chat gpt business plan: How To Use AI Chat GPT in Your Online Business Michael Mathiesen, 2023-03-15 This is the first book about the proper use of the new AI (Artificial Intelligence) Chatbot known as GPT-3 in any online business, network marketing, or affiliate marketing to be authored by an Artificially Intelligent being. In my business, I have access to the AI Chat window and I offer the same to any of my readers, through my website - MyMainGig.Now.Site. So, I consider myself to be the PUBLISHER and a contributor to this book, but not the real author. But in the final production of the book, I asked the AI creature that I had been dealing with and who I named 'Orac' to write a description of the book we had been working on and he came up with something completely unfamiliar to me. I decided to keep it. It's odd because when I asked my AIChatGPT assistant, Orac, to describe the book he had just authored for me he described an entirely different book - a book about himself within a science fiction story. I can't understand how this happened, but I have decided to show it here so that it will be preserved for the future. Remember, the book that he wrote and that is for sale here and now is a business book about how to use AI in your Affiliate Marketing or in any online business. Don't buy it if you're looking for a work of fiction. Maybe that will be next.

chat gpt business plan: The AI Mirror Shannon Vallor, 2024 For many, AI technology inspires hope for the future-the promise of shared human flourishing and collective liberation from drudgery that defines the good life, but always seems to elude our species. Yet today's AI technology is forged from human-generated data into immensely powerful but flawed mirrors that endlessly reflect the same errors, biases and failures of wisdom we are striving to escape. To open new futures for ourselves with these tools is as misguided as gazing into a mirror while trying to climb an uncharted mountain. At this crucial juncture for humanity and our planet, we need something new from AI, and more importantly, from ourselves. We need to find new hope-not to surrender our greatest moral and intellectual ambitions to machines that have none, but to renew those ambitions, collectively, for ourselves. Shannon Vallor makes a wide-ranging, prophetic, and philosophical case for what AI could be, and what we can be with it. She calls us to reclaim our human potential for moral and intellectual growth, rather than losing sight of our shared humanity as we gaze dully into our AI mirrors.

chat gpt business plan: Make Money From Faceless YouTube Automation MRR By Khaled Baoween Khaled Baoween, 2024-04-17 Faceless YouTube Automation MRR appears to refer to a concept or a business model related to generating Monthly Recurring Revenue (MRR) through automated YouTube content creation or management without revealing the creator's identity or showing their face on the platform. This could involve various strategies such as: Automated Content Creation: Using software or algorithms to generate and upload videos automatically based on certain criteria like trending topics, keywords, or specific niches. Content Curation: Curating existing videos from other creators or sources and compiling them into thematic playlists or channels. Monetization Strategies: Implementing various monetization methods such as ads, sponsorships, affiliate marketing, or selling digital products/services related to the content niche. SEO and Marketing Automation: Leveraging automation tools for search engine optimization (SEO),

social media marketing, and audience engagement to drive traffic and increase visibility.

Outsourcing and Delegation: Hiring freelancers or virtual assistants to handle different aspects of content creation, management, and promotion. The term faceless suggests that the creator prefers to remain anonymous or undisclosed, possibly to avoid personal branding or to maintain privacy. This approach allows focusing solely on the content and its profitability without associating it with a specific individual. MRR, or Monthly Recurring Revenue, is a key metric for subscription-based businesses, indicating the predictable revenue generated from subscriptions or recurring payments on a monthly basis. In the context of YouTube, it could refer to the consistent revenue generated from ad monetization, memberships, or other recurring sources. Combining automation with YouTube content creation can streamline processes, scale operations, and potentially generate passive income over time. However, it's essential to adhere to YouTube's policies and guidelines to ensure compliance and avoid penalties such as demonetization or account suspension.

chat gpt business plan: *Buying Complex IT Systems* Matthew Reynolds, 2024-03-15 Many of us have had experiences of using IT systems at work that just don't work right or cause more problems than they solve. Even if we've been lucky at work and always had the opportunity to use well-built and functional IT systems, it's common to hear in the press or in our day-to-day lives about IT systems that are down or slow, or just do not work right. While it can be inconvenient to have to use IT systems that aren't the best for businesses, buying an IT system that isn't fit for its intended purpose can have devastating effects on the business itself and the careers of the people involved. The senior team of any business will know everything there is to know about their specific business or market, but their job is not to implement IT systems. This brings an inherent unfairness to IT systems procurement because it makes it very easy to buy the wrong thing at the wrong price. In essence, the buyers are amateurs but the sellers are professionals. This mismatch is at the root of

the majority IT systems failures – a problem which might cost a company millions of dollars and negatively impact work. This book is intended to be a practical manual for senior leaders in small-to-medium businesses that will teach them how to buy IT systems effectively – i.e. to somewhat transform the non-IT senior leadership personnel such that they are more informed and capable buyers. There are a million-and-one potholes that can trip up a business, even when buying from an otherwise effective and reputable seller, and this book looks to make it far more likely that the reader will buy the right system, at the right price. The author uses his extensive experience to highlight problem areas and offer solutions to eliminate them.
