

`: This is where the visible content of your webpage lives – your text, images, and everything the user sees.

` **to** `

`: **Heading tags, used for structuring content with different levels of importance.** `

` **is the most important,** `

` **the least.**

`: **The paragraph tag, used for blocks of text.**

``: **Inserts an image. Crucially, the `alt` attribute provides alternative text for screen readers and when images fail to load.**

`[Link Text](#)`: **Creates a hyperlink to a specified URL.**

Let's see a simple example:

```
``html
```
