After suffering for years with a debilitating autoimmune disease and missing many of these special occasions herself, Danielle Walker has revived the joy that cooking for holidays can bring in Danielle Walker's *Against All Grain Celebrations*, a collection of recipes and menus for twelve special occasions throughout the year. Featuring a variety of birthday cakes, finger foods to serve at a baby or bridal shower, and re-creations of backyard barbecue standards like peach cobbler and corn bread, Danielle includes all of the classics. There's a full Thanksgiving spread—complete with turkey and stuffing, creamy green bean casserole, and pies—and menus for Christmas dinner; a New Year's Eve cocktail party and Easter brunch are covered, along with suggestions for beverages and cocktails and the all-important desserts. Recipes can be mixed and matched among the various occasions, and many of the dishes are simple enough for everyday cooking. Stunning full-color photographs of every dish make browsing the pages as delightful as cooking the recipes, and beautiful party images provide approachable and creative entertaining ideas. Danielle has transformed her most cherished family traditions into trustworthy recipes you can feel confident serving, whether you're hosting a special guest with food allergies, or cooking for a crowd of regular grain-eaters.

bridgewater massage and wellness: *L'sitkuk* Darlene Anne Ricker, 1997 L'sitkuk (pronounced elsetkook) is the original name for the Bear River Mi'kmaw community, which is part of the Mi'kmaw First Nation. Nestled close to the Bear River watershed, this tiny native community is regaining its culture, language and identity after hundreds of years of colonialism and assimilation. Living in the area for thousands of years, they were among the first people in Canada to have continuous contact with non-natives. This book preserves the memory of the elders through oral histories and old photographs, and tells who these people are and how they survived, prospered and sustained one another. The stories of everyday life reflect native values and the strong ideal of interconnectedness in the community. Darlene A. Ricker listened to the stories and learned about the traditions and culture of the closely knit Mi'kmaw community at Bear River. From her interviews with elders and young people, she has drawn this poignant oral history.

This collection of more than thirty contemporary, true, feel-good stories spotlights the beauty of being rescued--dogs rescued by people, people rescued by dogs, and even dogs who rescue other

bridgewater massage and wellness: Your Body Knows How to Heal Melissa Samartano, 2019-05 As the founder of the Holistic Counseling Center in Raynham, Massachusetts, I talk with people every day who are struggling. A full ninety percent of the patients who seek out my services are so stressed it's taking a toll on their health--they're experiencing lack of sleep, irritability, anxiety, and even actual medical conditions such as autoimmune diseases, infertility, digestive issues, diabetes, migraines, and cardiovascular illness. Most of them have already been to their primary care physician and left with a prescription for Lexapro, hoping that will help. When Lexapro didn't work, they moved on to Zoloft, then Celexa. But they don't get the sense of relief they're craving. In fact, what they've gotten is a new set of side effects that they now have to manage. They're looking for a different way, and that's why they call me. Maybe they heard me speak on mindfulness at a health conference, or they took one of my yoga classes that I teach every week. Many find me by searching for stress relief on the Psychology Today website. So many of these people seek me out--over 2,000 walked through the doors of my practice in 2017 alone--that I can't keep up with the demand. That's why I'm writing Your Body Knows How to Heal--as much as I love working with people one-on-one, I can't reach everyone who needs help that way. I keep hiring clinicians to increase the number of people we can serve

bridgewater massage and wellness: Touch, second edition Tiffany Field, 2014-10-10 Why we need a daily dose of touch: an investigation of the effects of touch on our physical and mental well-being. Although the therapeutic benefits of touch have become increasingly clear, American society, claims Tiffany Field, is dangerously touch-deprived. Many schools have "no touch" policies; the isolating effects of Internet-driven work and life can leave us hungry for tactile experience. In this book Field explains why we may need a daily dose of touch. The first sensory input in life comes from the sense of touch while a baby is still in the womb, and touch continues to be the primary means of learning about the world throughout infancy and well into childhood. Touch is critical, too, for adults' physical and mental health. Field describes studies showing that touch therapy can benefit everyone, from premature infants to children with asthma to patients with conditions that range from cancer to eating disorders. This second edition of *Touch*, revised and updated with the latest research, reports on new studies that show the role of touch in early development, in communication (including the reading of others' emotions), in personal relationships, and even in sports. It describes the physiological and biological effects of touch, including areas of the brain affected by touch, and the effects of massage therapy on prematurity, attentiveness, depression, pain, and immune functions. Touch has been shown to have positive effects on growth, brain waves, breathing, and heart rate, and to decrease stress and anxiety. As Field makes clear, we enforce our society's touch taboo at our peril.
