bonita beauty wellness academy: **Black Looks** bell hooks, 2014-10-10 In the critical essays collected in *Black Looks*, bell hooks interrogates old narratives and argues for alternative ways to look at blackness, black subjectivity, and whiteness. Her focus is on spectatorship—in particular, the way blackness and black people are experienced in literature, music, television, and especially film—and her aim is to create a radical intervention into the way we talk about race and representation. As she describes: the essays in *Black Looks* are meant to challenge and unsettle, to disrupt and subvert. As students, scholars, activists, intellectuals, and any other readers who have engaged with the book since its original release in 1992 can attest, that's exactly what these pieces do.

bonita beauty wellness academy: America's Vital Interest in Global Health Institute of Medicine, Board on International Health, 1997-07-11 As populations throughout the world live longer, there is an increasing trend toward global commonality of health concerns. This trend mirrors a growing demand for health and access to new interventions to prevent, diagnose, and treat disease. The knowledge base required to meet these needs is not only of a technical kind, deriving from experiments of researchers, but must also draw from the experiences of governments in allocating resources effectively and efficiently to improve human health. This report from the Board

on International Health of the Institute of Medicine focuses on the interest of the United States in these global health transitions. The report argues that America has a vital and direct stake in the health of people around the globe, and that this interest derives from both America's long and enduring tradition of humanitarian concern and compelling reasons of enlightened self-interest.

bonita beauty wellness academy: In/Action Jinny Uppal, 2021-12-18 IN/ACTION - Rethinking the Path to Results explores the downside of the prevalent cultural bias for action even when it's unnecessary or counter-productive. Capturing insights into the benefits of reflective thinking and strategic inaction, author Jinny Uppal presents a less stressful and more efficient way of achieving more by doing less. The more ambitious and goal-oriented we are, the more we chase action to achieve desired outcomes, leading to fatigue, burnout, and mistakes. This book offers a counter-intuitive but masterful framework to leveraging thoughtful inaction as a choice to develop clarity in decision-making, leading to remarkable results. In this book, you will: learn from stories and insights from author Jinny Uppal's extensive business/life experience and interviews with over 30 successful global professionals; develop a framework on how to leverage reflective thinking and strategic inaction as a choice for better results; discover the role that thoughtful inactivity plays in driving creative thinking and progress through established research. This book is not about slowing down as an end goal or a productivity hack to getting more done in the day. IN/ACTION provides a way to achieve whatever we want without paying the price of nonstop doing.

bonita beauty wellness academy: Cycle of Lives David Richman, 2020-10-06 Have you ever been forced to consider the fact of your mortality? If confronted with cancer, how would you feel? What would you say to the people you love? What would they say to you? No two people have the same answers to these questions, a lesson I learned well during a solo six-week, 5,000-mile cross-country bike ride I called Cycle of Lives. The trip started as a fundraiser in honor of my sister, June, who died of brain cancer. But long before I even set out on my endurance ride from L.A. to Florida to N.Y., I exhaustively interviewed fifteen people across the country whose lives had also been irrevocably changed by cancer—either as patients, survivors, loved ones, or caregivers. Hearing their moving stories, which were influenced by many different forms of past and present trauma, transformed my cycling odyssey into a journey of emotional self-discovery as I relived the

chaos and emotional upheaval of cancer through them: from the man who found true love after losing his soulmate to cancer, to the elite athlete who had to reckon with his all-star body finally letting him down, to the medical oncologist who cares as much about her patients as she cares for them. Whether you or someone you care about is going through cancer or some other major trauma, I hope this thought-provoking collection of astonishing stories can help you, too.

bonita beauty wellness academy: Obstetric Myths Versus Research Realities Henci Goer, 1995-02-22 Anyone working to improve the childbearing experience and help women avoid unnecessary intervention has encountered numerous obstetric myths or old doctors' tales. And while the evidence in the medical literature may be solidly, often unequivocally, against whatever the doctor said, without access to that evidence, the pregnant woman is quite reasonably going to follow her doctor. This book is an attempt to make the medical literature on a variety of key obstetric issues accessible to people who lack the time, expertise, access, or proximity to a medical library to research concerns on their own. This compact, accurate, yet understandable reference is designed for people without medical training and organized for easy access. After an introductory chapter giving basic information about the different types of medical studies, how to evaluate them, and some basic statistical concepts, Goer provides chapters on cesarean issues, pregnancy and labor management, and a review of alternative approaches. Each chapter begins with a stated myth, followed by an examination of the reality. Goer then analyzes the mainstream belief, pointing out its fallacies. Then comes a list of significant points gleaned from the studies and keyed to her abstracts. Next is the outline by which the abstracts are grouped. Finally come the numbered abstracts of relevant articles published, in most cases, after 1980. The book concludes with a glossary of medical terms and an index. This compact, accurate, and understandable reference tool is designed for people without medical training as well as care givers.
