david spiceland intermediate accounting: **Auditing & Assurance Services** William F. Messier, Steven M. Glover, Douglas F. Prawitt, 2006 Messier employs the new audit approach currently being used by auditing professionals. This new approach is a direct result of the demands of Sarbanes-Oxley, which has changed the way auditors do their jobs. The new auditing approach emphasizes understanding the entity (i.e., the organization or business being audited) and its environment (i.e. industry), and then assessing the business risks faced by the entity and how management controls those risks. This new audit process focuses on business processes instead of accounting cycles. This unique and innovative approach has been developed in response to changing market dynamics. The systematic approach, referred to in the subtitle of the text, reflects the early introduction of three basic concepts that underlie the audit process: materiality, audit risk, and evidence; this allows Messier to build upon this model in subsequent chapters. These are central to everything an auditor does and a unique feature of Messier. As such, this approach helps students develop auditor judgment, a vital skill in today's auditing environment.

david spiceland intermediate accounting: Financial Accounting Don Herrmann, Wayne M Thomas, J. David Spiceland, 2013-07-10 The financial accounting course is taken by all business majors, usually in their sophomore year. Financial accounting reports summarize the financial health, operating results, and changes in financial status for a business as viewed over a specific period of time. This information is used by outside parties such as stockholders, creditors, prospective investors, regulatory agencies, and the general public. The financial accounting market can be segmented into three categories: preparer (traditional), balanced, and user (innovative). Spiceland/Thomas/Herrmann falls into the balanced segment by offering a balance between the user and preparer orientation. The decision maker's perspective used throughout the book competes directly with Kimmel's pedagogical approach. Financial Accounting has been revised based on the great success of Financial Accounting 2e, Spiceland, Thomas, Herrmann. The content was developed with feedback from over 480 reviewers and focus group participants from across the country. The authors, David Spiceland, Wayne Thomas and Don Herrmann, have developed a unique text based on over 50 collective years of experience in the classroom. They've brought together best practices like highlighting Common Mistakes, offering frequent Let's Review exercises, integrating the course with a running Continuing Problem, demonstrating the relevance of the course to non-majors with a Career Corner, and communicating it all in a student-friendly Conversational Writing Style.
