UNDERSTANDING THE MICROSOFT AZ-900 EXAM FORMAT

Before we jump into specific questions, it's crucial to understand the AZ-900 exam's structure. This foundational exam assesses your understanding of core Azure concepts, including cloud concepts, Azure services, security, privacy, compliance, and pricing. The exam is multiple-choice, meaning you'll select the best answer from a given list of options. This requires a thorough understanding of the material, not just surface-level knowledge. Knowing the format will help you strategize your preparation. The exam is designed to test your comprehension of fundamental Azure services and capabilities, not your hands-on experience with the platform.

TYPES OF MICROSOFT AZ-900 EXAM QUESTIONS YOU'LL ENCOUNTER

The AZ-900 exam isn't just about memorizing facts; it tests your ability to apply concepts. You'll encounter several question types:

1. **Scenario-Based Questions:** These are among the most common. You'll be presented with a hypothetical scenario involving a business needing a cloud solution. Your job is to identify the most appropriate Azure service or approach based on the given requirements. Practice analyzing scenarios and identifying the core problem to select the correct answer.

Example: "A company needs a highly available and scalable database solution for their e-commerce platform. Which Azure service would be the best choice?" This type of question requires understanding the strengths of various Azure database services like Azure SQL Database, Cosmos DB, and others.

1. **Definition and Matching Questions:** You'll be tested on your understanding of key Azure terminology and concepts. These questions might ask you to define a term, match a service with its function, or identify the correct description of a particular Azure component.

Example: "Match the following Azure services with their primary functions: A) Azure Blob Storage, B) Azure Virtual Machines, C) Azure Active Directory. 1) Identity and Access Management, 2) Object Storage, 3) Virtual Servers."

1. **Multiple-Choice Questions (Straightforward):** While some questions are scenario-based, many are straightforward definitions or simple facts about Azure services. Mastering the core concepts is crucial

TO ANSWERING THESE ACCURATELY.

EXAMPLE: "WHICH OF THE FOLLOWING IS NOT A CORE COMPONENT OF THE AZURE PLATFORM?" OPTIONS WOULD THEN LIST SEVERAL KEY AZURE COMPONENTS AND ONE INCORRECT OPTION.
