Understanding the 2011 DepEd Kindergarten Curriculum Framework

The 2011 DepEd Kindergarten Curriculum represented a significant step in Philippine early childhood education. It shifted away from solely focusing on rote learning towards a more holistic approach emphasizing the development of the whole child. This framework aimed to nurture children's physical, cognitive, social-emotional, and language development through play-based learning and engaging activities. The curriculum's core principles centered around creating a supportive and stimulating environment where children could learn at their own pace and explore their potential. This focus on child-centered learning meant moving away from strictly structured lessons and embracing a more flexible approach that adapted to individual learning styles and needs.
