A chillingly charismatic aristocrat. And a brave socialite drawn to expose their treacherous secrets. . . . From the author of Gods of Jade and Shadow comes “a terrifying twist on classic gothic horror” (Kirkus Reviews) set in glamorous 1950s Mexico. After receiving a frantic letter from her newly-wed cousin begging for someone to save her from a mysterious doom, Noemí Taboada heads to High Place, a distant house in the Mexican countryside. She’s not sure what she will find—her cousin’s husband, a handsome Englishman, is a stranger, and Noemí knows little about the region. Noemí is also an unlikely rescuer: She’s a glamorous debutante, and her chic gowns and perfect red lipstick are more suited for cocktail parties than amateur sleuthing. But she’s also tough and smart, with an indomitable will, and she is not afraid: Not of her cousin’s new husband, who is both menacing and alluring; not of his father, the ancient patriarch who seems to be fascinated by Noemí; and not even of the house itself, which begins to invade Noemí’s dreams with visions of blood and doom. Her only ally in this inhospitable abode is the family’s youngest son. Shy and gentle, he seems to want to help Noemí, but might also be hiding dark knowledge of his family’s past. For there are many secrets behind the walls of High Place. The family’s once colossal wealth and faded mining empire kept them from prying eyes, but as Noemí digs deeper she unearths stories of violence and madness. And Noemí, mesmerized by the terrifying yet seductive world of High Place, may soon find it impossible to ever leave this enigmatic house behind. “It’s as if a supernatural power compels us to turn the pages of the gripping Mexican Gothic.”—The Washington Post “Mexican Gothic is the perfect summer horror read, and marks Moreno-Garcia with her hypnotic and engaging prose as one of the genre’s most exciting talents.”—Nerdist “A period thriller as rich in suspense as it is in lush ’50s atmosphere.”—Entertainment Weekly

catalia beauty and wellness: Teachers of Color Rita Kohli, 2021-06 Teachers of Color describes how racism serves as a continuous barrier against diversifying the teaching force and offers tools to support educators who identify as Black, Indigenous, or people of Color on both a systemic and interpersonal level. Based on in-depth interviews, digital narratives, and questionnaires, the book analyzes the toll of racism on their professional experiences and personal wellbeing, as well as their resistance and reimagination of schools. Teacher educator and educational researcher Rita Kohli documents the hostile racial climate that teachers of color experience over the course of their academic and professional lives—first as students and preservice teachers and later in their classrooms and schools. She also highlights the tools of resistance these teachers employ to challenge institutionalized oppression and the kinds of professional development and support they need to thrive. Analyzed through the lens of critical race theory, Teachers of Color exposes the ongoing racialization via counter-stories from thirty racially, geographically, and professionally diverse educators. The book concludes with recommendations that various education stakeholders can employ to improve the racial climates of schools and support the growing diversity of the teaching force. At this critical moment, Kohli offers readers an opportunity to strengthen their racial literacies and better understand the strengths, struggles, and power of teachers of color.

catalia beauty and wellness: Change(d) Agents Betty Achinstein, Rodney T. Ogawa, 2011-06-10 This book examines both the promise and complexity of diversifying today's teaching profession. Drawing from a 5-year study of 21 new teachers of colour working in urban, hard-to-staff schools, this book uncovers a systemic paradox that the teachers confront. They are committed to improving educational opportunities for students of colour by acting as role models, culturally/linguistically responsive teachers, and change agents. The teaching profession encouraged such commitments and some teachers acted with support from individual, organizational, and community-based sponsors. However, many of these new teachers work in schools that are culturally subtractive and have restrictive accountability policies that challenge their ability to perform cultural/professional roles to which they are committed. Many teachers internalize the contradiction, resulting in their becoming changed agents within the educational system they sought to change. This book is essential reading for educators, leaders, and policymakers.

Pharma, Biotech, Device Companies4. Patients and Consumers5. Employers, Insurers, Regulators6. Gadgets, Apps, Technology7. Behavior, Design, and Translation8. Big Data, Measurement, and Metrics9. VCs and Other Investors10. Innovation---Health matters. “When you have your health, you have everything,” wrote memoirist Augusten Burroughs. “When you do not have your health, nothing else matters at all.” Health can also be very expensive, and reducing costs isn’t easy, since as Stanford health policy expert Victor Fuchs famously observed, “Every dollar of waste is income to some individual or organization.” One key challenge healthcare faces today is figuring out how to maintain health and deliver better care for patients while somehow keeping in check the overall costs associated with these activities. The good news is that there is now the massive potential for healthcare transformation. Data-driven analysis has called into question many traditional healthcare assumptions, and permits us to view the challenges in a fresh light. For instance, there seems to be little correlation between healthcare cost and quality—and great care can be delivered at lower cost if we can improve the alignment of incentives among patients, payers, and providers. Key drivers of healthcare change are the intense economic pressure of healthcare costs, the impact—to be determined—associated with the implementation of the Affordable Care Act, and the advent of inexpensive and widely accessible technologies; together these have created a platform for industry transformation the likes of which has not been seen since the dawn of modern surgery. And it’s about time. Technology has been used to optimize and redefine virtually every key industry except healthcare. Manufacturing has gone from human assembly lines to robotics; banking has gone from tellers to home banking; travel has gone from agents with brochures to Travelocity; and yet the practice of medicine, in many ways, hasn’t changed in decades. Many of today’s most passionate entrepreneurs are trying to bring the dazzle and real promise of technology innovation to the challenges of healthcare, resulting in an explosion of companies focused on everything from wearable sensors and weight-loss apps to big data analytics and GPS-tagged hospital equipment—the “internet of things.” These emerging tools and promising technologies—which collectively comprise “digital health”—offer a promising path forward, and entrepreneurs and innovators are forging forward seeking to make a real difference in a field which we all need but which is sorely in need of its own tender loving care if it is to flourish in tomorrow’s world. As Hippocrates once said, “Healing is a matter of time, but it is sometimes also a matter of opportunity.” And technology—if judiciously applied—may be just the tonic to help reinvigorate the health of our healthcare industry. The key challenge faced by would-be disruptive technologists is not only recognizing potentially useful analogs from other industries, but also understanding the ways in which health remains fundamentally different. Amid the clamor to disrupt healthcare, we should also take care to preserve and augment what may be right about medicine—the doctor/patient relationship for example, or the drive of inquisitive physicians, especially within academic centers, to

continuously push and challenge the limits of what is known and what is possible. In Tech Tonics—a distillation of our writing and thinking over the last several years—we introduce the reader to the fascinating digital health space, including a ground-level view of the landscape, the structural challenges, the players, and the progress.

catalia beauty and wellness: No Filter and Other Lies Crystal Maldonado, 2022-02-08 You should know, right now, that I'm a liar. They're usually little lies. Tiny lies. Baby lies. Not so much lies as lie adjacent. But they're still lies... Golden-haired Max Monroe has it all: beauty, friends, and tons of followers. Her picture-perfect existence seems eminently enviable. Except it's all fake. Max is actually Kat Sanchez, a quiet and sarcastic 17-year-old living in drab Bakersfield, California. Nothing glamorous about her existence—just bad house parties, a crap school year, and the awkwardness of dealing with best friend Hari's unrequited love. But while Kat's life is far from perfect, she thrives as Max: doling out advice, sharing beautiful photos, networking with fans, even finding a real friend (or more?—Is Kat into girls!?) in a gorgeous Fat follower named Elena. But the closer Elena and Max get, the more Kat feels she has to keep up the façade. Max is the first time people have really listened to what Kat has to say—and after a lifetime of invisibility (including ice-cold indifference from her parents) can she really give that up? But when one of Kat's posts goes viral and gets back to the girl she's been stealing photos from, her entire world—real and fake—comes crashing down around her. Can she escape the web of lies she's woven without hurting the people she loves? This insightful, provocative novel—hilarious and raw by turns—is the second book from Crystal Maldonado, author of smash-hit New England Book Award Winner *Fat Chance*, Charlie Vega. Brilliantly plotted, deeply sensitive, and rich in voice, *No Filter and Other Lies* deftly addresses FOMO, first love, one-sided love, frayed family ties, raced exclusion on social media, queer awakenings, and learning to live with—and love—yourself. catalia beauty and wellness: Balanced Constitutionalism Chintan Chandrachud, 2020-05 The Human Rights Act (HRA) of the UK, 1998, unlike systems of parliamentary sovereignty and judicial supremacy, promised a new, 'balanced' model for the protection of rights, which conferred courts with limited power of review over legislation. catalia beauty and wellness: *The Wind in My Hair* Masih Alinejad, 2018-05-29 An extraordinary memoir from an Iranian journalist in exile about leaving her country, challenging tradition and sparking an online movement against compulsory hijab. A photo on Masih's Facebook page: a woman standing proudly, face bare, hair blowing in the wind. Her crime: removing her veil, or hijab, which is compulsory for women in Iran. This is the self-portrait that sparked 'My Stealthy Freedom,' a social media campaign that went viral. But Masih is so much more than the arresting face that sparked a campaign inspiring women to find their voices. She's also a world-class journalist whose personal story, told in her unforgettably bold and spirited voice, is emotional and inspiring. She grew up in a traditional village where her mother, a tailor and respected figure in the community, was the exception to the rule in a culture where women reside in their husbands' shadows. As a teenager, Masih was arrested for political activism and was surprised to discover she was pregnant while in police custody. When she was released, she married quickly and followed her young husband to Tehran where she was later served divorce papers to the shame and embarrassment of her religiously conservative family. Masih spent nine years struggling to regain custody of her beloved only son and was forced into exile, leaving her homeland and her heritage. Following Donald Trump's notorious immigration ban, Masih found herself separated from her child, who lives abroad, once again. A testament to a spirit that remains unbroken, and an enlightening, intimate invitation into a world we don't know nearly enough about, *The Wind in My Hair* is the extraordinary memoir of a woman who overcame enormous adversity to fight for what she believes in, and to encourage others to do the same.

But that's just the tip of the iceberg for Cassandra Palmer, aka the Pythia, the freshly minted chief seer of the supernatural world.
