- I. Defining "Business Tower Hotel" in the Peruvian Context

What constitutes a Business Tower Hotel in Peru?

While there isn't a formal definition, a Peruvian "Business Tower Hotel" typically implies a modern, high-rise hotel in a major city, offering upscale amenities and services tailored to business travelers, but also catering to leisure guests. These hotels often feature state-of-the-art facilities, strategic locations, and a focus on efficiency and comfort.

- II. Location Advantages of Business Tower Hotels in Peru's Major Cities

Prime Locations in Lima: Proximity to Business Districts

Many Business Tower Hotels in Lima, Peru's capital, are strategically located near the city's major financial districts, offering easy access to businesses, conference centers, and important government institutions. This minimizes commute times and maximizes productivity.

Convenient Access in Cusco: Balancing Business and Tourism

In Cusco, a city rich in history and tourism, Business Tower Hotels often occupy central locations, providing convenient access to both business meetings and the city's incredible Inca heritage sites. This dual accessibility is a significant advantage.

Strategic Positioning in Arequipa: Modern Amenities in a Historic Setting

Arequipa, another significant Peruvian city, features Business Tower Hotels that blend modern convenience with the city's stunning colonial architecture and historical landmarks. This creates a unique experience for both business and leisure travelers.

III. Amenities and Services Expected in a Peruvian Business Tower Hotel

High-Speed Internet and Business Centers: Essential for Productivity

High-speed internet access and well-equipped business centers are standard features, reflecting the importance of connectivity for business travelers. Meeting rooms, printing facilities, and secretarial services are also commonly available.

Luxury Accommodations and Exquisite Dining Options: Elevating the Experience

Expect luxurious accommodations, including spacious rooms, comfortable beds, and modern bathrooms. High-quality dining options, often including international and Peruvian cuisine, contribute to the overall upscale experience.

Boutique Hotels: Intimate Charm versus Corporate Amenities

Boutique hotels offer a more intimate experience, but may lack the extensive business-focused amenities of a Business Tower Hotel.

Luxury Resorts: Relaxation Focus versus Business-Centric Services

Luxury resorts prioritize relaxation and leisure, making them less suited for business travelers primarily concerned with productivity.

VI. The Business Traveler's Perspective: Productivity and Convenience

Time-Saving Features: Maximizing Efficiency

The proximity of Business Tower Hotels to business districts and their on-site amenities significantly reduce travel time and enhance overall efficiency for business travelers.

Meeting Room Facilities: Seamless Business Operations

business tower hotel peru: The Report: Peru 2015 Oxford Business Group, 2015-01-12
Expanding at an average rate of 6.4% per annum since the mid-2000s, Peru's economic growth has been remarkable, but also heavily dependent on one sector. Driven by a sharp rise in commodity prices, the mining industry spurred Peru's economy to the fastest sustained growth rate in Latin America during much of the past decade. The end of the commodities supercycle however, saw economic growth slow down substantially over the course of 2014, with the central bank revising growth projections to 3.1% in mid-October. In a bid to stimulate growth, the government has intensified diversification efforts and introduced a series of measures aimed at promoting investment. The current economic slowdown, attributable in part to delays in some major mining developments, is generally seen as a temporary one, and growth is expected to pick up again in 2015. While mining will remain the backbone of the Peruvian economy - in particular from 2016 and beyond as several large-scale copper projects come on-line - other sectors, including industry and tourism, should begin to play increasingly important roles.

A company whose gross turnover for just one financial year is sufficient to buy at current market value the world's three largest public companies: General Electric, Royal Dutch Shell and Microsoft. A company that if it dipped into its petty cash could in the same year also buy Coca-Cola. A company where ten days' turnover is in excess of the combined assets of the world's top fifty banks. It exists. Its current annual turnover of more than \$500 billion is derived from just three products: heroin, cocaine, marijuana.
