A man might read about the color of our hats, but it is unlikely he would be faced with a spiritual discussion of the colors as they relate to the Craft. The time has come for such a book. builders guide to accounting: Profit First Mike Michalowicz, 2017-02-21 Author of cult classics *The Pumpkin Plan* and *The Toilet Paper Entrepreneur* offers a simple, counterintuitive cash management solution that will help small businesses break out of the doom spiral and achieve instant profitability. Conventional accounting uses the logical (albeit, flawed) formula: Sales - Expenses = Profit. The problem is, businesses are run by humans, and humans aren't always logical. Serial entrepreneur Mike Michalowicz has developed a behavioral approach to accounting to flip the formula: Sales - Profit = Expenses. Just as the most effective weight loss strategy is to limit portions by using smaller plates, Michalowicz shows that by taking profit first and apportioning only what remains for expenses, entrepreneurs will transform their businesses from cash-eating monsters to profitable cash cows. Using Michalowicz's Profit First system, readers will learn that: · Following 4 simple principles can simplify accounting and make it easier to manage a profitable business by looking at bank account balances. · A small, profitable business can be worth much more than a large business surviving on its top line. · Businesses that attain early and sustained profitability have a better shot at achieving long-term growth. With dozens of case studies, practical, step-by-step advice, and his signature sense of humor, Michalowicz has the game-changing roadmap for any entrepreneur to make money they always dreamed of.

builders guide to accounting: Build Tony Fadell, 2022-05-03 **New York Times, Wall Street

Journal, and USAToday Bestseller** Tony Fadell led the teams that created the iPod, iPhone and Nest Learning Thermostat and learned enough in 30+ years in Silicon Valley about leadership, design, startups, Apple, Google, decision-making, mentorship, devastating failure and unbelievable success to fill an encyclopedia. So that's what this book is. An advice encyclopedia. A mentor in a box. Written for anyone who wants to grow at work—from young grads navigating their first jobs to CEOs deciding whether to sell their company—Build is full of personal stories, practical advice and fascinating insights into some of the most impactful products and people of the 20th century. Each quick 5-20 page entry builds on the previous one, charting Tony's personal journey from a product designer to a leader, from a startup founder to an executive to a mentor. Tony uses examples that are instantly captivating, like the process of building the very first iPod and iPhone. Every chapter is designed to help readers with a problem they're facing right now—how to get funding for their startup, whether to quit their job or not, or just how to deal with the jerk in the next cubicle. Tony forged his path to success alongside mentors like Steve Jobs and Bill Campbell, icons of Silicon Valley who succeeded time and time again. But Tony doesn't follow the Silicon Valley credo that you have to reinvent everything from scratch to make something great. His advice is unorthodox because it's old school. Because Tony's learned that human nature doesn't change. You don't have to reinvent how you lead and manage—just what you make. And Tony's ready to help everyone make things worth making.
