Understanding SRA Corrective Reading B1: A Foundation in Phonics

SRA Corrective Reading B1 is a highly structured, systematic program designed to address reading difficulties in students at a beginning intermediate level (B1). It focuses intensely on phonics, the crucial connection between sounds and letters, recognizing that a solid foundation in phonics is paramount for fluent reading. Unlike some other reading programs that might prioritize comprehension before phonics mastery, SRA Corrective Reading B1 prioritizes building that fundamental phonetic understanding. This means students learn to decode words accurately before tackling more complex comprehension tasks.

The program employs a multi-sensory approach, engaging various learning styles through activities that incorporate visual, auditory, and kinesthetic elements. This multi-sensory approach is vital for students who might struggle with traditional reading instruction methods. By engaging multiple senses, the program enhances memory retention and improves reading fluency.
