cedar counseling and wellness: The Interventionist Joani Gammill, 2011-04-20 Inspiring stories from the frontlines of the battle against addiction by Dr. Phil's leading interventionist and recovering addict Joani Gammill. Exuding the same passion and purpose as the author herself, Joani

Gammill's *The Interventionist* is a heartfelt game changer and long overdue. You deserve to read it. --Dr. Phil McGraw, host of CBS's nationally syndicated show *Dr. Phil*

Joani Gammill, an average suburban mom on the outside, was secretly addicted to multiple forms of opiates and amphetamine for years, and almost died as a result. Through the life-changing intervention staged by Dr. Phil on his show, Gammill not only committed to getting help for her addiction, but she also went on to become a professional interventionist, helping thousands of others in distress. In *The Interventionist*, she intertwines her experiences with depictions of her often harrowing and always inspiring interventions of the addicts and families she's worked with over the years. In each chapter she recounts details of a client's unique battle with addiction and the devastation that led to a loved one's request for her help. Gammill's intriguing story--and the equally captivating stories of the brave people who come to her for help--demonstrates how it is possible to emerge from the seemingly hopeless world of out-of-control drug use and not only regain one's sanity, but actually discover that life clean and sober can be more meaningful than it ever was before.

cedar counseling and wellness: *Forward-Facing Trauma Therapy* J. Eric Gentry, 1961-09-01 In this groundbreaking book, trauma expert J. Eric Gentry builds upon the pioneering insights of such luminaries as neuroscientist Stephen Porges, Judith Herman and Bessel van der Kolk to introduce Forward-Facing Trauma Therapy (FFTT), the next evolutionary leap in the treatment of traumatic stress. Unlike many traditional psychotherapies, FFTT eschews the assumption that psychological problems are caused by our faulty perceptions and skewed thought processes. Instead, FFTT addresses trauma and its destructive symptomology at its source: overcharged autonomic nervous systems and hypervigilant threat response resulting from our adaptation to painful past experiences. Dr. Gentry provides a step-by-step guide for implementing a three-pronged methodology and explains how and why the techniques work so effectively. He also demonstrates how anyone experiencing stress can apply FFTT to achieve immediate change and an enduring sense of joy, self-worth, and personal integrity.

cedar counseling and wellness: *Nature is Nurture* Megan E. Delaney, 2020 From foraging and hunting for food to (more recently) finding solace and peace in a beautiful vista, humans have long interacted with the natural world. Though a connection to nature runs deep in our DNA, however, people of the modern age are indoors almost 93% of the day. With that said, there is a growing evidence suggests that the natural world promotes mental and physical well-being, including stress relief, improved mood, and neurological benefits. Ecotherapy, a steadily developing but lesser-known construct in mental health, explores the reciprocal relationship humans have with nature and its capacity to build strength and provide healing. *Nature Is Nurture* provides an overview of the theoretical concepts and empirical bases of ecotherapy via historical considerations and recent research within the discipline. Chapters share practical ways to incorporate ecotherapy with children, adults, and veteran populations; within schools; and in group work. Descriptions of modalities such as animal-assisted, equine-assisted, horticultural, forest-bathing, green-exercise, and adventure-based therapy are also included alongside case examples, techniques, and practical and ethical considerations. In examining the impact of improved physical and mental wellness for all clients, this book provides counselors, therapists, social workers, and psychologists with the knowledge and techniques to infuse ecotherapy into everyday practice.

cedar counseling and wellness: Hair Like a Fox Danny Roddy, 2013 While it is often stated with great confidence that pattern baldness is the result of defective genes and male androgenic hormones (e.g., testosterone, DHT), the theory is physiologically unsound. In fact, after 60 years of research the genetic-androgen doctrine has produced a single FDA-approved therapy that works less than 50% the time and can result in permanent chemical castration. ...Standing on the shoulders of giants (e.g., Otto Warburg, Albert Szent-Györgyi, Gilbert Ling, Ray Peat and others), Hair Like a Fox sets up an alternative bioenergetic model of pattern hair loss with a focus on the smallest unit of life, the cell. This same context elucidates simple yet effective therapies for halting and perhaps reversing pattern hair loss in a way that harmonizes with our unique physiology--Amazon.com.

cedar counseling and wellness: Complementary and Alternative Medicine in the United States Institute of Medicine, Board on Health Promotion and Disease Prevention, Committee on the Use of Complementary and Alternative Medicine by the American Public, 2005-04-13 Integration of complementary and alternative medicine therapies (CAM) with conventional medicine is occurring in hospitals and physicians offices, health maintenance organizations (HMOs) are covering CAM therapies, insurance coverage for CAM is increasing, and integrative medicine centers and clinics are being established, many with close ties to medical schools and teaching hospitals. In determining what care to provide, the goal should be comprehensive care that uses the best scientific evidence available regarding benefits and harm, encourages a focus on healing, recognizes the importance of compassion and caring, emphasizes the centrality of relationship-based care, encourages patients to share in decision making about therapeutic options, and promotes choices in care that can include complementary therapies where appropriate. Numerous approaches to delivering integrative medicine have evolved. Complementary and Alternative Medicine in the United States identifies an urgent need for health systems research that focuses on identifying the elements of these models, the outcomes of care delivered in these models, and whether these models are cost-effective when compared to conventional practice settings. It outlines areas of research in

convention and CAM therapies, ways of integrating these therapies, development of curriculum that provides further education to health professionals, and an amendment of the Dietary Supplement Health and Education Act to improve quality, accurate labeling, research into use of supplements, incentives for privately funded research into their efficacy, and consumer protection against all potential hazards.

cedar counseling and wellness: Refuge Recovery Noah Levine, 2014-06-10 Bestselling author and renowned Buddhist teacher Noah Levine adapts the Buddha's Four Noble Truths and Eight Fold Path into a proven and systematic approach to recovery from alcohol and drug addiction—an indispensable alternative to the 12-step program. While many desperately need the help of the 12-step recovery program, the traditional AA model's focus on an external higher power can alienate people who don't connect with its religious tenets. Refuge Recovery is a systematic method based on Buddhist principles, which integrates scientific, non-theistic, and psychological insight. Viewing addiction as cravings in the mind and body, Levine shows how a path of meditative awareness can alleviate those desires and ease suffering. Refuge Recovery includes daily meditation practices, written investigations that explore the causes and conditions of our addictions, and advice and inspiration for finding or creating a community to help you heal and awaken. Practical yet compassionate, Levine's successful Refuge Recovery system is designed for anyone interested in a non-theistic approach to recovery and requires no previous experience or knowledge of Buddhism or meditation.
