected) remission—when people recover against all odds without the help of conventional medicine, or after conventional medicine has failed. She was so fascinated by this kind of remission that she embarked on a ten month trip around the world, traveling to ten different countries to interview fifty holistic healers and twenty radical remission cancer survivors about their healing practices and techniques. Her research continued by interviewing over 100 Radical Remission survivors and studying over 1000 of these cases. Her evidence presents nine common themes that she believes may help even terminal patients turn their lives around.

**blueridge vista health and wellness: Integrating Employee Health** Institute of Medicine,

Food and Nutrition Board, Committee to Assess Worksite Preventive Health Program Needs for NASA Employees, 2005-09-29 The American workforce is changing, creating new challenges for employers to provide occupational health services to meet the needs of employees. The National Aeronautics and Space Administration (NASA) workforce is highly skilled and competitive and employees frequently work under intense pressure to ensure mission success. The Office of the Chief Health and Medical Officer at NASA requested that the Institute of Medicine review its occupational health programs, assess employee awareness of and attitude toward those programs, recommend options for future worksite preventive health programs, and ways to evaluate their effectiveness. The committee's findings show that although NASA has a history of being forward-looking in designing and improving health and wellness programs, there is a need to move from a traditional occupational health model to an integrated, employee-centered program that could serve as a national model for both public and private employers to emulate and improve the health and performance of their workforces.

**blueridge vista health and wellness:** *Key Capabilities of an Electronic Health Record System* Institute of Medicine, Board on Health Care Services, Committee on Data Standards for Patient Safety, 2003-07-31 Commissioned by the Department of Health and Human Services, Key Capabilities of an Electronic Health Record System provides guidance on the most significant care delivery-related capabilities of electronic health record (EHR) systems. There is a great deal of

interest in both the public and private sectors in encouraging all health care providers to migrate from paper-based health records to a system that stores health information electronically and employs computer-aided decision support systems. In part, this interest is due to a growing recognition that a stronger information technology infrastructure is integral to addressing national concerns such as the need to improve the safety and the quality of health care, rising health care costs, and matters of homeland security related to the health sector. Key Capabilities of an Electronic Health Record System provides a set of basic functionalities that an EHR system must employ to promote patient safety, including detailed patient data (e.g., diagnoses, allergies, laboratory results), as well as decision-support capabilities (e.g., the ability to alert providers to potential drug-drug interactions). The book examines care delivery functions, such as database management and the use of health care data standards to better advance the safety, quality, and efficiency of health care in the United States.

**blueridge vista health and wellness:** *Help at Any Cost* Maia Szalavitz, 2006 The troubled-teen industry, with its scaremongering and claims of miraculous changes in behavior through harsh discipline, has existed in one form or another for decades, despite a dearth of evidence supporting its methods. And the growing number of programs that make up this industry are today finding more customers than ever. Maia Szalavitz's *Help at Any Cost* is the first in-depth investigation of this industry and its practices, starting with its roots in the cultlike sixties rehabilitation program Synanon and Large Group Awareness Training organizations likeest in the seventies; continuing with Straight, Inc., which received Nancy Reagan's seal of approval in the eighties; and culminating with a look at the World Wide Association of Specialty Programs-the leading force in the industry today-which has begun setting up shop in foreign countries to avoid regulation. Szalavitz uncovers disturbing findings about these programs' methods, including allegation of physical and verbal abuse, and presents us with moving, often horrifying, first-person accounts of kids who made it through-as well as stories of those who didn't survive. The book also contains a thoughtfully compiled guide for parents, which details effective treatment alternatives. The tabloids called her crazy and self-destructive and said she'd lost her mind. Now in her late twenties, Fiona believes her humiliating past is firmly behind her. She's finally regained a modicum of privacy, and she won't let anything—or anyone—mess it up. Unlike Fiona, Sam Fox, who played her older brother on the popular television
