This book fills that gap in English information and provides a detailed, up-to-date guide to performing safe and effective cervical laminoplasty. **colonia spine and wellness: Emergent Public Health Issues in the US-Mexico Border Region** Cecilia Ballesteros Rosales, Scott Carter Carvajal, Jill Eileen Guernsey De Zapien, 2017-02-16 US-Mexico border region area has unique social, demographic and policy forces at work that shape the health of its residents as well as serves as a microcosm of migration health challenges facing an increasingly mobile and globalized world. This region reflects the largest migratory flow between any two nations in the world. Data from the Pew Research Center shows over the last 25 years there has never been lower than 140,000 annual immigrants from Mexico to the United States (with peaks over 700,000). This migratory route is extremely hazardous due to natural (e.g., arid and hot desert regions) and human made barriers as well as border enforcement practices tied to socio-political and geopolitical pressures. Also, reflecting the national interdependency of public health and human services needs, during the most recent five year period surveyed the migratory flow between the US and Mexico has equaled that of the flow of Mexico to the US--both around 1.4 million persons. Of particular public health concern, within the US-Mexico region of both nations there is among the highest disparities in income, education, infrastructure and access to health care--factors within the World Health Organization's conceptualization of the Social Determinants of Health, and among the highest rates of chronic disease. For instance obesity and diabetes rates in this region are among the highest of those monitored in the world, with adult population estimates of the former over 40% and estimates in some population sub-groups for the latter over 20%. The publications reflected in this Research Topic, all reviewed from experts in the field, addressed many of the public health issues in the US Mexico Border Health Commission's Healthy Border 2020 objectives. Those objectives-- broad public health goals used to guide a diverse range of government, research and community-based stakeholders--include Non Communicable Diseases (including adult and childhood obesity-related ones; cancer), Infectious Diseases (e.g., tuberculosis; HIV; emerging diseases--particularly mosquito borne illnesses), Maternal and Child Health, Mental Health Disorders, and Motor Vehicle Accidents. Other relevant public health issues affecting this region, for example environmental health, binational health services coordination (e.g., immunization), the impact of migration throughout the Americas and globally in this region, health issues related to the physical climate, access to quality health care, discrimination/mistreatment and well-being, acculturative/immigration stress, violence, substance use/abuse, oral health, respiratory disease, and well-being from a social determinants of health framework, are critical areas addressed in these publications or for future research. Each of these Research Topic publications presented applied solutions (e.g., new programs, technology or infrastructure) and/or public health policy recommendations relevant to each public health challenge addressed.

**colonia spine and wellness: *The Border and Its Bodies*** Thomas E. Sheridan, Randall H. McGuire, 2019-11-12 *The Border and Its Bodies* examines the impact of migration from Central America and México to the United States on the most basic social unit possible: the human body. It explores the terrible toll migration takes on the bodies of migrants—those who cross the border and those who die along the way—and discusses the treatment of those bodies after their remains are discovered in the desert. The increasingly militarized U.S.-México border is an intensely physical place, affecting the bodies of all who encounter it. The essays in this volume explore how crossing becomes embodied in individuals, how that embodiment transcends the crossing of the line, and how it varies depending on subject positions and identity categories, especially race, class, and citizenship. Timely and wide-ranging, this book brings into focus the traumatic and real impact the border can have on those who attempt to cross it, and it offers new perspectives on the effects for rural communities and ranchers. An intimate and profoundly human look at migration, *The Border and Its Bodies* reminds us of the elemental fact that the border touches us all.

**colonia spine and wellness: *The Museum of Innocence*** Orhan Pamuk, 2011-08-05 *The Museum of Innocence* - set in Istanbul between 1975 and today - tells the story of Kemal, the son of one of Istanbul's richest families, and of his obsessive love for a poor and distant relation, the beautiful Fusun, who is a shop-girl in a small boutique. In his romantic pursuit of Füsün over the next eight years, Kemal compulsively amasses a collection of objects that chronicles his lovelorn progress—a museum that is both a map of a society and of his heart. The novel depicts a panoramic view of life in Istanbul as it chronicles this long, obsessive love affair; and Pamuk beautifully captures the identity crisis experienced by Istanbul's upper classes that find themselves caught between traditional and westernised ways of being. Orhan Pamuk's first novel since winning the Nobel Prize is a stirring love story and exploration of the nature of romance. Pamuk built *The Museum of Innocence* in the house in which his hero's fictional family lived, to display Kemal's strange collection of objects associated with Fusun and their relationship. The house opened to the public in 2012 in the Beyoglu district of Istanbul. 'Pamuk has created a work concerning romantic love worthy to stand in the company of *Lolita*, *Madame Bovary* and *Anna Karenina*.' --Financial Times

**colonia spine and wellness: *Food Colour and Appearance*** Hutchings, 2012-12-06 Much of man's behaviour is controlled by appearance, but the appearance of his food is of paramount

importance to his health and well-being. In day-to-day survival and marketing situations, we can or not most foods are fit to eat from their optical tell whether properties. Although vision and colour perception are the means by which we appreciate our surroundings, visual acceptance depends on more than just colour. It depends on total appearance. In the recent past the food technologist has been under pressure to increase his/her understanding of first, the behaviour of raw materials under processing, and second, the behaviour and motivation of his/her customers in a growing, more discriminating, and worldwide market. The chapters which follow describe the philosophy of total appearance, the factors comprising it, and its application to the food industry. Included are: considerations of the evolutionary, historical, and cultural aspects of food appearance; the physics and food chemistry of colour and appearance; the principles of sensory appearance assessment and appearance profile analysis, as well as instrumental measurement; the interaction of product appearance, control, and acceptance in the varied environments of the laboratory, production line, supermarket, home and restaurant. A broad examination has been made in an attempt to get into perspective the importance of appearance to all sectors of the industry.

With contributions and research from different countries using a practical approach, this book is an essential source for students, researchers and managers in the health and wellness tourism industry. Recently, there has been an increased interest in health and wellness due to greater life expectancy, aging populations, increasing levels of stress among others. In this context, the concepts of health, wellness, beauty, relaxation, and tourism can be combined to satisfy the needs of people seeking better quality-of-life. This has given rise to health and wellness tourism, a new market segment that contributes to employment and economic growth in the new economy. It contributes to tourist destinations' economic growth, acting as a pillar to support other complementary activities. In short, health and wellness tourism contributes to employment growth and regional wealth, contributes to tourism seasonality, promotes quality in tourism destinations, helps create new tourist services with high value, promotes establishment of international cooperation networks, and yields a number of additional benefits. Introducing the fitness program designed by a physical therapist exclusively for women — proven to increase strength, tone muscles and reduce aches and pains in just 15 minutes a day! **colonia spine and wellness: The Interior Circuit** Francisco Goldman, 2015-04-02 The Interior Circuit is Goldman's story of his emergence from grief five years after his wife's death, symbolized by his attempt to overcome his fear of driving in the city. Embracing the DF (Mexico City) as his home, Goldman explores and celebrates the city which stands defiantly apart from so many of the social ills and violence wracking Mexico. This is the chronicle of an awakening, both personal and political, 'interior' and 'exterior', to the meaning and responsibilities of home. Mexico's narcotics war rages on and, with the restoration of the Institutional Revolutionary Party (the PRI) to power in the 2012 elections, the DF's special apartness seems threatened. In the summer of 2013, when Mexican organized-crime violence and deaths erupt in the city in an unprecedented way, Goldman sets out to try to understand the menacing challenges the city now faces. By turns exuberant, poetic, reportorial, philosophic, and urgent, The Interior Circuit fuses a personal journey to an account of one of the world's most remarkable and often misunderstood cities.

**colonia spine and wellness: *Dreamland*** Rosa Rankin-Gee, 2021-04-15 For fans of *Children of Men*, *Years and Years* & *Station Eleven*, a postcard from a future Britain that's closer than we think. 'A beautiful book: thought-provoking, eerily prescient and very witty.' Brit Bennett, author of *The Vanishing Half* 'Water courses through its pages, as rising sea levels heighten inequalities, buoy populist politicians and wash away every certainty of civilisation. But there's also the novel's prose - its liquid grace and glinting sparkle - and the sheer irresistibility of a narrative that sweeps along with a force that feels tidal in its pull.' *The Observer* "You said that you would come back. You looked me in the eye and said that. Well, if you had, this is what you would have seen: soft wood, black cracks, fridges in the road. The broken spines of old rides at Dreamland.' In the coastal resort of Margate, hotels lie empty and sun-faded 'For Sale' signs line the streets. The sea is higher - it's higher everywhere - and those who can are moving inland. A young girl called Chance, however, is just arriving. Chance's family is one of many offered a cash grant to move out of London - and so she, her mother Jas and brother JD relocate to the seaside, just as the country edges towards vertiginous change. In their new home, they find space and wide skies, a world away from the cramped bedsits they've lived in up until now. But challenges swiftly mount. JD's business partner, Kole, has a violent, charismatic energy that whirlpools around him and threatens to draw in the whole family. And when Chance comes across Franky, a girl her age she has never seen before - well-spoken and wearing sunscreen - something catches in the air between them. Their fates are bound: a connection that is immediate, unshakeable, and, in a time when social divides have never cut sharper, dangerous. Set in a future unsettlingly close to home, against a backdrop of soaring inequality and creeping political extremism, Rankin-Gee demonstrates, with cinematic pace and deep humanity, the enduring power of love and hope in a world spinning out of control.
