create wellness south korea: Women and Travel Catheryn Khoo-Lattimore, Erica Wilson, 2017-03-31 *Women and Travel: Historical and Contemporary Perspectives* is a fascinating look at the behavior, motivations, experiences, and needs of women as tourists and travellers, drawing on both historic and contemporary eras. Surprisingly little research has explored key issues, experiences, and opportunities in the context of women's travel. With an international roster of contributors from diverse regions of the world, the book celebrates a variety of women's voices. The chapters bring light to perspectives from different countries, cultures, backgrounds, and religions, and utilize different methods, approaches and styles of presentation. *Women and Travel: Historical and Contemporary Perspectives* will be of interest to academics and graduate students from a range of disciplines, including tourism, leisure studies, sociology, cultural geography, anthropology, feminist and gender studies, business, economics and management; as well as professionals working in the tourism industry, particularly those with an interest in niche markets and segmentation.

Gurung, 2014-04-21 Led by a UCLA-trained health psychologist, a team of experts describes non-traditional treatments that are quickly becoming more common in Western society, documenting cultural variations in health and sickness practices to underscore the diversity among human society. This unique two-volume set describes the variety of cultural approaches to health practiced by people of varying cultural heritages and places them in stark context with traditional Western approaches to health care and medicine. Examining health practices such as Ayurveda, an ancient system of medicine that focuses on the body, the sense organs, the mind, and the soul; and traditional Chinese medicine (TCM), the author examines why these different approaches can explain some of the cultural variations in health behaviors, differences in why

create wellness south korea: BEYOND RESILIENCE FROM MASTERY TO MYSTERY A Workbook for Personal Mastery and Transformational Change Stephen Murgatroyd, Sarajane Aris, 2017-01-31 People are actively engaged in a life-search for meaning and this search can lead them to take a spiritual perspective of themselves and the world in which they live. Some find this a spiritual journey—a journey towards an inner path enabling a person to discover the essence of their being; or the deepest values and meanings by which people live-through art, music or religion. The ultimate purpose of our spiritual journey is to be an enabling meaning to be found and given for self and others. In Tibetan Buddhism, the ultimate intention and purpose of our personal and spiritual journey is to be of service and benefit to all beings and to bring all beings to 'enlightenment'. Enlightenment is the ultimate step on our journey, whereby we go beyond our everyday consciousness to serve a 'greater whole', where we are in touch with our ultimate, true nature- the essence of our being. We can think of this journey to enlightenment as a journey both for personal mastery and beyond it.
